Volume 30, Number 1

JANUARY, 1976

Our 343rd Issue

This is the last issue you will receive if your A.V.A. dues for 1976 are not paid on March 1. We don't want to lose you, and it promises to be a great year. So please mail that six dollars to our Treasurer, R.K. Frisbee - 211 King Street - Denver, Colorado 80219. If you pay after March 1, it will be seven dollars.

January 29. It took longer than usual to collect stuff for this issue, but here we are with a larger than usual effort. While I have a number of good articles on foreign tokens, and these are always welcome, our barrel is very low on U.S. articles. We solicit these from you, earnestly! In this respect we have had very little news of New Finds during the past five weeks since the December issue. The only big find was that of La 810 A, by Alan Weighell. Mr. Weighell's token has the number 481 stamped into the token, instead of 1870 as on the token listed in Atwood. We should have listed it as "counterstamped numerals" rather than "1870". In the same batch were some other good tokens including Mich 225 B; Ky 510 Y; NY 630 Ld; Minn 760 A C, 540 A; Mass 970 C and Mexico 540 A.

One of our new members, George Owen of Chicago, AVA #1570, reports that since joining in September he has received "some very nice letters, tokens, etc." But he became ill shortly after joining, and is only now recovering. He asked us to let members know why they have not heard from him. Glad to oblige! And we wish him a speedy recovery.

In response to my plea earlier, James Hemphill has come forward with an excellent Index to the Catalogue of Personal Tokens of Vecturists, which we have published in this issue. I am grateful for this very big assist from Mr. Hemphill, as will be all our members who use the Personal Token Listing.

My schedule in January and February is more taxing than at other times of the year, and for this reason the Index to the 1975 issues of The Fare Box is not included in this issue. Next time. Now if some nice soul would come forward with an Index my happiness would be complete. Just use the format of previous years and list everything you can think of, articles and tokens mentioned inside articles.

This is our first issue at the new postal rates. It hurts. 35¢ a copy!

= SOME UNLISTED AUSTRALIAN FERRY TOKENS =
By Les Hawthorne

The three Australian ferry tokens to be described below were reported to Ken Smith a few years ago, but apparently were misplaced by him as they were never listed. Indeed, the first of these was sent to him, along with a number of others while I was down in Australia, so I do hope he did not mislay it.

SYDNEY HARBOUR FERRIES PTY LTD. (LARGE 2)
B 25 Sd For Use in Ferry Turnstiles (Sv-plated)

The above token was issued by Sydney Harbour Ferries in 1973 and replaced Austr 720 XF (listed page 127, Sept. 1967 FB) for a fare increase. The company is holding the 720 XF tokens in reserve for another future fare raise, I was told. Sydney Harbour Ferries also issued another token that is the exact duplicate of the above, except that it is not plated. This token was used for the purpose of checking and testing the turnstiles through which passengers pass on their way to board the boats. Only 20 of these unplated ones were made and I was presented with ten of them by the ferry line.

The last token to be described was issued by Watson Bay & Sydney Steamship Ferry Co. It is the last of a series of six tokens used by this company, there being two round, two oval, and two square tokens. The square ones are rare.

W.B. & S.S.S.F. CO. LTD. 4D.
A Sq Sd Insure With Ocean Accident Corporation. 131 Pitt St. Sydney (25mm)

= THE VERNON CITY BUS COMPANY OF VERNON, B.C. =
By Ralph R. Burry

Not long after World War II, a small bus company operated a bus service in Vernon, B.C. In the early 1960's the bus company went broke because the subsidy from the City was not large enough to make ends meet, and eventually the company was put up for auction. Mr. H. Aarsen of Sidel Moving & Storage Company approached the City in 1966, advising that he would operate the bus again if the City of Vernon would give him a subsidy. The City agreed and in the first year the advertising on the bus paid for the operation of the bus.

The first few years the bus issued only paper tickets--five tickets for a dollar. The tickets were printed by the Vernon Advertiser. The bus was used mainly by older people who lived on the outskirts of town. They could come to town more readily. In the second year and the years following, the bus company received \$150.00 a month. This was the only bus operating in the city and serving the outskirts of Vernon.

Mr. Aarsen kept the bus company until 1972 when he sold it to Mr. Ken Altens who has kept it running. Still subsidized by the City, it is still only a one-bus operation, working out of a private residence in Vernon. On March 1, 1974, Mr. Altens approached the Gold Leaf Imprinters of Vernon to make a transportation token for the bus line. They manufactured the token which was listed in the October issue of The Fare Box as BC 825 A, and which was sent out by Nicolosi's New Issues Service.

= THOSE PHONY "OLD WEST" TOKENS =

The Editor still gets excited letters from collectors who have just acquired, often at great expense, one of those phony "old west" tokens. These were described in our October 1972 issue. They all have "L.A. Stamp" on them and that's the giveaway, as no legitimate issues made at Los Angeles Rubber Stamp Co. carried that exact mark. The tokens usually are artificially aged, and made of bronze, brass, or zinc, and all look just too good to be true, about stagecoaches, buffaloes, etc. Don't be taken in by them. They are strictly frauds.

My article on Swedish tokens in The Fare Box of 1973 (page 139 ff) brought no response from the States, but it has in other ways been an absolute success. It brought many very fine relationships in Scandinavia, most profitable for both parties. I finally obtained access to the collections of the Municipal Museum of Malmö and the cards of all the transportation tokens in this collection, fully described and illustrated, are now in my possession. Needless to say there are several unlisted tokens to report. I shall not do this now, for I have not yet studied these cards thoroughly and I want to be precise when I do make the listings.

But from the letters from other friends there are many more to report. In the first place the Kongaly mystery, which appeared soon enough to be no mystery at all, but just shoddy work on my part. If we had read the token a bit better there would have been no problem at all. I hope Mr. Smith has this token, too, for then at least I would not be the only duffer!! On the token is not KONGALES etc., but KONGELFS. And Kongelfs is a small town (in 1914 it had about 1400 inhabitants) to the north of Göteborg, north of the island Hisingen. Its name was spelled differently during the years. In my Andree atlas the name is already Kungelf. My Baedeker guide of 1899 gives the same name, but the same guide of 1914 gives the new spelling Kungälf under which name the token should be listed. I really am ashamed I have not found this myself earlier. It is, however, an ill wind that blows nobody any good. In the same letter that solved the Kongaly problem I was offered a barn-token (child fare token) from Karlstad. Thinking I would get the 405 B I ordered this item, but to my astonishment I got a really "barn" token:

KARLSTADS BUSS AB . BARNPOLLETT . (CITY ARMS)

C B 20 Ch (RV 705)

The hole is not the large 10.2mm hole of 405 B, but a much smaller 5mm hole. From the same source came a report of three tokens of an entirely unknown bus company:

OSKARSHAMNS . OMNIBUSBOLAG .

A B 18 Sd (blank with rim)

B B 18 Sd Anlita Oskarshamns Sparbank (tree)

OSKARSHAMNS OMNIBUSBOLAG (NO DOTS BETWEEN THE WORDS)

C B 18 Sd (blank with rim)

Oskarshamn (hamn = harbor) is a town on the Baltic Sea in southern Sweden at the height of Gotland. In 1914 it had about 10,000 inhabitants. Now it is probably much larger. The tokens are used in the town itself and in its outskirts.

In my article on page 142 I reported the two tokens of the Malmö-Limhamn Railway. A small hoard of these tokens has now turned up. They are now offered (I hardly dare to say it) at the price of Sw.Kr. 50.- a set. This makes the considerable sum of \$16.00 in U.S. money (including postage). I agree it is very high, but the tokens remain scarce and there is only one person in Sweden who has the whole lot. I take it there is not much interest in these tokens at that price, but if you are interested please drop me an airmail postcard. Don't send money or a check, for I am not sure the tokens are still available. If you are not a regular correspondent of mine, be so kind as to state your A.V.A. number. Please let me hear from you no later than March 1 (airmail takes only 4 or 5 days to Holland). My address is Tollensstraat 11, Capelle a/d IJssel, Holland.

I must also report some Göteborg transportation tokens sent me by a new friend in that city. These are ferry tokens which are not recognizeable as such, but they have been so identified by a Swedish collector. The first is a token used on a ferry from Bläsen to the southern bank of the Göta Älv to the Eriksberg Varfvet (shipyard) on the northern bank. On the map in my 1899 Baedeker the shipyard, as well as the ferry, is shown. The token is described as follows:

ERIKSBERG 10

o B 18 Sd (RV 705)

On the ferry which connected Göteborg with the small island of Styrsö, a sea resort for the inhabitants of Göteborg, there were used plain brass tokens with incuse value, as follows:

	20 ÖRE (IN TWO LINES)(INCUSE)
o B 30 Sd	(blank)
	30 ÖRE (IN TWO LINES)(INCUSE)
O B 30 Sd	(blank)
	40 ÖRE (IN TWO LINES)(INCUSE)
o B 30 Sd	(blank)
	60 ÖRE (IN TWO LINES)(INCUSE)
o B 30 Sd	(blank)

It may be understood that I have hesitated to report the above tokens. Knowing, however, that my correspondent is a native of Göteborg and a well known citizen of the town (he is a pharmacist) and a keen and renowned numismatist, I decided I had enough justification to accept his identifications. These tokens are in my collection.

The foregoing are only part of the new discoveries from Sweden. But as my health is not as it should be, I don't know when I shall find the courage to make a thorough study of these. The same is true of an entirely new field, the railway tokens of Austria. Just before I became ill, I spent a week in Vienna, and there I made rubbings of all of the tokens in the large collection of the Austrian Railway Museum, and also I noted all further data. It is a tremendous work to catalogue these, and under the circumstances I cannot promise anything.

As I am not interested in passes, I did not pay much attention to passes in the collection. The ordinary collector can hardly obtain a really fine pass such as those in the collection Von Loersche. Roughly counted, there were more than 25 gold Russian passes. And from Australia they have ten odd passes made of what I believe is gilded silver, and far more than 30 gold passes. It is virtually impossible to describe these items. They require color photographs. But as to the tokens, I shall do my best to provide listings as quickly as possible.

= QUEBEC CITY OR HARTLEPOOL, ENGLAND? =

The Editor recently received a letter from AVA member Yosef Sa'ar, of Elat, Israel. In his letter Joe exulted in the apparent discovery of a third, hitherto unlisted ferry token of Hartlepool, England, as the result of correspondence between him and the maritime museum of the latter city. The Museum sent Joe a rubbing of the third token, which differs from those listed by Smith on page 92 as England 365 A & B.

But the rubbing sent along by Joe looked familiar. I pulled out my Atwood, and there on page 679 is a photograph of the same token which resides in the museum at Hartlepool, and which the museum insists was used on the Hartlepool Ferry! The museum sent along a fine history of the ferry, which we shall publish presently, and stated that the token was donated to them by a Mr. M. Fraser.

So the question arises, Was the token which we list as Quebec 745 G in Atwood actually used at Hartlepool in England? I suspect that it was, and that therefore the Canadian attribution should be dropped. I've always wondered, as a matter of fact, just how it was decided that Que 745 G was used at Quebec City. Now I wonder even more. If any of our Canadian collectors can enlighten us as to why this classic rarity is considered from Canada, it will help us clear the air.

One thing is certain, because of the demand for old Canadian tokens, if it turns out that this token is from England, its value will descend considerably from its present stratospheric levels. There just isn't the demand for early English tokens that there is for early U.S. and Canadian tokens.

= FEISEL PERSONAL TOKENS =
by Duane H. Feisel

In the November 1975 issue of TFB there appears a listing of some of my recent tokens in the "Supplement #1 to Personal Tokens of Vecturists." There is an error in the listings in that my membership number is 305, not 312 as listed. Good friend Don Mazeau happens to be #312.

As you can see from my advertisement which appears in this issue, I have a business supplying custom minted tokens and medals. This being the bicentennial year (or at least it is close at hand), there is considerable interest in medallic commemoratives by businesses, organizations and individuals. Many of the offerings of medals produced by other mints are priced to exclude many people, so I have developed something which an organization can sell for \$1 (affordable by almost everyone) and yet still be of a good quality. The response to this has been tremendous, and I am making a number of orders.

A special design format was developed which can be adapted to special designs for different states or areas. My ad shows some of these designs. I will continue to add designs for individual states as I identify interest from prospective customers in those states. The sharing of the special design results in an attractive token or medal without paying a lot of money for a custom die having a design, and most of my orders utilize the "stock" special designs although a few customers are willing to pay the extra cost for their own special designs for both sides.

For each of the individual State Salutes designs, I plan to issue at least the following myself:

1. My advertising card to be distributed as a sample to prospective customers, made in aluminum, brass, bronze and nickel silver (examples 305 K L M N);
2. Silver (one troy ounce) and gold (1.33 troy ounces 18 carat gold) ingots with the special state design, reverse with my name and address together with information (examples 305 O and P which are brass patterns for the gold ingots). The .999 fine silver ingots will sell for \$10 each in a limited edition of 1776 pieces for each state; the gold will sell for \$225 each in a limited edition of 50 pieces for each state;
3. A medal which will provide information about the state as the reverse design (state nickname, admission information, capitol, symbols). These will be made in brass (\$1.00), silver (\$10) and gold (\$225).

Incidentally, Mr. Coffee made a slight error in not including as part of the reverse descriptions for 305 K and 305 P the initials DHF and RDT which are on the pieces.

I have had inquiries from AVA members as to the availability of these listed tokens and others to be issued subsequently. As much as I would like to, I cannot simply give away one of everything to each request. Therefore, I will send out one piece to each request (and many of you already have at least one of the listed items), but additional pieces will cost @50¢. I will even accept "subscriptions" for each of the pieces issued of the type #1 above @\$2.50 per set, or of type #2 at the listed prices, or even the type #3 at the listed prices. I hope you can understand the need for this policy--I'd like to be able to give these pieces as requested, but that is not possible or practical financially.

= STRICKER'S GROVE OF CINCINNATI =

The Editor received the following letter from a member about the tokens used by Stricker's Grove, and I put the relevant part of the letter in my tray for future use. Unfortunately the man's name is not on that sheet so I am unable to give him credit. But it's a very interesting letter:

Last evening I attended a dinner dance at the New Stricker's Grove, located on State Route 128 south of Ross, Ohio. I took the opportunity to seek out the present owner and found the same family is still operating it. They moved to the present location about two years ago. According to Mr. Stricker, probably the son of the founder, it was started in 1923. The tokens were used from the mid-1930's to about 1950. They started with the 5¢ and 10¢ in the 1930's. The 5¢ was for a pony ride; the 10¢ for a horse ride. Then they changed to 10¢ for a pony ride and 15¢ for a horse ride. About 1946 they changed to 15¢ and 20¢ respectively, until they were discontinued about 1950. All tokens were disposed of.

= A NEIGHBORLY ACT WITH A TRANSPORTATION SOUVENIR =
By Milton G. Heitman

It was on May 13, 1891, that the City of Davenport's fathers entertained the fathers and leaders of Cedar Rapids in their city of Davenport, named after Colonel George Davenport. The trip was made in special cars on the Burlington, Cedar Rapids & Northern Railway, or B.C.R. & N. as it was more commonly called. Each person making this trip received a token for its remembrance. The token's obverse has the portrait of Col. George Davenport. The reverse side has a picture of one of the special cars used on the train, and directly below is the friendship sign, the handshake, encircled with the words "Cedar Rapids" above and "Davenport May 13, 1891" below.

Even though this is not a transportation as such, I feel it is an interesting piece in my Iowa collection, for it was given to about 300 that day as a remembrance of the trip by rail, a distance of approximately sixty miles.

= PARADISE ISLAND BRIDGE TOKENS OF NASSAU, BAHAMAS =
By Yosef Sa'ar

I recently acquired the set of 4 tokens now in use on this bridge, along with information about their use. The tokens are described as follows:

	PARADISE ISLAND BRIDGE NASSAU, BAHAMAS (PALM TREE)
WM 29 Sd	(same as obverse) (13mm blue disc in center)
	PARADISE ISLAND BRIDGE NASSAU, BAHAMAS B
B 25 Sd	(same as obverse)
	PARADISE ISLAND BRIDGE NASSAU, BAHAMAS C
WM 27 Sd	(same as obverse)
	PARADISE ISLAND BRIDGE NASSAU, BAHAMAS D
B 23 Sd	(same as obverse)

The first token is used by the toll attendant when a \$2 toll is paid; it is not available to the public. The second (B) token is used by employees of Paradise Island, and is sold in advance for 25¢ each. The third (C) token is used by commercial vehicles for deliveries, and is sold in advance for 50¢ each. The last (D) token is used by residents of Paradise Island, and is sold in advance for 50¢ each. All tokens entitle the user to a round trip across the bridge. These tokens are in use at the present. Whether the bridge company would sell any to collectors is problematical. They have been in use since 1967, according to the bridge company.

Hallenbeck, K.L.	1039	Punshon, D.	440		

The above is a list of every A.V.A. member, past or present, who has issued a personal token, with his membership number to the right of his name. By means of this list it should be simple, hereafter, to use the booklet Personal Tokens of Vecturists, which was published last summer and which is still available for only one dollar a copy, postpaid. The list above includes a few members whose tokens have not been listed, but which will be listed either in this issue or the next. Hence the list is up to date as of the next (#2) Supplement to our listing.

Ralph Freiberg, in going over the Meyer & Wenthe records, found the following information. Perey Turnstiles, Inc., ordered for the customers the following three turnstile tokens. Meyer & Wenthe had no addresses for these companies but I was able to place them as Cuban tokens used before Castro. I am not putting prices on them until collectors find them:

C U B A

Sagua La Grande 660

OMNIBUS LA VICTORIA SAGUA (LARGE B IN CENTER)

A o WM 22 Sd (same as obverse)

(15,000 of the above were made in March, 1957.)

Santa Clara 700

OMNIBUS DE SANTA CLARA, S.A. (LARGE T IN CENTER)

B o WM 22 Sd (same as obverse)

(12,000 of the above were made in 1947.)

Unidentified 995

OMNIBUS LA ESPIRITUANA, S.A. (LARGE B IN CENTER)

A o WM 22 Sd (same as obverse)

(8,000 of the above were made in May, 1957.)

Santa Clara is a town of about 120,000 and Sagua La Grande is a town of about 35,000 located a few miles from Santa Clara. The unidentified 995 A turnstile token is probably from a bus line also located in the same general vicinity.

H A I T I

Port-Au-Prince 600

UTILITI D'HAITI H

A o WM 20 Dd Good For One Fare H

1.00

B o WM 21 Dd "

4.00

C o WM 23 Dd "

4.00

Ralph Freiberg also found in the Meyer & Wenthe records that in May, 1935, they shipped 1,000 each of 600 A,B,C. From another source I heard that these items were experimental tokens given to government and company employees to see which type(s) they would order in quantity for public use. But then they decided not to use public tokens at all. A couple of years ago I saw in an auction a token reading like 600 A but listed as 21mm and I bid \$10 to get a dupe to trade, but did not get the token. This item was apparently 600 B, so one exists. I also received a rubbing from an AVA member of 600 C but soon thereafter misplaced the rubbing and cannot remember his name, so a 600 C exists and a collector is probably angry because of my not listing his token.

The volume of World Catalogue mail is so large that occasionally some listings do get misplaced for months or years. In the last two years with Kirk Smith's help the control of world TT listings and mail is improving. If you have in the past sent listings that did not get listed, please do resend rubbings and descriptions, and this time we will get them listed.

Remember, please, when you report new discoveries, in addition to giving the exact wording, spelling, and punctuation, to send RUBBINGS and/or PHOTOGRAPHS. This is essential to insure accurate listings. Please keep the listings coming.

= PARKING TOKEN NOTES BY DUANE H. FEISEL =

The value of the information obtained through Meyer & Wenthe becomes very obvious with the listings for this supplement in that they are the source for most of the tokens being listed now. This same effect will be evident for many months as records are checked.

Although I obtained a couple of tokens by writing to Selma, they declined to sell any quantity for PTNIS; the only information received was for the dates of use of the token. It is possible that some of the tokens are available for those wishing to write, and I suggest sending 10¢+SAE to the City Treasurer, P.O. Box 1, zip 36701.

The Fayetteville tokens--I obtained two of them for the \$1 I sent--were in the reply envelope with no comment. I had written the parking manager at the University, zip 72701.

My letter to the Dixon Company in Denver was returned marked "Not at this address." Perhaps someone can track down the company and locate some tokens. Their old address was 208 Wazee Market.

In Stamford, the tokens were ordered, but the merchants did not want to participate when the attempt was made to start a token validation plan. The tokens were returned to the meter company, so some of them may be available. I did get a couple from the source, but they have no more.

From the M&W records, I know the location of the new listing for Florida. My inquiry of a couple of months ago has not been answered.

My inquiry to Orlando of many months ago was never answered, nor was the \$1 I sent ever returned.

The Sternshein Drugs token from Chicago was listed in an auction several months ago, but my bid was not successful. Did any AVA member buy the piece? If so, please advise me of the reverse variety--the date of manufacture suggests it should be B or C. While mentioning the B reverse, I have noted on some recently made pieces that the B reverse is being used. The original life of that reverse was fairly short, and it does not occur on very many old tokens. I suspect the die was misplaced, and found only recently when it was placed back into action because it was still a good die. In the future you will be seeing some listings of fairly recent tokens with the B reverse.

The City of Freeport sent me a few tokens in response to my inquiry, but they indicated that the supply is short and they were having a difficult time meeting the needs of the local merchants who give out the tokens to customers for use in parking meters or as payment for parking in a City-owned lot. You can try writing the City, zip 61032; my reply came from the City Clerk.

There is a merchants parking validation plan running in Vincennes, Indiana where the tokens were purchased by two of the local banks. They probably figured the value of the advertising made up for furnishing the tokens to the system. I did get a few tokens in response to my inquiry, but my request to buy a supply for PTNIS was declined. Running the plan is the Downtown Merchants Parking Assn., P.O. Box 438, zip 47591.

The tokens at Ames are used by operators of University-owned vehicles and by other maintenance personnel who use their own private vehicles on University business. I did get three tokens for the 25¢ I sent--one had no c/s, but one had "T" and the other "C" stamped on each side. I suspect the stamped letters are some sort of control. If you want to write, try the Parking System Office, zip 50011.

The bank in Alpena, Michigan, sent me a couple of tokens for the \$1 sent, but they refuse to sell me more for PTNIS. While specific information was not provided, I gather the token is used in a gate-controlled lot for bank customers. The parking value of the token is 50¢, so if you write, sent 50¢+SAE; the zip is 49707.

My letter addressed to Corpark in St. Louis was returned marked "Unknown." The address I used was 705 Olive St. Perhaps someone will be fortunate enough to track down some of these tokens. If so, please let me know of that fact, and the reverse variety (which is probably E).

The YMCA in Plainfield responded to my inquiry, and told me that they had none of the tokens left. Again, if someone should

have the good fortune to track down one of the tokens, please advise me of the reverse variety (probably E, possibly F).

The Albertson, NY, token use was being halted since the supply of tokens became depleted. I was informed that there are no more tokens on hand, so writing would prove fruitless.

Acting on information I supplied to him, Bill Carr spent a few hours at the Children's Hospital in Akron and was able to track down one token from a maintenance man. My inquiry to the Hospital had gone unanswered, and the \$1 sent was not returned. Parking gates are still used, but they are card operated.

My letter to Clarion was returned by the present occupant of the P.O. box to which it was addressed. However, they had no knowledge of Clarion Parking. This is a real oldie--if someone is able to track down a token, please let me know.

Spartanburg General Hospital replied to my inquiry, but they did not send any tokens since the supply was very limited, and the Hospital is not permitted to sell tokens. This one will likely prove most elusive.

The Nashville listing is taken from M&W records. I sent off a letter which was returned marked "Addressee Unknown." Again, if a lucky collector is able to trace this one and get a token, please let me know.

The Saint Joseph Hospital in Fort Worth issues tokens to out patients and volunteer workers to provide free parking in a visitors' parking lot. I received two pieces for the \$1 sent, but a supply for PTNIS is not possible. If you write, send 50¢ +SAE; the address is 1401 South Main St., zip 76104.

My letter to the YMCA in Richmond was returned without comment. In the past they were quite cooperative!

Completing the listings for this month is a lengthy list of Additions and Corrections. You will note an addition for NC 3380 A--the attribution supplied to me, but questioned when the token was reported in December, is correct. The token was used at the Jefferson Standard Life Insurance Co. at their building located at 101 North Elm St., zip 27401. A limited number of free parking spaces for insurance customers were provided in a gate-controlled lot, and the token was for exit from that lot. Regular parking customers had a plastic card for gate operation.

Nothing this month for PTNIS customers except that mailings of the accumulation of tokens from the past year have been started. Hopefully, there will be a lot of tokens in the months ahead even through the results for this listing have not been good.

In the November issue, Harold Ford offered Cal 775 A and Wash 590 A for auction. We understand the highest offer for the pair was "\$100 in silver coins." We are told that \$100 in silver would be worth about \$300 in today's money.

Norman Sherman reports that Personal Token 611-A, listed in the PT Supplement in the November issue was never ordered by him and he has none. Be that as it may, the Editor has one. How it came into existence is a mystery!

= NOTES BY RALPH FREIBERG =

Starting off the new year we list a token for Hartford. We learned of this one from Meyer & Wenhe and, as it had a date of May 1975 on it, we put Mort Dawson to work. He was able to learn about the token, and it seems they were ready to start operating this carousel last year, but ran into difficulties from various people deciding just how it would be run. So the token still has not been put into use as of January, 1976. But Mort was still able to get a supply of the tokens for the New Issues Service, and it is one of the most beautiful tokens we've seen in years! We shall be informed when the tokens finally go into actual use.

Next a token for Bay Harbor, FL. The original issue for this causeway was a Franklin Mint token, but Franklin Mint is getting out of the fare token business, so other token manufacturers are moving in to fill the void. The result is that re-orders of tokens first made by Franklin Mint come through with a new and different mintmark on them, for the new manufacturer, and this 60 B is such a case, being made by Roger Williams Mint of Providence, RI, and bearing their very tiny mintmark in place of the fm on the 60 A tokens. The rw mintmark is on both sides of the token, whereas the fm is only on one side of 60 A. I contacted several AVA members in the area to see about obtaining a supply for us, but could get a response only from one member, who is offering them for trade in this issue in the ad section. The token will not be sent out by New Issues Service. The company won't answer our letters.

Next we learn of another token through Duane Feisel, who learned of the token from Meyer & Wenthe. It took us a while to get through on this token, and we still have not received a supply. Thanks to a phone call by Joel Reznick, however, a quantity has been promised to us. The white metal token is for handicapped people. In future catalogues we should not that these tokens are used both in Champaign and Urbana, and not in Champaign alone.

The New Orleans token was listed in the New Finds column of the November issue.

I mentioned the oxidized token of the Seattle & Rainier Valley Railway last year. There has always been controversy about these tokens, especially the so-called bronze and copper listings, and I'm waiting to see a definite bronze which is not just a shade of copper. So there may yet be an alteration in the separate listings of 780 I and J. Meyer & Wenthe records do not show them making tokens for this line before 1925, so who made the earlier tokens I don't know. In any event, M&W made 5,000 bronze tokens in July, 1925; 5,000 more in September, 1925; and then 5,000 more in July, 1926. Then more were made in the period from November, 1926, to July, 1936, and all in this latter period were marked oxidized. These all may have been of the broken S type (S). Some of the orders made in the 1930's were definitely bronze with oxidized coating. Why the tokens were made oxidized, and why they were made with the broken S, I do not know. The oxidation makes the tokens look as if they had been dipped in black ink, but by now only a few are still in that pristine condition. So to check and see if you have the oxidized type you have to check for minute traces of black in the recesses of the token. Most of it has long since worn off. But with respect to whether tokens were made some in copper and some in bronze, someone is just going to have to show them to me and John Coffee to convince us.

Meyer & Wenthe also made 5,000 of the 23mm Seattle & Rainier tokens in 1930, so perhaps there would also be copper and bronze of the 23mm token, as those made in the early 1920's are the ones we call copper. Anyway, by listing this oxidized token here, maybe we'll spur a few other collectors to bring these listings out in the open so by the time the next Atwood is published we'll have more information.

The Unidentified token was found in the Cincinnati area by Mr. Lipscomb. There is still no proof it was actually a transportation token.

We kept kicking the Kansas City token around, as this was a case of listing a token before we had seen one. This is one more reason to hold up a listing till I actually see the thing. The Kansas City authority told us these tokens were made by the Mount Everest Mint, and that is what the men is for in the relisting of the token. Previous to using the Econofare in May 1975 they had some kind of a ruckus in the sale of tokens to certain people. It seems they were selling them at a reduced price and others were then bringing the tokens back to redeem them at full fare. So this is probably why it says NOT REDEEMABLE on it. The Econofare program began in May, 1975, for a six-month trial, but has since been extended. These Econofare tokens are sold at 25¢ to Kansas City residents who are enrolled in federal food stamp programs, but are good for a 40¢ fare (we did pay 45¢ each for the tokens from the Authority). Those eligible for food stamps are allowed to buy tokens according to the amount of food stamps they can buy. About 12% of the eligible group are buying the tokens and this is considered a success, so the trial has been extended to May, 1976, and may go on beyond that.

Note the men mintmark for Mount Everest Mint is also found on NY 980 B of White Plains, so you might want to add men to the listing for that token. There is also a chance that the token we talked about last year for Delaware River Bridges, Pa 263, pictured on page 95 July 1975 Fare Box, may also be a men mintmark, in which case the token will get a separate listing. As we can't get these new mintmark tokens for NIS, I hope some collector will get a supply and offer them for sale or trade thru ads in The Fare Box. Don't see any but fm mintmarks on the Pa 263 A's offered in ads now.

It seems the company in Columbus, GA, was taken over by a Public Transportation Authority and they say they haven't used tokens for 8 years. However we know M&W made some Ga 240 E tokens with a 1/16th inch hold in them--50,000 were so made. But I've never seen a one, and if anyone has one with this tiny hole please let me know. There also was something in the records about the thickness of the 20mm Ga 240 F, but I haven't seen any thickness varieties on this one so don't know.

Another token I'm curious about as to how many different collectors may have one

is Mfg Sample 6 J (page 628 of Atwood). It seems that some samples were sent to Perey Turnstiles in January, 1946, as samples. But then a couple months later an order of 3,000 were made and billed. These must have been sent somewhere and used as regular fare tokens, possibly in a turnstile. So they are listable issues if we can discover where they were used. So I am curious to know how many of you have this one and where you got it, so maybe we can learn where it was used.

There are, of course, a whole lot of other tokens that were made by Meyer & Wenthe which have never turned up, and eventually we'll list these separately as we do have descriptions of them in the records. Samples of some of the tokens exist, and if we see the token itself it will be given a regular listing. Others we know of only from the records will go in a separate list of tokens we know were struck but which no collector has ever seen.

We expect to get the dyed black tokens of Albany, NY, and a new bronze one from there, for next month. They've already promised to send them to us.

= JANUARY NEW ISSUES SERVICE REPORT =

By John G. Nicolosi

We anticipate lots of new issues for 1976. We get rolling this year with the help of some of our loyal members who continue to give us a lot of assistance in getting new tokens, and we are doubly grateful to them...

To Mort Dawson, who obtained Conn 210 D (a beautiful token, and you will agree when you see it).

To Joel Reznick, for his part in our obtaining the Econofare token of Kansas City. We waited a long time on this one, but now we have it thanks to Joel.

To Jerry Bates for his lead on Ohio 860 R, the TidBit token.

And you will also receive IL 135 J, although I don't have them in hand. But thanks to a phone call by Joel Reznick we definitely shall have them.

The above 4 tokens will be sent to both Regular and Associate members of N.I.S.

Incidentally it should be noted that these limited use tokens, which are available only to certain groups of people such as the elderly, the handicapped, or the poor, will probably be rarities in years to come. They are made in limited quantities, they are usually used only briefly until the plans that use them fail, and then quantities on hand are usually destroyed. We are very to get them right now, at the beginning, and so far we have managed to get nearly all of them for NIS members.

Obtaining new issues requires the cooperation of a lot of AVA members, and I hope we continue to get it, and from more of you than in the past. It makes my job easier and more pleasant, for one thing, and it helps everyone in the long run.

I enjoyed our phone conversation, Mort and Joel.

If the tiny mintmark on No 440 W stumps you, it is mem for Mount Everest Mint, situated in Willowgrove, Pa. The token first used in May 1975.

= THE 1976 A.V.A. CONVENTION =

Keep these dates open: August 13,14,15--that's when you can participate in our Bicentennial Convention to be held at the Bel Air Hilton on the River in St. Louis, Missouri. This will be a unique meeting. The banquet and tour will be held Friday night. Saturday afternoon will be open for sightseeing, a ballgame at beautiful Busch Stadium, shopping, or just plain swappin'. And our annual auction will be held on Sunday. More info to follow!

Tokens for the auction are now being accepted by the convention committee. Please try to limit the number of common tokens--they clog up the auction list and create a bidless void during the auction. Send your tokens (insured, please) to Joel J. Reznick (Convention Chairman) - 120 South LaSalle Street - Chicago, IL 60603.

WANTED: WYOMING MERCHANT and Transp. tokens. Will trade or buy. Interested in Colorado also. = Leon Corpuz Jr. - P.O. Box 374 - Sinclair, WY 82334

ATTENTION PARKING TOKEN COLLECTORS. I still have more than 1,000 diff. parking tokens available for sale to you at REASONABLE prices (in fact, cheap). I will respond to all legible complete want-lists in the order of receipt. Partial lists are not welcome. = Max M. Schwartz - 2920 Point East Dr. N-501 - Miami, FL 33160

CHICAGO AREA COLLECTORS are invited to the Chicago Coin Bourse at the Leaning Tower YMCA, 6300 Touhy. Of the 18 dealers, there are several AVA members who have many tokens for sale. Meets second Sunday of every month. =Ben Odesser

FOR SALE: CO 260 L \$1.50; ID 640 A (with dent) \$3; KS 540 A 40¢; KY 480 E L \$1.50 ea; MD 60 AK \$1.50; MA 550 A \$2; MN 540 I 35¢; NV 100 A \$2.50; NJ 115 G 35¢; OH 440 C (small crack) \$1.10; UT 750 J 35¢; WV 640 A \$2.50. SAE please.

Gary F. Nelson - 17911 Doty Ave. - Torrance, CA 90504

DON'T PAY INFLATED PRICES FOR NY 760 D (2 die vars.) or MSPT 3054 A (3 die vars.). Will trade these in any quantity for other transp. tokens I need on an even-catalog-basis; please send list. ALSO WANTED: NY 998 O, 615 B E, and Poughkeepsie horsecar tickets. = C.E. Benjamin - 12 Kingwood Dr. - Poughkeepsie, NY 12601

American Vecturist Assn. - P.O. Box 1204 - Boston, MA 02104

= ALL AUCTIONS IN THIS ISSUE CLOSE FEBRUARY 25 =

Advertisements in THE FARE BOX are free to A.V.A. members, up to 6 lines in every issue if desired. Simply write your ad on a postcard or separate sheet with name & address, and mail it to the Editor. It will go into the next issue.

However, please do not send more than one ad at a time, and wait until an issue has been received before sending another ad. I just discovered there are a couple of "doubles" in the ads in this issue, as I simply put ads in my ad tray as they come in and then type them as they come off the top. If you want to add something to an ad, just put "addition to my ad" so I won't run a double ad.

Also please make the ad different each insertion. We can't run the same ad more than once.

Auctions must not include tokens which are listed under 25¢ in any Catalogue, and must not include personal tokens (except for those of deceased members; these are OK for auction) or fraudulent tokens such as those "Old West" things.

The Code of Ethics of the AVA provides that a purchaser of a token may return it for refund within ten days, no questions asked.

Volume 30, Number 2

FEBRUARY, 1976

Our 344th Issue

March 3. The Index to Volume 29, the 1975 issues of The Fare Box, is included with this issue, which was constricted to 14 pages as a result. We can get only 8 sheets (16 pages) into a two-ounce package which costs us 24¢ to mail. Speaking of the new postage rates, we really appreciate those members who voluntarily added some extra postage money to their dues this year, or being life members still sent us some postage money. Every little bit helps this year!

Our Treasurer, R.K. Frisbee, reports that we have lost fewer members for non-payment of dues this year than we have for many years. The result is that we begin 1976 with more paid-up members than at any time in our history, and 1976 promises to see quite a surge in membership and, consequently, in activity in the hobby. Which means your free ad is even more valuable than in the past, because it reaches more people. Remember you may have an ad in every issue if you wish, up to 6 lines per insertion. Just write it on a postcard with your name & address and send it to me.

Mrs. Richard Atkins, widow of late AVA member Dick Atkins, has given me some odds and ends that Dick had, which I shall auction off in this and subsequent issues. Some of this material is pretty good. No common stuff will be auctioned, except in quantity lots. Quite a few lower priced foreign will be sold eventually.

Paul and Susan Cunningham are about finished with work on the comprehensive Index to all issues of The Fare Box from 1947 down to the present. This will be a printed booklet, a companion to the Personal Token Catalogue, and a copy will be sent free to every A.V.A. member of record as of publication date. Another book now in the works, and which we hope to have ready during the summer, will be a bound book on *The Best in The Fare Box*, a reprinting of all the best articles ever published in this periodical from the first issue to the present. We hope to include photographs, and it will be a digest of over a quarter-century of information about fare tokens. And, finally, the Editor intends to publish a six-year Supplement #2 to the Atwood Catalogue this Fall, which will list every token reported from January 1970 to the present--this is something that is obviously very much needed around here.

Where will you be August 13,14,15 of this year? At the Bel Air Hilton in St. Louis if you are an active collector. Those are the dates of our 1976 Convention.

= VARIETY FARE =
By Ralph A. Hinde

The November FARE BOX carried an article about a group of collectors updating the old Schwartz list of die varieties, which was never completed. It is financially impossible to print up and distribute this list to all members. So the next best thing: Ralph Hinde has offered to lend the list to anybody who wanted it and would make his own copy.

To date a number of collectors have taken advantage of this offer with pleasing results. A couple of "master" copies were sent out on a sort of round-robin basis, each collector paying his share of the postage to receive the master and send it to the next collector, finally returning the copy to Ralph Hinde. A few collectors have donated extra copies which eliminated the return postage for a few lucky vecturists. The normal phrase "it goes without saying" cannot apply here. This type of enthusiasm (helping other collectors) should be and is warmly acknowledged. Thanks, Fellows. Your assistance in this effort is greatly appreciated and although individual names are not mentioned, some of us know and appreciate your contribution to a great hobby.

This listing is still available for loan to any collector who wants it to make his own copy. We ask only cooperation in returning it quickly, or forwarding it on to others. Further, we ask for help in adding more varieties to this listing. Syd Joseph had offered to photograph all varieties. Would you be willing to lend your token to him for a period of time long enough to allow him to be certain he has a satisfactory negative? Also would you give permission to allow Syd to remove any token from its holder, and possibly clean it if necessary? All precaution would be taken to protect your property naturally. But the problem is still financial! Could we ask you to pay postage on tokens both ways, to Syd and return to you? There is no profit involved in this endeavor. Syd has the expense of film, developers, and printing. It isn't fair to ask him to pay postage also.

The listing is available from Ralph Hinde - 225-30 106th Ave. - Jamaica, NY 11429. Please send first-class postage (3 oz. = 35¢). I'll supply the envelope to send it to you. (Have you priced envelopes lately?)

= THE PUENTE COLGANTE TOKEN OF MANILA, PHILIPPINES =

The tokens of the Republic of the Philippines are interesting, as they span the rule of three different authorities. 500 A was issued when the Philippines were a Spanish colony. 500 B,C,D, were issued under U.S. control, as was 100 A. 400 A was probably issued under U.S. control, but I'm not certain about that one. And all the 700's were issued under the Republic, I believe, although Clark Field was a U.S. Air Force installation. The tokens are also all quite scarce except 500 C and D, and 700 G H I. The 100 A, 400 A, and 700 C D E F are all census.

The oldest, 500 A bears a Spanish inscription meaning "Suspension Bridge." According to an article in the October, 1975, issue of *Barrilla*, a quarterly issued by the Manila Central Bank Money Museum, entitled "Isabel II and Philippines Numismatics" by Angelita G. Legarda, the suspension bridge which used this token was quite famous, and was "depicted in pictures and engravings, (and) mentioned in song." The bridge was built by Matia Menchacatorre & Co. under the direction of a French engineer, M. Gibaud, with the materials brought from England. The bridge opened to the public on January 4, 1852, and a brass token [500 A] was issued with a probable value of one quarto, which was the toll for pedestrians. Toll for carriages was 10 quartos, and for horsemen it was 3 quartos. The bridge has, since the 1930's, been replaced by what is now known as the Quezon Bridge. There is a picture of the bridge in the article by Ms. Legarda, and we are grateful to Yosef Sa'ar of Elat, Israel, for forwarding a copy of the article to us.

It is interesting that this very ancient transportation token is more or less common. Its price of \$3.50 in Atwood is really a bit high, because the token is much more abundant than 700 A thru F which are priced at the same figure or lower.

The railway tokens, passes, and commemorative medals in the Austrian Railway Museum have been mentioned in coin journals for years. Their famous collection is the one that was donated about 1900 by Count von Loersche. The railway portion of this collection was catalogued in a book entitled *Katalog der August Ritter von Loersche Sammlung von Eisenbahngeld und Eisenbahn-Medaillen in Des Eisenbahnmuseum zu Wien*. I have had one of these books for some fifteen years. From time to time I notice that various European book dealers advertise copies of this book, usually at a price now about \$8.00 U.S., which is expensive for a 62-page book without pictures and in the German language. I am glad that Mr. Bingen was finally able to visit the museum and get rubbings for the A.V.A. of the transportation items in the museum.

The following is a rough breakdown of what is catalogued in the 62-page book. From page 19 to the end of the catalogue are only listed railroad associated commemoratives and medals issued before 1900. In the 1950's in some special Fare Box foreign supplements I listed railroad commemoratives and covered most of those issued before 1925. Perhaps some day these sheets can be updated and reissued in The Fare Box when John Coffee runs out of other material. Pages 15,16,17,18, list 45 different Australian Railway metal passes, mostly the gold passes used by Parliamentary and ranking officials. Count von Loersche in the late 1890's was able to obtain this set of passes from the Australian government under the condition that all the passes were to go to the museum. Pages 9 and 10 list from Russia 25 gold, one brass, and one copper railway passes that Count von Loersche was able to obtain from his Russian relatives in the nobility in the 1890's. Pages 2 to 7 consist of 124 railroad dining checks, railroad restaurant checks, and like non-ride material from the Austria-Hungary Empire. As this Empire was split up into many countries after World War I these would appear in the new railroad catalogue under Austria, Hungary, Czechoslovakia, etc. From pages 7 to 14 there are listed many railroad non-transportation items and some transportation fare items.

As he gave his collection to the museum, this helps to date the usage of the following transportation tokens as being in use prior to 1900:

(1) Belgium - 2 RR items. (2) Germany 390 A, 485 A B C, 355 D but in brass, 340 F, 495 A, 845 A, 790 A B, and 7 RR items. (3) England 475 A, a Dublin and Drogheda RR pass, a Dowlais Iron Co. RR pass in copper, and 3 RR items. (4) Sweden 160 A, 820 KB KH, 870 G and 6 RR items. (5) Switzerland 360 A C D E F G H (and six 360 I with different numbers), 420 A B and 2 RR items. (6) Congo - a railroad pass. (7) United States, Mich 225 A; Pa 750 N; NY 630 D O, 780 B; Ky 510 AA; Cal 575 A; England 475 PE and a token like the Hartlepoons but 24mm and in copper. (8) Canada Quebec 620 M. (9) Brazil three railroad items. (10) Bolivia, 2 railroad items. (11) Argentina 160 A B C D E. (12) Peru 480 A B C D and in error Mexico 600 A, and Uruguay 460 G. (13) Guatemala in error, Uruguay 460 D. (14) Mexico 520 B C D. (15) Paraguay 80 A. (16) Ecuador 360 A. (17) Cuba 480 B C. (18) Costa Rica 760 A C E. (19) Chile 180 B, 420 C F H, 680 F G, 920 A B D. (20) Venezuela 220 A B C.

Most of these railroad listings will probably not appear in the world supplements but will be included in the book *Railroad Tokens, Metal Passes and Commemoratives*, referred to in the October 1974 issue of The Fare Box on page 144.

= NEW FINDS =

Lou Sutton heads the list this month with the find of Tex 340 A, the extremely rare Park Street Line token, which he got from someone who found it in a dealer's junk box! He also recently acquired Va 580 C and Mich 590 B.

Donald Capper writes from England that an auction last November held by a London coin dealer realized some interesting prices for early English horse omnibus tokens: John Phillips of Liverpool, \$44; Sheffield & Heeley, \$32; John Menzies 2d of Glasgow, \$25; John Greenwood of Manchester, \$17 in VF and \$13 in F. Don says the only one he picked up himself was a Birkenhead Woodside Ferry Annual Contractor Ticket of 1864 at a \$35.00 price, for which he swapped an early British coin.

(Millard)(possibly Newburg, Beaverton, Hillsboro. or
Forest Grove, Ore.)
P.V. OIL CO. AQUA BLAST
62 A 23 Sd (blank)(obv. silver lettering, blue background)

Listed this month is a two-year accumulation of UNIDENTIFIED car wash tokens. I have noted where they were found when this information was reported. This might be helpful in locating the proper city of issue, and I appreciate this kind of information.

Listed below are tokens struck by Meyer & Wenthe. The records that Feisel researched lacked the city of origin. Can anyone help me locate these issues?

- 1 COOLEY'S GAS STATION COR. MIAMI & LIBERTY
- 2 BOB'S SOFSPRA CAR WASH CORNER: EASTERDAY & SEYMORE
- 3 SOFSPRA GREENBROOK TOWNSHIP NEXT TO TINY TOTS
- 4 SOFSPRA NEXT TO TODDLE HOUSE UNIV. DR.
- 5 CAHILL'S SOFSPRA CAR WASH
- 6 MOJAVE COIN-OP LAUNDER-ALL

One thru five are the Sofspira type. Six is a Meter-All Dallas Texas type and may be from Calif.

Corrections to listings that appeared in the first supplement (Jan. 1975) and the second supplement (Oct. 1975)

Calif. 645 A address should read: 421 Petaluma Blvd So.
Alberta 250 R add to obv. inscription: AO (1 slot)
800 A add: (INCUSE) to obv. listing
Ill. 762 A correct Hapton to read: HAMPTON
Mich 65 D E F will be listed in next supplement

Harold V. Ford 6641 Saroni Dr. Oakland, CA 94611

* 1011 B Pr 38 Sd Collector of Transportation Tokens (streetcar, type 2)

(The above token is listed out of order)

Mintage figures on earlier issues: 305 F,G,H,I,J, 200 each; K, 1000; L,M,N, 500 each; O,P, 50 each; 1111 A, 500; B,C, 200 each; D 15 thin and 200 thick.

The above Supplement is to a booklet issued in 1975 which lists all Personal Tokens issued by past and present members of the A.V.A. Copies of the 20-page printed booklet are available for only \$1.00 postpaid from the Editor of The Fare Box. The first supplement appeared in the November 1975 issue of The Fare Box.

= ONCE AGAIN NORWAY =

By F.J. Bingen

Family affairs, and afterwards an illness of some months from which I am still not fully recovered, prevented an earlier study by me of Mr. Smith's Supplement on Norwegian transportation tokens on page 168 of the 1974 Fare Box. From this Supplement I see there seems to be some misunderstanding about the article compiled by the late Mr. Hazevoet and myself, published in the April 1971 Fare Box, page 50ff. Only the tokens marked "S-H Number" were taken from Mr. Støren and Mr. Holst's book on the products of Ivan Throndsen. The other reported tokens were seen by Mr. Hazevoet in a considerable collection of Norwegian tokens. The Støren and Holst book therefore is not responsible for the "many minor errors," but these errors result from our sloppy work and we are fully responsible for it. Nevertheless I feel it my duty to go on as I did before and I start with giving some remarks on the above mentioned supplement.

OSLO 600 R. As I already stated in our article the name DAVID ANDERSEN KRISTIAN-IA is the manufacturer's name. An earlier issue bears the name: *New York Stempel Fabrik Graveringsforretning Christiania*. I can understand that this variety will not be listed in the World Token Catalogue. Hazevoet has only seen this token in a Norwegian collection. However I have some faith in his accuracy.

PORSGRUNN 640 RA. This square token was reported by me with the size of 16mm. In this supplement the size is altered to 21mm. I am very sorry, but Støren and Holst picture this token with the measurements of 16mm and the token in my collection is also 16mm from side to side. I earnestly doubt there is a 21mm token, but I presume there was either a misreading in the measuring of this item or the measure was taken from corner to corner (indeed slightly over 21mm). It does make it confusing for our readers.

UNKNOWN 998. This ferry token was already listed in 1967 on a report of our old friend Joe Sa'ar, who certainly sent a rubbing to the cataloguer, as he did to me. In the August 1967 Fare Box, page 115, this listing can be found and the token also is mentioned in our article. It's a pity that our cataloguer did not look at this earlier listing, otherwise he would have known that the token is made of white metal and that its size is 24mm. The value is 5 Øre. A description of the obverse as is given now (no other token in the whole catalogue is so carefully described as this one) is to my opinion with the excellent photographs absolutely superfluous!

?????

A.V.A. member John McKay-Clements, a prominent Ontario numismatist and columnist, recently resigned as Mayor of the City of Haileybury, Ontario.

= NOTES BY RALPH FREIBERG =

The Florida Dept. of Transportation tokens, if and when they are used, could be from any city in the state, so I am listing them under this heading. There have been various rumors about these tokens, and their use seems to be involved with a State experiment to use small buses to see if a small bus system would be wise. The State would experiment with a system for about six months, and if successful then the operation would be turned over to the city in question and then tried somewhere else. I tried to find out about this experiment back in 1971, as you will note if you check page 56 of the April, 1971, Fare Box. But apparently no one was able to find anything about it. I did see somewhere that a 10¢ fare or 3 tokens for 25¢ was in use, but never could come up with anything. Recently we learned that the Dept. of Transportation had these tokens in storage, and if they have another experiment, the tokens will be hauled out and used again and we would then have a chance to get some. But meantime we can't get any. If anyone learns about any new bus experiments in Florida thru a newspaper clipping, or otherwise, please let me know!

Al Craig learned about the new system in Fort Lauderdale. They agreed to sell us a quantity, and the tokens have now arrived in Oakland. The token went into use last

July, and Al Craig learned about it when he was on a trip to Florida.

Joel Reznick learned about the Springfield token when we got the ones from Macomb, Ill. He found one of these Springfield ones mixed in with the others. So he called the place in question and they said they would send more. But Joel is still sitting and waiting for them. The man says he did send them and they were lost in the mail, but more are promised, eventually. The token was used by Everist Transportation Co. for a 20¢ fare from Fall 1968 thru 1972.

Next a token reported to me by Max Schwartz at the Los Angeles Convention. He sold some of these to collectors present at the Convention. But when I wrote the company I was unable to get an answer, probably because the whole business is quite complicated. So we put Joel Reznick onto it, and our AVA President, after calling a lot of people, found the right one and we were able to get them for our New Issues Service. It seems that back in 1965 they wanted to differentiate between students who lived less than 1½ miles from school so they could get a lower rate. So they had 25,000 tokens dyed black, and later a second batch of 25,000 were also dyed black. The unplated WM tokens are good for fare of over 1½ miles from school. But since they had a lot of trouble getting their tokens dyed, they inquired elsewhere and discovered that it would be just as cheap to get new bronze tokens made, in 1972. So they ordered new bronze tokens in 1972, and this is another case where the Meyer & Wenthe records helped a lot. So we got a supply of the black dyed tokens and the new bronze ones. As the tokens were dyed back in 1965, there were some steel ones among them, but very few so N.I.S. won't be able to send these out. As there is also a possibility of some brass ones showing up dyed black I'm leaving a space in the listings. However please don't foist a bronze token dyed black on us! The bronze were made in 1972 and the dyed ones in 1965, so that would not be possible.

Other information about Albany: The 10 A B C D are now obsolete; E and F are used for school fares of over 1.5 miles. O and R for fares of less than 1.5 miles, and 10 N for senior citizens. As for older tokens we also inquired if any of the 10 K and L ever showed up, but no luck. However Joel was told the line known as the Bohl Line, not the Rohl line. A case of our not being able to read a signature on a token. In the next catalogue we'll use "facsimile signature" in place of "name in script" as we do now. Makes it clearer what we mean.

Also at the L.A. Convention Mr. Schwartz had some plated tokens of Troy, NY, but I've learned that these were not placed by the company in Troy at all, so we shall not list them. But I did find out that back around 1962 many of the WM Albany tokens were showing up in Troy fare boxes, so they took their own tokens and painted them yellow! This went unnoticed by collectors, but one has now turned up and listing now becomes necessary. Then later they took some WM tokens and copper-plated them, this being our NY 890 G, and then they needed more tokens and ordered them in solid bronze, and this also is listed (and scarce). They they discontinued tokens and about six months ago they took all their tokens and buried them, so now all Troy tokens are obsolete, and the company has been taken over by the new Capital District Transit of Albany. At the Convention Mr. Schwartz had a number of what appeared to be bronze Troy tokens that were oxidized or dyed black. And as the bronze token was so scarce I urged them to buy the token. It turned out, unfortunately, in most cases to be the WM token bronze-plated and then dyed black. So if you got one of these at L.A. and think you have a bronze token under a black dyeing, file it deep, and you probably will be disappointed.

The Bristol token could be called from Tennessee or Virginia as Bristol is in both states. We learned of this one from Duane Feisel who had seen a sample of it at Meyer & Wenthe. We finally tracked it down and found that it was from Bristol. Unfortunately there's no chance of our getting a supply of these for N.I.S., though they did imply that if they ordered more of them they'd let us know and then sell us some. However a couple people have obtained the token by sending a buck +SAE to City Bus System - 1000 Rhode Island Ave. - Bristol, VA 24201. But don't blame us if you lose the buck. Interesting token because it has the old type #2 bus on it.

The Onalaska, WI, tokens were made back in 1962 when there was an arrangement with the bus system to carry its students. We learned of this from M&W records, but all tokens have long since disappeared. About 6 have shown up so far so it's a scarce one, but it's possible a lot of them are still in town there so don't go over-

board and pay a lot of money for one. This is one time when "ten times catalogue" would be extreme, but I do think it's worth two bucks anyway, which is what we put down for it.

Here is an interesting mystery. In 1924, according to Meyer & Wenthe records, Atlanta Safety Bus Company of Atlanta, GA, ordered some 23mm WM tokens and some 23mm bronze (or copper) tokens. We've never seen any tokens with this firm's name on them, but some members of the Catalogue Committee think that Unidentified #4 and #5 are the tokens in question, Crosstown Express, as they fit the bill except for the name, and often companies would put something different on their tokens from their official name. But no way to prove it until someone checks this old firm out.

Another mystery token is one for Holiday Lakes, a .615 token. A .615 token would be a 16mm token, although we listed such a .615 token as 15mm under Mobile, AL. A couple Holiday Lakes tokens were struck as patterns with "good for one fare" on the reverse and this is what caused all the trouble. They were actually ordered with blank reverse. We have learned that this was a locker token with nothing to do with transportation.

As time goes by I'll list some other mysteries that have come out of the M&W records. Some we know were ordered but no one has ever seen any

We have more new issues pending, but it seems these days that it can take months before you get any answer from the companies that issue them. In the good old days we'd write, get the tokens in two weeks, and have them in the mail to NIS subscribers within the month. But no more!

= FEBRUARY NEW ISSUES SERVICE REPORT =

By John G. Nicolosi

First of all let me apologize for the delay in sending you the January new issues. As is often the case we were promised the tokens, mailed our check, but then heard nothing. In this case Joel Reznick came to our rescue, cut through the red tape, and we got the tokens. So we don't list to list a token or promise it until we actually have them right here in front of us.

Anyway we had expected to send you more tokens this month, but as I stated we just have to sit and wait these companies out, with patience. Meanwhile I do have three to send you this month: Fla 260 A, and NY 10 O and R. Sorry I cannot furnish 10 P.

Again our thanks to Joel Reznick, our active AVA President, for his aid in obtaining the above tokens. So as it now stands all NIS members, regular & associate, will receive the foregoing three tokens. I hope that by the March issue of The Fare Box I'll have more to send you

I regret a mistake in my ad last month. I typed OH 535 instead of 565, which would have meant a lot for the 35¢ price I asked.

Welcome this month to NIS Associate Membership to Robert Spencer of Golden, CO.

= HANNOVER (GERMANY) =

In Smith's Catalogue of World Transportation Tokens there is listed under number 392 A an aluminum token from Hannover with the obverse HANNOVER STRASSENBAHN and on the reverse GUT FÜR 1 FAHRT. This token was not listed in the earlier foreign check lists, and neither did it appear in a supplement to the last F.C.L. As German collectors are questioning the existence of this item, I request the owner(s) of this Hanoverian transportation token to be so kind as to send me a rubbing of it, just to convince our German colleagues. Many thanks.

F.J. Bingen - Tollensstraat 11 - Capelle a/d IJssel, Netherlands

GREENVILLE, TEXAS 400 Aa (ornaments) 50¢ each; 400 Ab (no ornaments) \$3 each; first come, first served, basis. Have only 4 of 400 Ab.

Volume 30, Number 3

MARCH, 1976

Our 345th Issue

March 30. Together with this issue we are sending you a reservation card for the Bel Air Hilton Hotel in St. Louis, site of the 1976 A.V.A. Convention. The Convention will be held August 13,14,15, but you should make your hotel reservations as soon as possible if you plan to attend. Inside this issue there is more information about the Convention and pre-registration.

Our IBM Selectric typewriter broke down this week, with the result that most of this issue had to be typed on our big IBM Executive typewriter. The repair man came yesterday and fixed the Selectric, so I was able to do the ads and Foreign Supplement and front page on this machine, which is much easier to operate.

Members who attended the Los Angeles Convention last August remember the Ramada Inn/Airport, where we met. It was a splendid hotel and we were treated royally. The food was excellent and the help were friendly. On Tuesday, March 9, the place was destroyed by fire in such a holocaust that one person died and dozens were injured. The fire was shown on national TV that night, and the news was distressing to all of us who had such a wonderful time at last year's A.V.A. Convention.

By now all members should have received their free copy of *A Quarter Century Index to The Fare Box 1947-1973*, which was prepared by Paul & Susan Cunningham. It is a beautiful printed booklet, and its free distribution to all members was made possible because of profits from the sale of our Atwood Catalogue. With the aid of this booklet you will find a wealth of knowledge about transportation tokens available as quick reference with your back issues of THE FARE BOX. The book will be sold for 75¢ per copy postpaid hereafter. Speaking of back issues, the Editor has some 100 different available at 40¢ apiece postpaid (3rd class mail) if anyone would like a selection. I have no list of the ones available. If you want some, tell me what you already have and I'll send you different ones from our stock.

Mr. L.C. Hough of England has sent a large selection of British tickets and transfers for free distribution to any A.V.A. members who would like a selection of them. Many are nice re-usable stiff ferry tickets. If you want some, simply send a stamped addressed envelope to Don Mazeau - 9 Settlers Lane - Clinton, CT 06413.

Hal Ford has just reported to me about Duane Feisel's *Jamboree West* for token collectors held at San Jose, CA, on March 26-28. Harold reports there was a Hawaiian collector present with six specimens of Haw 210 A for sale at \$65 each. His six took it off census, and there were no takers at his price. Also noted at the Jamboree were two specimens of Tenn 430 F, so now it's nearly off census. But Harold picked up a couple of good ones: Ala 800 B and Mo 430 A.

= THE ST. LOUIS CONVENTION: AUGUST 13-15, 1976 =

Fellow vecturists! I need your earliest cooperation on this convention. Since the banquet and tour will take place on Friday evening, August 13, and Registration is at 9:00 A.M. that morning, it is imperative that you register as much in advance as possible, to allow us to make the proper accommodations available for that evening.

I cannot guarantee a place for you or your guests unless you register in advance. Now I am referring here to Convention Registration, not hotel registration. You should also take care of the latter by mailing in the enclosed registration card directly to the hotel. But you should also register for the Convention directly to me. Registration fee prior to July 15 will be \$13.50. After July 15 it will be \$15.00. The registration fee, as you know, is necessary to pay the expenses of the convention. The AVA has no big cushion of money, as other societies have, to cover these costs. We pay as we go.

This looks as if it will be a most unusual and enjoyable convention. Please plan to be with us.

For your registration fee, make the check payable to the American Vecturist Assn., and send it directly to Joel J. Reznick - 120 South LaSalle Street - Chicago, IL 60603.

Incidentally, we still need tokens for the Convention Auction. Please make sure they are put up in 2x2 see-thru's and properly identified. Regards!

- Joel Reznick, Conv. Chairman.

= A RECENTLY DISCOVERED AUSTRIAN TRANSPORTATION TOKEN =

By F.J. Bingen

In a German collection I recently found two square transportation tokens that were used in the old Austrian town of Teschen.

Teschen, the capital of the former principality of that name and one of the dominant towns of the Austrian part of Silesia, some 15 km. from the northern frontier of the old Austrian-Hungarian Empire and about 20 km. to the southwest of Ostrawa, was situated on both sides of the River Olsa, a confluent of the Oder. During World War I the Austrian army had its headquarters in this town in the palace of Archduke Frederick. After the war, this part of Austria was divided between Czechoslovakia and Poland. As the Olsa became the boundary line between these two countries, Teschen was cut into two parts. The western outskirts with the railway station on the left bank of the Olsa were assigned to Czechoslovakia and are now the town of Cesky-Tessin. The old town itself on the right bank of the Olsa forms now part of Poland and is called Cieszyn. It has become an industrial town of some importance.

In the old Teschen a strassenbahn operated, which connected the railway station situated on the left bank of the Olsa, with the town itself. It was on this street railway that two tokens of a quite uncommon type were used. Their description follows:

STÄDTISCHE STRASSEN- BAHN TESCHEN

A o B Sq Sd Giltig Für 6 Heller (16mm)
B o A Sq Sd Giltig Für 12 Heller (20mm)

The following is a list of those who had not renewed AVA membership as of March 8:
G. Fuld, I. Gould, J. Brown, Reidling, Sellards, Atkinson, Dellinger, Strong, Blomberg, Corson, Wischstadt, Pfluger, Flood, Mrs. Arnold, Kobetitsch, Hopchak, Sullivan, Coleman, Chat-ham, McAllister, Bracikoski, Rodgers, Lyons, Elman, Blevins, Edgecomb, P. Anderson, Schwickrath, Rowden, Raby, F. Miller, Kramer, E. Wolf, Gleichmann, Hyde, Borden, Fischer, Cooper, Sparkman, Blystone, Lunan, Mendez, Hemry. If you know any of them, please let them know we don't want to lose them.

= MR. TOMBERLIN'S TOKENS =

By J. M. Coffee

There are a number of tokens listed in Atwood which exist because some collector suggested them to a transit operator, often even arranging to have them struck. For instance, Ky 45 C was born because a collector suggested tokens to the ferry owner. IL 370 B, C, and 600 D, were used because I suggested them to the man who owned both ferries. The same is true of the Brattleboro, Vt., AVA tokens. There are several others.

But no one has come close to the record number of tokens which were arranged for by E. L. Tomberlin, formerly AVA #1076. Mr. Tomberlin resigned his membership at the end of 1975, but we hope he will return to us. His interest in transit history is venerable. Back in the early 1950's he was instrumental in locating several of our Unidentified tokens, such as Ky 10 B. Occasionally he was wrong, as when he attributed the Terhune's Yellow Bus token to Watertown, SD, when actually it was used at Scottsbluff, Nebraska. But generally Mr. Tomberlin was right on the mark. He was a driver of the Airport Bus, which operated from the Oakland (California) International Airport to downtown Oakland and San Francisco, until reduced patronage forced the company to reduce its staff a few months back.

In any event, a few years back, E. L. (I never did know what the initials stood for) became agent for a Minneapolis token manufacturer, which was at the time known as Wendell-Northwestern. Frequent advertisements were run in The Fare Box by E. L. offering to make inexpensive personal tokens for collectors. At the same time, or perhaps a bit later, E. L. decided to see if he could interest various transportation firms to order tokens through him. His first target was the amusement ride companies, operators of little railroads and merry-go-rounds around the country. What he would do is this: he would write the owner of the miniature railroad and offer to send him a quantity of tokens, usually a couple hundred, with the name of the miniature railroad on them. The owner of the little railroad was asked to give instructions as to wording, shape, metal, etc. I believe the owner was also asked to place the tokens in use. Many of these operators took advantage of this free offer. Of course, Mr. Tomberlin hoped that the free tokens would generate further orders, which they hardly ever did, unfortunately. Meanwhile, E. L. also struck an additional quantity for Nicolosi's New Issues Service, which were made available at a nominal cost, so that AVA members could also add these tokens to their collections at very small cost.

Later Mr. Tomberlin also became agent for a firm that manufactured plastic tokens, and he then wrote taxicab companies all over the country offering them free quantities of such plastic tokens, inscribed with their names. Many taxi companies also took advantage of this free offer. Extra tokens were struck, again, for the New Issues Service so that we could add them to our collections at nominal cost.

The result of this interesting activity is that we now have 93 different tokens listed in Atwood (in the Supplements; none made the 1970 edition) which were generated by E. L. Tomberlin. So that a record of his issues may be preserved, here are the catalogue numbers of Mr. Tomberlin's tokens:

ALASKA 1000 A B C D; ARK 1000 A; CALIF 700 A B, 703 A B, 805 B (plus an error), 997 H I, 998 F, 1000 C D E F J K L M O P Q R S T U V W X, plus Fantasies for Main Street Taxi and Downtown Cab Co.; CONN 1000 A; FLA 620 A B; IND 710 A B, 1000 A B; KANS 360 A; MAINE 1000 A C; MASS 998 K, 1000 A B; MINN 540 AH, 865 A B; MO 360 A B; NEB 440 J K, Nebraska Timetable AD; NH 1000 A B; NJ 1000 A B C; NC 1000 B; ORE 270 A B, 475 A B; PA 95 A B; SC 1000 A B; SD 600 A B; TENN 1000 A B; TEX 1000 J; VT 1000 A; VA 1000 A B C D; WIS 360 L M N O, 970 A B; British Columbia 1000 B; Ontario 865 A B.

Many of these are listed under the Miscellaneous heading, chiefly the taxi tokens which are good "toward" taxi fare, and which obviously would be used to serve as giveaways. Unfortunately also some of those given regular listings were also not used, how many we have no way of knowing. But, for instance, the Cal 700 A B were not used. The Castro Point Railway only operates two or three days out of the year, and when it does all of its rides are free. So

there seems no legitimate way that tokens could have been used on a line that charges no fare. This has probably been the fare of a number of Mr. Tomberlin's tokens: at best they have been sold at the souvenir stand connected with the operation; at worst just thrown in a drawer.

Inasmuch as the operators did ask for the tokens, an argument may be made to justify listing them, although some believe that a Pattern listing would be more appropriate in the case of those which are known never to have been used. In any event, no one was held up to pay for them; the price at which they were offered to collectors was nominal. I, for one, am glad I have all of them.

E. L. indicates that he will be back making more tokens before long. Nick's New Issues Service won't handle them any longer because some collectors have complained at the plethora of the things. Nevertheless I intend to get one of everything he makes, because the cost is of no importance, and they have an interesting story to tell. Some day, I suspect, few and fortunate will be the collectors who own a complete set of Mr. Tomberlin's tokens.

= THE ATLANTA, NEBRASKA, EXCHANGE BUS TOKEN =

If you look Atlanta, Neb., up in a population guide you will discover that its present population is 107, hardly a community of sufficient size to justify a bus line! Yet George Hosek found a red fibre token inscribed with ATLANTA NEBRASKA on one side, and EXCHANGE BUS on the other side. As the token is made of fibre is obviously dates from World War II.

George did some investigating. What he learned was fascinating. Seems that a large prisoner-of-war camp was located at Atlanta during the War, with as many as 4,500 German war prisoners living behind the barbed wire, along with 600 U. S. military personnel and 130 civilian personnel. Atlanta was one of some fifteen prisoner-of-war camps in Nebraska and neighboring states, and Atlanta was the headquarters camp of the whole system. The Atlanta Camp was quite a large operation, with its own bakery and fire department. It raised its own food and livestock, had its own hospital, and a 60-vehicle motor pool plus a large stable of horses. Prisoners were treated quite well. They were permitted to work for hire at surrounding farms, they could take correspondence courses at U. S. colleges and earn degrees, and study in the large camp library. They were even paid for working on the prison farm to raise their own food. There are no instances of escape attempts. Indeed some of the German prisoners went out of their way to surrender to U. S. forces during the last stages of the war.

Because the closest town of any consequence was Holdrege (Atlanta being only a wide place in the road), the employees at the camp needed some sort of public transportation to take them to Holdrege. This was provided by Sawyer's Sand & Gravel Company, which operated a single bus between the Camp at Atlanta, and Holdrege, a distance of about 7 miles. We don't know what the fare was, but apparently a number of employees lived in Holdrege and rode the bus out in the morning and back at night to Holdrege, and for these regular commuters there was a round-trip fare. You paid the round-trip fare in the morning, and were given one of these tokens for the return fare at night.

George Hosek has left no stone uncovered in attempts to find more of these tokens. No one in Atlanta has any. The owner of the Sand & Gravel Co. is dead, and so is the man who drove the bus. Large display ads were run in local newspapers! All to no avail. Obviously only a small quantity of the tokens were made, and most of these were destroyed after the Camp was closed at the end of 1945.

Today all that remains of the camp is the water standpipe and a lot of cement slabs. The site is dominated by the huge tower and transmitter of the Educational Television Channel 3, surrounded by a corn field.

Tokens have stories to tell, and few are more interesting than the story behind this one. It's a shame that the token is so rare because this is one we'd like to show off and tell about. George was lucky to find it, and we congratulate him!

= TOKENS OF THE LONGVIEW-RAINIER BRIDGE =

The tokens of the mighty Columbia River would make a fascinating study in themselves. There are bridge and ferry tokens which have been used to cross the river, and many of the communities along its banks have used tokens. One of the many bridges which span the Columbia is the Longview-Rainier Bridge, which connects Longview, Washington, with Rainier, Oregon. Until October 19, 1965, tolls were charged to cross this bridge.

But in the West they have the quaint notion--quaint to easterners at any rate--of ending tolls once the bridge has been paid for. Out in the wide open spaces there is a natural aversion to tolls, and there is not a single toll highway in any of the eleven western states.

So when sufficient money had been collected in tolls by the Longview-Rainier Bridge, they stopped charging tolls. And the end of tolls was such a happy occasion to the local citizens that they commemorated the occasion by issuing tokens! But not tokens to pay tolls. Tokens were presented to people who drove over the bridge during the first week of freedom from tolls!

Clarence Heppner gave me a pair of these tokens some time ago. I know some of our Washington and Oregon token collectors have these, but generally speaking they are quite scarce. They are not, of course, transportation fare tokens. But certainly they are an interesting addition to any collection of bridge toll tokens. They are printed in black letters on round white cardboard, and they come both thick and thin. I have one of each, thanks to the generosity of Hepp, so I'll affix them here and they should show up well on a stencil run thru our electronic stencil maker. The obverse of one and the reverse of the other will give you a full view of the token.

= NEW FINDS =

Not too much to report this month in the way of new finds. However, Virginia King hit the jackpot at a flea market in Indiana. There, for a total of \$6, she bought a batch of some 30 tokens including a number of scarce items, plus one of the most desirable tokens in Atwood: Wis 910 A, with a picture of a big old fashioned hotel hack on the reverse! We have a photo of the obverse on page 22 of Atwood (Nicolosi's token), but we lost the reverse photo so couldn't include it. The pictured hack is like that on ILL 350 A (pictured on page 156 of Atwood), but much larger on the Viroqua token. Talk about luck! I had been looking for that kind of depotels for the past 15 years.

Finally, Frank Beam sent a little stranger from Spain. It's bronze, 25mm, inscribed COOPERATIVA EMPLEADOS F. C. SARRIA on obverse with a picture of an ancient locomotive. On reverse it simply says 5 CENTIMOS. It means "Employees' Cooperative of the Sarria Railroad." Sarria is in Spain. But what it was used for is a mystery. Any ideas?

= WOODEN NICKELS: GOOD FOR 25¢ RIDE IN A YELLOW CAB =

By Kenneth E. Smith

About ten years ago wooden nickels inscribed as in the title above were reported, and listed as from Dayton, Ohio. It was discovered shortly thereafter, however, that they were not from Dayton, and they were then marked down as manufacturers' fakes. In 1970 I accumulated about 20 of each of these wooden nickels with reverses WB and WF (see list of reverse types of transportation wooden nickels on page 156 of the November 1975 Fare Box). I had obtained them from a party who said they were used in Texarkana, TX. I wrote the company in Texarkana and received a short reply from Bill Flatte of the Yellow Cab Company (317 Main Street) saying that he had not used these tokens for years. I then wrote our AVA member Bill Riley in Texarkana asking him to see if he could get more information. I quote below from his reply written November 22, 1970, after he visited the company and acquired considerably more information:

"I had a chance to visit the Yellow Cab Co. yesterday and talked to the owner, Mr. Bill Flatte. He remembered a letter from California about these wooden nickels, but he did not say why he didn't give you the information you had requested. Mr. Flatte acquired the 3-cab Yellow Cab operation in the early 1950's, eventually expanding it to 9 units. A sometime coin collector who was interested primarily in Buffalo Nickels, Mr. Flatte had a Fort Worth Novelty house make up an order of 1,000 of these wooden nickels, half the reverses to be Indian heads and the other half to be buffaloes. All bore the same slogan, "Good For 25¢ Ride in a Yellow Cab". At that time the cabs were meter-equipped, and began registering at 25¢, but the flag was not thrown until the cab passed a certain street boundary in each direction, usually about ten city blocks. Therefore the 25¢ token was good for most downtown trips. These wooden nickels were given to passengers by the drivers. Some were given to the Chamber of Commerce for distribution to visitors; some were given out through downtown hotel desks, and train depot agents, or handed out at fairs, carnivals, and the like. The object was to stimulate business and publicize the Yellow Cabs in the face of increasing competition. They were first distributed early in 1956, and continued on and off for about a year, at which time the owner decided the use of the tokens was causing some losses in revenue, and it was not worth continuing.

"All remaining undistributed tokens, about 500 to 600, were burned. The company has no more of the tokens now, and neither does the owner. Mr. Flatte still operates the Yellow Cabs, and has since acquired the Black & White Cab Company. With a 45¢ minimum flag down (in November 1970), the days of free ride gimmicks are obviously gone."

We are grateful to AVA member Bill Riley for the foregoing detailed information. The status of the wooden nickels appears to be as follows:

GOOD FOR 25¢ RIDE IN A YELLOW CAB (3 LARGE DOTS BELOW)

WAO W 38 Sd	(Reverse WB)(original issue)
WBO W 38 Sd	(Reverse WF)(original issue)
WCO W 38 Sd	(Reverse WD)(manufacturer's restrike)
WDO W 38 Sd	(Reverse WP)(Sv-plated both sides)(manufacturer's restrike)

The Editor regrets to report that Bernard Keith, AVA #485, of 18440 Fielding Avenue - Detroit, MI 48219, has been quite ill and has undergone rather serious surgery. Bernard is one of my old friends, and my personal affection for him is shared by scores of other members. When he received the February Fare Box he specifically asked his wife to write me just to say how much appreciates each issue! Our prayers and our best wishes are for his speedy and complete recovery.

= THE ST. LAWRENCE RIVER STEAMBOAT MEDALS = By Barry Uman

From the middle 1800's to the early 1900's entertainment in Montreal was provided in a very limited way, as there were no cinemas, organized sports or theater. One of the favourite means of entertainment was to take a daring ride by steamboat down the St. Lawrence River, through the Lachine Rapids between the City of Lachine and the Indian Reservation of Caughnawaga. This trip was a thrilling ride, cutting through the choppy waters to avoid being smashed to pieces on the many hazardous rocks. An experienced captain was required to steer his boat to safety amongst these many obstacles.

The pilots on these steamboats were Iroquois Indians from Caughnawaga, who knew these rapids like the back of their hands. For many generations none but the Indians knew how to guide the steamboats through the Lachine Rapids. Some even challenged the rapids by canoeing through this inferno without regard to their own lives or their unfortunate passengers.

When the Indian pilot came aboard dressed in full regalia, it added a dramatic excitement to the voyage. As the steamboat approached Caughnawaga, just before the rapids, a signal would be flashed and immediately an Indian would dart out from the slope in a canoe and board the steamboat. In later years when the pilots were other than Indian, the same ceremony was duplicated so as not to disappoint the passengers, and to reassure them of a safe voyage. After the trip the Indian would sell souvenir pictures, for that was his only payment.

The first regular passenger service to run down the Lachine Rapids was undertaken by the Richelieu & Ontario Navigation Company, predecessors of the Canada Steamship Lines. When the Prince of Wales, Queen Victoria's heir, came to Montreal in 1860 to open the Victoria Bridge, he was treated to a trip through the Lachine Rapids on the steamboat "Kingston."

One of the strangest excursions took place on New Year's Day, 1878, because of the lack of snow and ice on the river. The steamboat "Longueuil" with a brass band on her deck made a special excursion to Boucherville, which is located southeast of Montreal on the St. Lawrence River. As most any Canadian knows, winters in Montreal are long and severe. Almost all rivers are frozen, which makes any water transportation just about impossible. This mystery can be solved by looking into the weather records of that year or in this case, a recorded adventure on one of these steamboats. Evidently there were a number of years during this period when Montreal experienced some very mild winters and, therefore, the St. Lawrence River never completely froze over.

A few interesting medals were struck to commemorate these excursions along the St. Lawrence and through the Lachine Rapids. Atwood, Bowman, Breton and Leroux, list a number of these medals in their books. There are three main types of medals, all made of pewter, some of bronze and copper, and a lesser amount in silver, lead, tin, etc. Generally in order of value, the pewter are common, the bronze and copper are scarce, and the silver and other metals are rarest.

There are a number of interesting varieties that exist of these medals. They vary as to thickness, absence of loop, small hole if any, composition of metal, manufacturer's name, counterstamps, and there is even one variety in which the medal was struck previously with a different die and later restruck. The following is a listing of the various types:

- | | |
|--------------|--|
| Type I: | EN MEMOIRE D'UNE EXCURSION SUR LE ST. LAURENT. VAPEUR |
| all 29mm | LONEUEUIL MONTREAL 1er. JAN. 1878 (STEAMBOAT) |
| Struck in | To Celebrate an Excursion on the St. Lawrence 1st. January 1878 |
| many metals. | <ol style="list-style-type: none"> 1. Having a loop on a thin planchet 2. Having no loop, on a thin planchet 3. Having no loop, on a thick planchet 4. Having a loop on a medium planchet, struck over another medal (Leroux 1500) |

Type II:
all 37mm
Struck in
many metals.

PLEASURE TRIP ON THE ST. LAWRENCE PER STEAMER LONGUEUIL
CAPT. G. DUVAL JANUARY 1st 1882 LYMBURNER MONTREAL
(STEAMBOAT)

Compagnie de Navigation de Longueuil Voyage de Plaisir
1er Janvier 1882 Ovide Dufresne Gerant

1. Having a small hole above the steamboat.
2. Having no hole above the steamboat.

Type III:
34mm
Struck in a
few metals.

SOUVENIR OF A TRIP DOWN ST. LAWRENCE RIVER RAPIDS CORSICAN
(STEAMBOAT GOING THROUGH RAPIDS)

Montreal C. Tison (View of Montreal and harbour)

1. Same as description.
2. Same as #1 but counterstamped 1893 on obverse.
3. Same as #2 but counterstamped CE (Christian Endeavor) on Reverse
4. Same as #1 but counterstamped CE on Reverse.
5. Same as reverse of #1, but obverse differs, "From Lachine to Montreal Spartan (steamboat)"
6. Same as obverse of #1, but reverse differs, "Montreal Fondee en 1642. A. Desroches Numismate Montreal Appel aux Armes 1752-1812 1837-1866-1885 (Beaver on branch)"

The reverse of Type III has been muled with other dies. Type III (6) is muled with Leroux 985. There are no doubt many other varieties of these three types, I would be grateful for any information as to new varieties or types that I have not listed.

= PRICES REALIZED IN THE FEBRUARY ATKINS AUCTION =

Calif 999 B	\$12.00	Va 620 S	\$8.00	CA fantasy 3	\$9.77
ILL 155 A	5.77	Va 720 C	4.55	CA fantasy 4	9.77
ILL 855 A	5.50	Wis 870 B	25.50	Ont 675 A	21.65
Miss 900 E	5.05	DC 500 AI	1.60	Que 620 M	26.75
Miss 900 F	25.00	P.R. 560 B	26.50	AVA 10th anniv.	
NJ 250 A	3.55	CA fantasy 1	9.77	medal	15.00
Pa 405 A	17.77			Darien medal	8.50

The \$25.00 top bid on Miss 900 F had no name on the bid sheet! So I don't know whose it was. If the person will notify me immediately by sending along a check for \$25 + something for postage & insurance, I'll ship the token. If I don't hear from him by April 15, the token will go to the next high bid. There was no bid on NY 628 C. As usual, I was surprised by the amount of the bids on the above material, but generally speaking I believe the prices are not excessive for good tokens.

Des Plaines, Ill., has issued a beautiful Bicentennial parking token. Merchants buy the tokens from the city and give them to customers. Tokens are worth a nickel's worth of parking in meters, or 30 minutes. The tokens went into use February 23. They are described thus:

U.S. BICENTENNIAL CITY OF DES PLAINES 1776 1976 200 (EAGLE)

B 23 Sd Good Only in Parking Meters

The zeros in "200" are actually stars in circles. Our thanks to Don Punshon for sending the token along. On mine, the reverse is rotated 90° in relation to the obverse!

= TAXI OR TRADE TOKENS OF THE STATE OF WASHINGTON =
By Ralph Freiberg

The following tokens have been reported to me over the past ten years or so:

RED'S TAXI CO. PHONE 981
A 21 Sd Good For 5¢ in Trade (See Unidentified #93, 1970 Atwood)
TAXI 343 DAY OR NITE
B 21 Sd Good For 5¢ in Trade
A 21 Sd Good For 10¢ in Trade (See Unidentified #111, June 1966 Fare Box)
THE TAXISTAND PHONE 222 HOQUIAM, WASH.
B 21 Sd Good For 5¢ in Trade
FRANK MANDICH SOUTH ABERDEEN WASH
B 20 Sd Good For 5¢ in Trade

Various people have tried to get information on these tokens, but so far no one has found sufficient justification for listing them as legitimate transportation fare tokens. More or less they all end up with the same information, that the tokens were used in connection with corner cigar stands where one would call in for a taxi. It has been said that these tokens were used to purchase items at the cigar stores, or to make phone calls for taxi cabs. In this case, of course, the tokens would be trade checks and certainly not transportation fare tokens.

I have been hoping that some day the trade token collectors of Washington would learn the true nature of these tokens, but so far they have not. So I've asked Mr. Coffee to mention these in a special article so that, in the future, we may refer back to it.

Joel Reznick has done some investigating, and produced the following information: The Taxi Stand was a taxi company, started in 1917 or 1918 by Andrew Relling. Apparently, to stimulate the use of his taxi service, Mr. Relling gave out these tokens as an incentive. In 1935, Ed Walden decided to give the taxi business a try on his own, so he bought telephone number 222 and started up Eddie's Taxi. In 1945 Mr. Walden merged with Red's Taxi of Aberdeen. In 1950 the combined companies were sold to Mr. Cleve Newman, and they are still operated under their original names, Eddie's Taxi in Hoquiam, and Red's Taxi in Aberdeen.

Doug Rice also contacted the son of Frank Mandich, who told him Taxi 343 had been started by his father and was generally known as the Owl Taxi Company, which finally sold out to Red's Taxi, which is still in business.

I also had a piece of information that a business directory listed Relling & Sonnaberd, Soft Drinks & Tobaccos (Taxi Stand).

But I still have no firm proof that these tokens were good for payment of transportation. Not even old timers can remember if they were so used. So the exact use of these tokens remains a mystery. If someone can prove that they were used to pay fare, we'll list them, but I cannot list them until we get such information.

Speaking of Washington State tokens, we have a photo of one on Page 568 of Atwood for Bellevue Transportation Co. The 3rd edition of Atwood has been out over six years, but so far no one has produced any proof that this token was a transportation token.

It seems that if you list thousands of tokens correctly, as we have in our Atwood Catalogue, nothing is ever said. But list half a dozen incorrectly, and you never hear the end of it. The first transportation token catalogue was the Kenworthy-Dunn, which was printed in 1932. Dunn gave it up in disgust when he started to get lots of complaints about tokens being listed from the wrong places, or otherwise incorrectly. And this is why we do not like to list a token until we have proof of the correct city or origin, and the exact nature of its use. There are still a few strange listings which we inherited from previous catalogues.

= NOTES BY RALPH FREIBERG =

I am cleaning house, so to speak, and listing several tokens we've had hanging fire, so that they may be included in the new Supplement which Mr. Coffee hopes to publish later this year. First of all, two from Atlanta, Ga. This line is no longer operating and our efforts to find out what happened to the operator of this limousine service have proven futile. The Royal Motor Hotel is listed in the phone book and has the number listed on the tokens.

Next an old one from Centerville, Ia. Robert Lubetkin reports that George B. Steele is listed in the 1901-2 Iowa Gazetteer as a livery stable owner and operator of an omnibus line.

The Catalogue Committee decided that the Kansas Turnpike tokens qualify as much for listing in Atwood as in Feisel, so here they are.

The Massachusetts pattern does not make sense to me. It is not a pattern for 550 F as steel was not used until World War II. Scoville Mfg. Co., who made all these tokens, went out of the token business some 20 years ago, and since then a lot of strange relics from Scoville have shown up. I mentioned this steel thing on page 58 of the May 1973 Fare Box. I'm listing it now under patterns, but I really don't know how to categorize it.

When Lee Hope reported the earlier Lutheran High School tokens he was told there were also an aluminum one and a black plastic one. We listed the aluminum one in November 1974, but left off BUS from obverse. Meanwhile Dave Jordan found that there was a black one still in use. When students were able to use Bi-State buses of St. Louis, those lines were discontinued but they still had to keep a line that went outside the City Limits where Bi-State didn't operate. We held up listing the black one a while hoping the school would make some more so we could get a supply. But no luck. The school won't sell any of these to collectors.

See Mr. Coffee's article elsewhere in this issue on the token from little Atlanta, Neb. George Hosek, who found the token, is a specialist in Nebraska tokens and one of our newer constituents.

We were kicking around the aluminum miscellaneous item from Pennsylvania for a while, hoping to get a supply. But the parent company said we should try our local sales center. Unfortunately there is no local sales center out here that I know of. But the token does exist so we're listing it. Like D but no gold color on it.

A friend of Kevin Farrell, who is also a trolley fan, found about 50 of the Newport tokens. We were hoping to get a supply for NIS but so far we just don't know what happened to the tokens when RIPTA took over the Newport firm. The former owner of this Newport line, Kenneth W. Towle, died last year and maybe the tokens are held up in the estate, or maybe RIPTA got them. The T in the token could stand for Towle or for Transit Line. I believe Mr. Farrell has an ad for this token in this issue.

A couple of the Caguas, Puerto Rico, tokens got loose as samples and Max Schwartz sold them at the L.A. Convention to Messrs. Ford and Coffee who got their ten-dollar bills out before anybody else could. But they were never actually used because the bus line refused to pay the bill for them to M&W, claiming they hadn't even ordered them. Maybe if we could discover the present whereabouts of the tokens we could pay the due bill and get them.

I've been waiting for space to list the Canadian off-metal tokens for a while.

As to the Unidentified: we wrote the Chamber of Commerce at Hillsboro, NC, and they replied that no one in town ever heard of such a line. So the Taylor's Bus Line tokens continue to be Mavericks. The other Unidentified tokens have been mentioned before. I think I now have listed every Unidentified that we've mentioned in notes before. Let me know if I missed any.

Speaking of Unidentified tokens, I just came across one by accident. Had it come from a different source I would never have been able to ascertain its origin. The token has the letters C P T A intertwined on its obverse. This could be anything. But Nicolosi did write the company and they said they'd send us a supply. Till we list it, can any of you figure out where it's from?

Sometimes people report plated tokens. Unless these come directly from a company that used them we have no way of knowing if they were actually plated for use, or happened to be in with another company's tokens that were being plated. Every now and then one of them shows up which we now, at this late date, have no way of checking. I just got a letter from Hal Swann of Nashville, reporting that he had bought 550 of Ga 50 C, and among them he found 56 that had been plated. I have nothing on Athens City Lines, and they may be out of business, so I may never learn if they plated their own tokens or not. If anyone can help, please do.

=MARCH NEW ISSUES SERVICE REPORT =

, By John G. Nicolosi

We can't send you anything listed in this month's Supplement, but early in April we'll have a sending for NIS members. First of all we'll be sending Mass 430 A, the Lowell senior citizen taxi token. We thought we'd lost this one, but Dave Jordan found the junk dealer to whom the tokens had been sold and he bought enough for NIS. We had to pay more than the 25¢ listed value, but lucky to get them at all! We also finally connected with Mankato, MN, thanks to the efforts of AVA President Joel Reznick, and we got enough of Minn 510 E and F to send the pair to our Regular (but not Associate) members. I hope also to have more as we have quite a few letters and checks out.

Several people write me asking how to become members of New Issues Service. I would suggest you simply write and say you want to be put on the Waiting List. When your turn arrives I'll let you know what to do. We have to limit our numbers because I can't handle any more than I do now.

APRIL, 1976

Our 346th Issue

ALAN R. FEINBERG M.D.

The Editor regrets to report the death of an old friend of many of us, Dr. Alan R. Feinberg, AVA #705, of Winnetka, Illinois. I first met Alan in August, 1966, when I was in Chicago for the A.N.A. Convention and Joe Kotler threw a party for the A.V.A. members in town. Alan was quiet, unassuming, and an avid collector. So quiet was he that few of us realized that he was also a nationally prominent researcher in the allergy field and had written a number of articles on the subject in addition to presenting papers at conventions of the American Medical Association. A member of the staff at Evanston Hospital, he was also an Associate Professor at Northwestern University Medical School, and President of the Chicago Society of Allergy. He was author of the book *The Antihistamines* at age 26 (with his father, also a doctor). He died April 5, only 52 years of age. All of us, but especially the Chicago Area members, will find it impossible to fill the void left by his passing from the scene.

April 22. We still have three more issues to publish before the Editor leaves Boston for the West Coast about June 20, so our publication schedule will tighten up somewhat between now and then. We need things to publish, so we hope you all will send us something.

Several members have asked me to suggest that we all should mention our A.V.A. number when corresponding with each other, especially about personal tokens. It does save the necessity of referring to the Personal Token Index, and in the case of new members they aren't in the index.

Ralph Hinde has asked me to mention that NEVA, the North Eastern Vecturist Association will hold its next meeting on Saturday, May 8 at the Penn Station YMCA from 9 a.m. to early afternoon. All collectors are welcome, and for additional information, write to Ralph at 225-30 106th Ave., Jamaica, NY 11429.

I mentioned that I have over 100 different back issues of THE FARE BOX available, which I do, at 40¢ each postpaid. Unfortunately most of these are from about 1966 on, although there are a handful of scattered ones going back into the 1950's. These earlier issues are fascinating and instructive reading, and if anyone wishes a selection, just send me a multiple of 40¢ and indicates which ones you already have so I won't duplicate.

Auctions in this month's ad section all close May 18.

= APRIL NEW ISSUES SERVICE REPORT =

By John G. Nicolosi

This has been a very busy month for me. I've sent out two mailings. The first consisted of Mass 430 A and Minn 510 E F (last month's report). The Mass 430 A, I regret to report, cannot be sent to our Associate Members. The package being sent to me with the tokens broke open in the Postoffice and half the tokens were lost. But we may be able to get more tokens, and if we do I'll then send them to the Associate Members. The second mailing will consist of Wis 790 M N, Pa 805 B, and Ky 510 BW. These four tokens will go along to all members, so the Associates won't be wiped out completely this month.

Our sincere thanks again to Mr. Richard Bright for obtaining Pa 805 B, the companion piece to 805 A, for us. We got the 805 A several months back. Credit goes to Ralph Freiberg for the Wisconsin tokens, and for the Kentucky token our gratitude goes, as so often, to President Joel Reznick.

All the years I've been sending out new issues--over 20 years--I have never lost so much mail and packages as I have in the past year. The postoffice is all fouled up with their sophisticated machines that break up the packages and lose letters containing tokens. Now, all these years I have been assuming the loss myself, when it has happened. All of it. But now, enough is enough. So in the future if a letter or package is lost I'll have to ask the other party to split the costs. That is, if your letter with your new issues gets lost, I've got to split it even with you. You lose only that one, but I lose many, and I just can't afford it any longer.

Also, if you order tokens from my ads, and your order comes to over \$4.00, please include at least 20¢ extra for insurance, as well as the usual postage. This means I shall have to run back and forth to the postoffice, instead of just dropping them in the corner mail box. But no help for it.

This policy on the loss of letters & packages applies both to NIS and non-NIS members.

I want to commend Paul and Susan Cunningham and the others who had a part in producing A QUARTER CENTURY OF THE FARE BOX. This Index was well done, and much needed.

= MIDWEST TRANSPORTATION TOKEN AND TICKET CLUB MEETING =

By Anna Butler

The Club met on Sunday, March 14, at the Downtown YMCA in Minneapolis at 1:30 p.m. with nine members and two visitors present. A new member, Aksel Hansen, joined our ranks at this meeting. We are happy to have him and hope he will be happy with us.

Don Hillstrom is our new president for 1976 and things are really hopping at the meetings. Different members brought some of their gems for the rest of us to see. Some of the things shown were: Ky 150, collection of horsecar tokens, rare Minnesota tokens, stock certificate of the Chester Street Railway of Chester, Pa., Bell Register tokens, ten-cent fare card used for downtown area travel in Minneapolis, H.O. trolleys and track, Minnesota and New Mexico tokens, 2 books: The Time of the Trolley and American Heritage, etc.

Coffee was served at the meeting, and we adjourned at 3 p.m. to meet again on Sunday, April 14, at the same time and place.

= NEW FINDS =

"Today's my birthday," wrote Chuck Littlefield on April 11," and I went to a flea market. What I found was a nice present. Picked up a Tex 555 A out of a junk box. Condition XF." Enough said! Congratulations on both accounts.

George Hosek called the other evening to report picking up two Iowa 630 A's. He wanted to trade the second one for a rare Iowa token he needs, which unfortunately I do not have. I believe Hal Ford's was unique until George found these two.

= THE ALLENTOWN & READING TRANSIT COMPANY =
By Douglas E. Peters

The Allentown & Reading Transit Company was the successor to Allentown & Reading Traction Co., which had operated streetcars between the eastern Pennsylvania cities of Allentown and Reading, a distance of 47.5 miles. For a greater part of the route, the line was a typical rural side-of-the-road trolley line. An unusual characteristic of this line was the fact that it operated on two different track gauges, thus necessitating two sets of equipment. The line was standard gauge between Allentown and Kutztown, and wide gauge between Kutztown and Reading.

Dorney Park was a company-owned amusement park a few miles west of Allentown on the trolley line. No tokens were ever issued for use on the trolley line, which was abandoned in March, 1936.

Between this time and 1950, A & R Transit operated motor buses. It was during this period that tokens Pa 15 L M N O were issued and used. During 1950 the company was sold and Allentown Suburban Lines was formed to operate the Fogelsville-Dorney Park-Allentown line of the A & R. This private company operated until July, 1975, when the Lehigh & Northampton Transportation Authority purchased the rights of ASL's transit routes. ASL was the last private transit bus operator in the Allentown area.

The former owner of ASL, Mr. Earl Cunningham, informed me that he had obtained the A & R tokens and stored them for several years. Since he anticipated no future use of the tokens they were finally all destroyed, years ago.

Based on my search for these tokens over the last eight years, the most common one is Pa 15 O, followed in scarcity by M, L, and N. Pa 15 N, the red fibre token, is quite scarce, as I have found only two during this time period. It is also very unlikely that large quantities of any of these tokens exist today.

= GALA 1976 A.V.A. CONVENTION TO BE HELD IN ST. LOUIS AUGUST 13-14-15 =

The American Vecturist Association will hold their 28th Convention at the Bel-Air Hilton Hotel, on the River, in St. Louis, Missouri. Members will be treated to a 3½ hour Mississippi River cruise, during which a sirloin steak dinner will be served. The combination river tour and banquet will take place the first night of the convention, Friday the 13th, instead of the second day (Saturday) as has been the custom at previous conventions.

After the usual business meeting Saturday morning, members will be free to visit the famous St. Louis Zoo, the National Museum of Transport, ride up the famous 630-foot high gateway arch, or participate in any of the riverfront activities. Excellent restaurants abound and the night life is exciting in St. Louis, so the evening will not lack for things to do.

Sunday morning at 10 a.m. the annual token auction will commence, and after a noon lunch break, will finish at about 3 pm.

Swapping and good fellowship will continue throughout the convention, since the trading rooms will be open at all times.

Advance Convention Registration (including token & tour & banquet) is only \$13.50, until July 15. After July 15 it will be \$15.00. Members have already received reservation cards (with the March Fare Box). The room rates at our hotel are \$23 for single and \$27 for double.

Collectors and their families are urged to attend what will be one of our most memorable gatherings. We'll meet you in St. Louis!

= THE ST. LOUIS CONVENTION AUCTION =

There is always a big transportation token auction at every A.V.A. Convention, and the one in St. Louis will be no different. Good tokens for auction are still urgently needed! Please send tokens for auction to Chairman (and A.V.A. President) Joel J. Regnick - 120 So. LaSalle St. - Chicago, IL 60603. Closing date for receipt of tokens for the auction is May 28, 1976.

= APRIL SUPPLEMENT TO THE CATALOGUE OF WORLD TRANSPORTATION TOKENS =
By Kenneth E. Smith

In going through the Meyer & Wenthe records obtained by the A.V.A., Ralph Freiberg has come up with the following additional information. I shall not put prices on these until I receive rubbings or photos to verify the exact descriptions.

C U B A

Santa Clara 700

OMNIBUS DE SANTA CLARA, S.A.

C o B 24 T-sc (same as obverse)(30,000 delivered in January, 1947)

D o Bz 24 T-sc " (30,000 delivered in July, 1948)

(The above two turnstile tokens were ordered through Perey Turnstiles Inc.)

H O N D U R A S

Tegucigalpa 820

R. FASQUELLE AUTOBUSES (ARROW THRU CIRCLE)

D o Bz 16 Bar Pasaje Escolar (bus)(30,000 delivered in July, 1947)

S W E D E N

Two thousand each of a 16mm and a 23mm token were delivered to a C. Erickson in Langedrag, Sweden. No description of the tokens is available. They could be either transportation or merchant tokens. Investigation is needed here.

LOS ROBLES (COUNTRY UNKNOWN)

COOP. VIVIENDA LOS ROBLES

o B 16 -- (same as obverse)

(3,000 of these tokens were shipped to Cooperative de Viviendas, Calle 32, Edificio B, Los Robles. The country and shipping date have so far not been found in the records.)

In future catalogues, towns which have been, in their transportation token issuing period, moved from one country to another, will be cross-indexed with the token under the country and city in whose language the token exists. An example follows:

F R A N C E (Reported by G. Fritz)

Strasbourg 370 (See Strassburg, Germany)

G E R M A N Y

Strassburg 852 (now Strassbourg, France)

STRASSBURGER PFERDEBAHN 1878 (SHIELD)

A o B Oc Sd Fahr-Marke 10 Pfennig (22mm)

\$5.00

(From 1871 to 1918 this city was under German rule, and returned after World War I to France.)

Giessen 345

STÄDTISCHE STRASSENBAHN GIESSEN (STREETCAR)

G o B Oc Sd Gültig Für Städtische Beamte (22mm)

1.00

Dresden 290 (correction)

DRESDNER OMNIBUS VEREIN FAHRMARKE 20 PF.

P o B 23 Sd (blank)

2.50

Remember when you report new discoveries, in addition to giving the exact wording, spelling and punctuation, to send rubbings or photographs. This is essential to insure accurate listings. Please keep the listings coming.

= PROPOSED TRANSPORTATION TOKENS FOR KANSAS CITY IN 1926 =

By Terence W. Cassidy

On October 16, 1926, the Kansas City Public Service Company took over ownership of the streetcar and bus system of the two Kansas City's, ending a six-year receivership of the Kansas City Railways Company. Presented above are three proposed designs for transportation tokens which were designed and drawn shortly after this change of ownership took place. These token designs were never struck for use, and to the best of my knowledge no patterns were struck. The drawings came from the transit archives, which were in the process of being packed and shipped to their new home, the National Museum of Transport in St. Louis.

= VARIETY FARE =

By Ralph A. Hinde

The updated varieties listing is still available for any member wishing to borrow it in order to make his own copy. Thru the courtesy of a couple of our fellow collectors I have about a dozen copies on hand. While they last you can have a copy for the postage. Some copies are back-to-back (10 sheets) while others are single-sided (19 sheets). The weight is 3 oz. for 10 sheets; 5 oz. for 19 sheets.

Syd Joseph has photographed many of the varieties listed; quite an impressive collection of pictures. How do we let everybody see them? Your suggestions will be welcome. Syd asks permission to clean tokens before photographing as it allows for much clearer pictures. Afraid that cleaning will damage or devalue your token? His cleaning removes the grime, not the finish. No abrasion marks on the tokens; they're much easier to read. The value is now lowered as it is with coins.

Do you have token varieties that are not listed? Greg Prgomet is still adding all different ones to a "master" list, so that some day we can put out a complete book. Why not let him know what you have?

= NOTES BY RALPH FREIBERG =

Two more from Sacramento. It seems they're having trouble getting enough tokens on hand, and also the token supplier is having trouble making them fast enough! It would have been great if we could have obtained better cooperation from the Sacramento Regional Transit Authority, if they would have picked out the various tokens, I could have gone up there and picked them up. Mr. Williges has run an ad on the 715 Z token and in picking these out to send to others, he ran across some new types. I don't know at this time if the 715 AA was an error not, but Mr. Williges has found about 8 of them so far. But it's hard to say what he could find in each roll of tokens he buys. Then to complicate things further, they also came out with a different token with different wording on the back. Possibly in a future issue of THE FARE BOX Mr. Williges will run an ad for the AA and AB if he finds enough of them. I don't know if others will agree with me in calling the center of the token a T but that seems the best way to describe what's left after the three cut-outs are made. Unfortunately the New Issues Service won't handle these as we just can't get a supply of these particular ones without buying hundreds of others. But if anyone wants to write direct to Sacramento Regional Transit District at Box 2110 (or 2824 N Street), Sacramento, CA 95810, and send 15¢ for each token, you might get them (or you might not).

Next the Louisville token. This was reported by J. Andrew Sack, and a phone call by Joel Reznick produced fast results. So N.I.S. will send this one out. Joel got results by reminding them that we are considering holding a future convention at Louisville, so they wanted to make us happy. The Galt House is a new hotel built overlooking the Ohio River and it would, indeed, be a good place for a convention. The LARC is a minibus operated by the TARC (complicated?) which means "Transit Authority of River City," which took over all bus lines in Louisville on September 1, 1974, as well as the lines of Blue Motor Coach on March 1, 1976.

The Kentucky pattern was found among some odds and ends after the company there was taken over by TANK (Transit Authority of Northern Kentucky). There is no indication that Green Line ever order tokens without a facsimile signature so we must conclude that this one is a pattern that was never used.

We are listing several tokens which are described in the Meyer & Wenthe records, and of which Duane Feisel obtained rubbings of specimens at the company. None of these which have *** in the price column have ever shown up except in Meyer & Wenthe. Some or all may have been used, but then again they may never have been used. But they do

exist. The token for the Hi-Slide was used about the same time as the wooden nickels we have listed, but no one at the time bothered to go to this Slide to check. A year ago Frank Goeller went to the site and reports the Hi-Slide looks abandoned for some years, but on looking through a fence he did see a turnstile which could have used the listed token. Perhaps someone will find what happened to the tokens.

The Manistique tokens were ordered 40 years ago and were in small orders each time. As there were several orders, these probably were used. Now maybe some of our Michigan collectors can get up there and find how these were used and on what.

The school in Muskegon did not answer my letters. Don't know anything about this token.

Back about 1974 the City of Mankato took over the local bus line, but continued using Minn 510 D with a 25¢, 4/90 rate. But on April 5 of this year they hiked the fare to 35¢ or 6 tokens for \$2. We are uncertain why they have tokens in two different metals, but maybe they had trouble getting tokens. This is indicated by their reluctance to sell us as many as we wished. So N.I.S. got only about half as many as we wanted.

The Reading token came out at the same time as the one listed earlier, but as it was a school token we didn't know about it. Richard Bright, however, was able to get us a supply of them and N.I.S. members will get this one this month.

The South Carolina bridge tokens are pretty old. Letters down there have gone unanswered, so now we put out South Carolina members to work on it and wish them luck.

We have a new reverse type on the Sheboygan tokens which may be used more and more by other firms in the future. We have one like this for Rochester, NY, but this may be a pattern to indicate what the reverse is like. Sheboygan made us wait till they got additional tokens, and it took quite a while, but we got them finally.

There are more tokens from the Meyer & Wenthe records which we know were struck, but of which no one has a rubbing, and which no one has ever actually seen. We do not list tokens unless we have rubbings or someone has seen them. But I shall mention some here which are described in the records which probably were made. First a token like Mass 260 C:

COZY CAB & BUS CO.

WM 23 A Good For One Fare Only [1,000 ordered in May, 1941]

and one for the Lorain-Elyria, Ohio, area:

LORAIN-ELYRIA TRANSIT

WM 23 Dd Good For One Fare [2,000 struck in July, 1968]

Perhaps some day some of the above may show up, and then we'll list them.

Our C P T A (in monogram) token has not shown up as of this writing [Editor's note: Nick informs me they have now arrived] but we shall have it for next month's report, along with several others.

A word about Logos. A "logotype" or "logo" is that highly visible, yet little discussed symbol which identifies a company, product or service. It plays an important role in the marketing program by definition. A Logo represents and identifies a transit system, for instance. People associate the Logo with the system. What's more, a logo design will produce an impression and help create a public mental image of the system. It should be flexible. The design should be such that the logo can be used on route schedules and maps, bus stop signs, print & broadcast advertising, collateral material, and even on the bus itself and the drivers' uniforms.

We are forming a collection of printed logos, and would appreciate members sending a printed small copy of the local transit logo to Mr. Coffee. Then he will run a page (or two or three pages) of Logo designs.

On page 24 of the February issue, a "G. Ischer" was listed as having reported a new Brussels, Belgium, token (80 WR). Of course this was a mistake for our member Gary Ascher of Sparta, Wisconsin. It was Gary who reported this token.

MAY, 1976

Our 347th Issue

May 6. This issue comes to you only two weeks after the April issue. The June issue will go out, again, in about two weeks. So please rush your ads and articles to us for the next issue. We're running on a tight schedule, because I still must publish two more issues (June and July) before I leave Boston for the summer. I shall be driving in my new car across the continent, and hope to visit a number of collectors and find a dozen census tokens for the collection. I shall be leaving here about June 20.

Inside this issue you will find a long and excellent article by our friend F.J. Bingen of Holland. This is a translation, as explained in the preface to the article, of an older article, and contains much previously unpublished (in the U.S.A.) information. I had held up publishing it because, as will be evident from a glance at the article, retyping it would have been a prodigious labor. However the thought occurred to me that it could simply be placed in the electronic stencil maker, and that is what I did. Hence it is not in as polished form as it might be had I retyped it, and one should remember that Mr. Bingen submitted it thinking it would be retyped. So here you have an article exactly as it was sent in by Mr. Bingen, and this in itself is interesting. His articles are among the most erudite published in The Fare Box.

I also did some experimenting with the stencil maker to add some photos this time. You will find a page of enlarged photos of die varieties of a Denver Tramways token. This page was mailed out as part of NEVA NEWS by Ralph Hinde, and I trust he will not disapprove of my lifting the sheet and putting in here. The reproduction is not as good as the original, but is quite readable and interesting. This is the type of photography we hope eventually to have in an enlarged catalogue of die varieties. Also on the back page is a sheet of enlarged photographs of tokens picturing street cars. Again the photographs are the work of Master Photographer Syd Joseph. The 4 streetcars in the corners were lifted by me from an 1890 issue of the Street Railway Journal, from an advertisement by a streetcar builder.

There is still time to submit tokens for the official A.V.A. Convention Auction to be held in conjunction with the St. Louis Convention on August 15. Send tokens directly to Convention Chairman Joel Reznick - 120 So. LaSalle St. - Chicago, IL 60603.

1776

= H.C. SCHMAL AND THE TUCSON A.S.N.A. TOKENS =
By Harold V. Ford

I spent a week this past April in Arizona and visited former AVA member Harold C. Schmal. "Shorty," as he is known to his friends, is 69 and has been gradually phasing out his exnumia hobby. During the recent ANA Convention in Los Angeles he disposed of a large portion of his token and medal collection. Several years ago he broke up his transportation token collection via ads in THE FARE BOX. He intends to pass his wooden nickel clearing house on to another collector in a year or two.

I was able to obtain some, but not all, of the many personals he has issued. Shorty was robbed last year and most of what remained of his medalic stock was taken. Shorty was bound and gagged during the robbery, and suffered a heart attack!

During my visit I examined what he had left from the robbery. He had about 20 sets of AZ 840 H and I, which are listed in this month's Supplement to the Atwood Catalogue. I had heard about the existence of these tokens from Freiberg some time ago. Ralph had been under the impression that these were a very limited issue; hence did not justify a listing in the Atwood Catalogue from the information that he had received from other collectors.

I questioned Shorty about these issues, and learned that they were struck by Don Dow in cast tin. Two hundred numbered sets were issued for the Arizona State Numismatic Association Convention in Tucson back in 1969. Here is an approximate breakdown as to what happened to the numbered sets:

Sets numbered 1-10 were kept by Shorty, and he lost them in the robbery.

Sets 11 to 82 were used on the tours offered by ASNA. Most of the lower numbered sets were kept by collectors who took both tours though several half sets (one token) remained since some collectors elected to take one tour and not the other.

Sets 83 to 100 were not used and Shorty kept them. They were later lost in the robbery, also.

Sets 101 to 200 were melted when the AVA did not show an interest in them earlier.

I phoned Freiberg and gave him the information I obtained and was surprised to learn that he was aware of a number of sets already owned by AVA members. I obtained some duplicate sets and I doubt if Shorty has many left by this time, since other collectors aware of their existence via the grapevine.

Perhaps 30 to 40 partial and complete sets will end up with AVA members, plus 30 to 40 partial and complets with ASNA convention goers back in 1969. About 28 sets were lost in the robbery, and will they ever show up?

= MASON CITY AND CLEAR LAKE TRACTION COMPANY =

New A.V.A. member M.A. Peterson of Mason City, Iowa, writes that he has done some research on this firm which issued Iowa 600 A. It seems that, in 1968, a fire destroyed their car barn, offices, and display of tokens, tickets, etc., as well as a refurbished trolley car.

After many interviews with company officials, present and former, Mr. Peterson was able to purchase a quantity of Iowa 600 A tokens, he adds.

= HUGE QUANTITY OF QUEBEC 3620 ZB TURNED UP =

Quebec 3620 ZB is an interesting 20mm aluminum parking token, a souvenir of Expo 67 in Montreal. Olivier St. Aubin of St. Laurent, Quebec, reports that...well, I'll put it in his own words:

"I buy in auction 56,000 of PT Quebec 3620 ZB for 4 dollars." He has an ad in this issue, and I believe it would be understating the case to say that he has enough of them to go around. At \$4 for 56,000 this comes to 14,000 for a dollar, or 140 of them for a penny. We should all find tokens for prices like that.

Several years ago I bought in a German auction some cardboard bridgetokens of Geneva, of which there was already known a description in Mr. Charles Florange's book "Etude sur les Messageries et les Postes", Paris 1925, nrs. 348/354. About the same time Joe Kotler drew my attention to a very fine gate token of the same city. It was a 10 centimes, printed in black with the centre of the reverse struck in relief! Afterwards a similar token of 25 centimes came to my knowledge and from that time I have tried to gather informations on these very interesting items. I wrote to the archivist of the city of Geneva and to the Municipal Museum and indeed I got some data together, hardly enough however to compile an article. Nevertheless I had decided to publish my data when I learned that on these tokens there had already been published an extensive and exhaustive article. Who else should it be, then our ever diligent and successful investigator Yoseph Sa'ar, who sent me an extract from the Revue Suisse de Numismatique of 1899, part IX, p. 291ff with an article written by Mr. Auguste Cahorn of Geneva on the tolltokens of his town. There was put together in a very scholarly way the whole history of this tokens and for me the only thing was to translate this article. With the kind permission of Mr. Maitre Colin Martin, the editor of the said Revue, for which our sincere thanks, this article now can be published in The Fare Box. For some obscure reason Mr. Smith - contrary to Atwood's catalogue - does not list cardboard tokens in his catalogue of world P.T.'s. As he told me the catalogue-committee had decided so. Nevertheless I thought the history and description of the Gate- and Bridgetokens of Geneva might be of interest to our readers.

For a better understanding of the situation it may be good to know, that Geneva is situated at the south-west end of the Lac Léman (the Lake of Geneva) at the point, where the river Rhône leaves this lake on it's way to the Mediterranean. The Rhône divided the city in two parts, the southern half being the oldest and still the main part of the city. To the south of Geneva flows the Arve, a small river that debouches in the Rhône to the west of Geneva. The old town was surrounded by a system of fortifications, with several gates. All conditions for some nice sound bridge- and gatetokens therefore were on hand. And now we leave it to Mr. Cahorn to tell his story.

THE TOLLTOKENS OF THE GATES AND BRIDGES OF THE CITY OF GENEVA.

I. - Gates.

Till the end of the 18th century the gates of the city of Geneva were closed at sunset, without any allowance for the walker, that had belated. It were the church-bells of the St. Peter's cathedral that announced this hour and at it's sound the bridges of the Cornavin-gate, the Rive-gate and the Newgate were drawn up. The gate at the side of the lake was closed with chaines and the city went asleep within its threefold circle of fortresses.

After the annexation of Geneva by France the closing of the gates became less stringent; it became easier to get them opened during the night as the relation between the city and the surrounding county became more and more frequent. After the liberation the provisional government authorized under certain conditions the passage through the gates after they were closed for the night. By law of 3 July 1816 this authorization was maintained and the toll-tariff was fixed as follows:

For a pedestrian, from may till august, 3 sols from 10 till 11 p.m.
 in april and september 1 s. 6 d(eniers) from 9 till 10 p.m.
 and 3 s. from 10 till 11 p.m.
 in march and october 1 s. 6 d. from 8 till 10 p.m.
 and 3 s. from 10 till 11 p.m.
 in november and february 1 s. 6 d. from 7 till 9 p.m.
 and 3 s. from 9 till 11 p.m.
 in december and january 1 s. 6 d. from 6 till 9 p.m.
 and 3 s. from 9 till 11 p.m.

For a horse, mounted, put before a vehicle or hold on the hand,
 from mai till august 6s., from 9 till 10 p.m. and 1 fl.(orin) from 10 till 11 p.m.
 in april and september 6 s. from 8 till 10 p.m. and 1 fl. from 10 till 11 p.m.
 in march and october 6 s. from 7 till 10 p.m. and 1 fl. from 10 till 11 p.m.
 in november and february 6s. from 6 till 9 p.m. and 1 fl. from 9 till 11 p.m.
 in december and january 6 s. from 5 till 9 p.m. and 1 fl. from 9 till 11 p.m.

When the gates had to be opened after 11 p.m. the highest toll was doubled. When the gates were closed is was not allowed to enter the city with goods for which had to be paid municipal excise-duties.

In 1827 the closing of the gates was put on a later hour. The levying of the toll started at 9 p.p. from January till april and from september till december and at 10 p.m. at the other months of the year. The closing hours were again changed in 1831 and in 1832. At that time the toll for pedestrians was fixed on 3 sols from 10 p.m. till midnight during the whole year. In 1838 new changements caused by the adoption of the decimal system, the pedestrians had to pay 12 centimes for the whole night (from 10 p.m. till 4 a.m.) and the toll for horses was fixed on 24 centimes till 9 or 10 p.m., according to the season. From then on till midnight 50 centimes and from then on till 4 a.m. 1 franc. In 1841 the toll of 12 centimes was reduced to 10 centimes and that of 24 centimes was raised till 25 centimes. This last tariff remained in force till the suppression of the fortifications.

The accounts that were held of the receipts and expenditures of the Canton of Geneva for the year 1837 gave an expense of 36 florins for the manufacturing of tokens for the night services. These tokens have unfortunately not yet been found back. They have not to be confounded with the tokens issued by virtue of the law of 24 february 1849 that remained in use till 13 april 1852. Their description is:

No.1 Yellow cardboard with black printing exept the figure on the centre of the reverse, that is struck in relief.

Diam.: 0.037. Collection of Mr.Cahorn +)

No.2 Same impression and same cardboard as nr.1

Diam.: 0.029. Collection of Mr.Cahorn.

These tokens were sold in packets of 25 items in small white paper bags of 30 by 58 cm. with the following inscription:

CANTON OF GENEVA	DEPART ^M OF PUBL. CONTRIB.
GATES OF THE CITY OF GENEVA.	
Packet of 25 Tokens for pedestrians.	
This packet represents a value of fr. 2.50 and is sold at a discount of 20%, at a price of 2 fr. The tokens (representing 10 cts.) are valid from 10 o'clock p.m. till the opening of the gates in the morning.	
These tokens can be bought at the offices of the toll-control, 166 Great Quai, from 9 a.m. till noon and further the whole day at the custom- and octroi-offices at the gates of the city of Geneva.	

No.3 There exist a variety, with the same reverse as nr.2, but with an entirely

+) The exact description of the tokens is given in the catalogue at the end of this article (FJB).

different obverse. The design of the arms on this side is the same as that on the coins of Geneva of 1847 engraved by Aug. Bovet. This piece is as far as we know unique and therefore it most likely is a not accepted pattern.

Yellow cardboard, red printing on the obverse, black on the reverse.
Diam.: 0.029. Collection of Dr. Ladé.

No.4 Variety of the same tokens (also a not adopted pattern). Arms of the obverse of nr.1 with the inscription of the reverse. Black printing on square white cardboard. Reverse blank.

Diam. of the printing: 0.034. Cardboard 0.046 x 0.046. Collection of Mr. Cahorn.

Nr.5. Same variety. Arms of the obverse of nr.2 with the inscription of the reverse. Black printing on square white cardboard. Reverse blank.

Diam. of the printing: 0.027. Cardboard 0.034 x 0.034. Collection of Mr. Cahorn.

II. - Carouge Bridge.

The stone bridge over the river Arve, known as the Carouge Bridge 1) was constructed in 1811. It was not yet completed when Geneva was liberated from France, but nevertheless it was put in use and the provisional government fixed a bridgetoll. Renewed in 1816 it was abolished on 1 July 1823.

This toll was only levied on horses and cattle put before vehicles at the following tariff:

One horse or one mule	2 sols
a vehicle with one horse	4 "
" " " two horses	6 "
" " " three horses	9 "
" " " four or more horses	15 "

For vehicles drawn by an ox or a cow the toll was levied proportionally in this way that two oxen or cows counted for one horse. For the entrance and exit of the city the toll was only levied once. In 1819 there were authorized season-tickets. For a year had to be paid 20 florins for one horse and 30 florins for two or more horses.

In the various laws in regard to this toll-levying no mention is made of tokens. In the collection of Mr. Paul-Ch. Stroehlin, president of the Swiss Numismatic Society there however is a cardboard token with the legend PONT D'ARVE and with the picture of a horse, but as far as we can see this token has to be attributed to the wooden bridge, though the charter for the latter bridge, of which we will talk later on, gives only regulations for tokens for pedestrians. The absence of more exact documents don't permit us to give an absolute certain answer on this question.

III. - Wooden bridge over the river Arve.

The wooden bridge, that existed downstreams of that of the bridge of Carouge and that had become completely out of use, was replaced in 1819 by a ~~2~~ foot-bridge made of wood too. The State authorized the constructors of this bridge to levy a toll during 20 years of 1 sol and 6 deniers for one passage or for two passages on one day. At the expiration of the charter in 1839 a new company constructed the same place a bridge that could be used also by vehicles.

This is how the tariff and the conditions of the new charter were fixed for 40 years: The toll for one person was: on sundays . . . 3 centimes

on other days . . . 2 centimes.

On every day one had to pay for:

a horse or a mule	10 centimes
an ass and for every piece of large cattle	5 "
every piece of small cattle	2 "

1) For this and following notes see at the end of the article.

Season tickets had to be issued at a rate of 60 centimes, for a month or 6 francs for a year and for families there had to be given a discount as follows:

10%	for a family of 2 persons
20%	" " " " 3 "
25%	" " " " 4 "
30%	" " " " 5 or more persons.

For pedestrians there had to be issued tokens, that had to be sold in packets of 100 pieces at a price of 1.50 francs for 100 tokens.

For vehicles the bridge had to be open from day-break till 9 p.m. from 1 november till 1 april and till 10 p.m. between 1 april and 1 october (Mr. Cahorn has probably been in error here, for the month of october has been forgotten!). For pedestrians the bridge should be closed at 10 p.m. in the winter and at 11 p.m. in the winter.

This bridge was opened for the traffic on 8 april 1840. The levying of toll was abolished on 31 december 1863 by virtue of the federal law that abolished all bridgetolls. The state of Geneva gave a compensation of 40.000 francs for this bridge to the company. In 1870 it was replaced by the now (in 1900) existing bridge.

The tokens (with a picture of the bridge) are of cardboard on one side red and the other side yellow. Black printing with the same obverse and reverse.

Diam.: 0.029. Collection of Mr. Cahorn.

Tokens with a picture of a horse are printed in black on green cardboard. Both sides the same.

Diam.: 0.028. Collection of Mr. P.-Ch. Stroehlin.

IV. - Bridge of St. Antoine.

The Newgate and the Gate de Rive were very far from each other and the inhabitants of the quarters of St. Antoine and of St. Léger 2) were obliged to make a considerable way round if they had to leave the city. For this reason some Geneveses took the initiative to construct a suspension bridge from the Bastion du Pin to the end of the road to Florissant. Colonel G.H. Dufour, engineer of the Canton of Geneva, elaborated the plans. It was the first suspension-bridge that was constructed on the continent. Opened in 1823 and taken over by the State on 1 april 1843 it was in use till 1856.

The tariff for a passage was at first settled on 1 sol, but after the adoption of the decimal system it was reduced to 2 centimes. The tokens were sold at fr. 1.50 for 100 pieces. On the token was printed the year of issue. There are known two tokens:

Year 1843. White cardboard, red printing.

Diam.: 0.029. Collection of Mr. Cahorn.

Year 1845. Yellow cardboard, red printing.

Diam.: 0.028. Collection of Mr. Cahorn.

V. - Bridge Pâquis-Chantepoulet. 3)

The success obtained with the bridge of St. Antoine stimulated in 1825 a second company to construct a similar bridge between the Bastion du Cendrier and Pâquis. The conditions for the toll-levying were the same as at St. Antoine. This bridge was taken over by the State on 1 March 1846 at the expiration of the charter. It was demolished in July 1850. A provisional bridge was constructed at the same place, that also could be used by vehicles and on this bridge, that only lasted for a few months there were also used tokens.

The tokens of this bridge are known in two varieties:

Pink cardboard and black printing;

Green cardboard and black printing. Obverse and reverse the same.

Diam.: 0.0285. Collection of Mr. Cahorn.

VI. - Bridge of Bel-Air-Coulouvrenière. 4)

By law of 10 september 1836 the State authorized the construction of a third suspension-bridge between la Coulouvrenière and Bel Air. The bridge was opened for the traffic on 6 july 1837 and it disappeared together with the Bastion de Hollande, from which it went to la Coulouvrenière, when the fortifications were suppressed. The tariff was the same as that in use at the other two suspension-bridges.

One token is known of this bridge with black printing on green cardboard. Both sides the same.

Diam.: 0.0285. Collection of Mr.Cahorn.

VII. - Bridge des Terreaux.

This wooden bridge was destined to establish a more direct communication between the quarters of St.Jean and St.Gervais, than the existing way through the gate of Cornavin 5). Authorized by law of 19 february 1845 it was opened on 8 August of the same year. The bridge was closed at 10 p.m. and for a passage one had to pay 2 centimes. Tokens were sold in packets of 50 pieces. The charter ended in 1870 but at the earlier demolition of the fortifications the bridge was also suppressed.

The token of this bridge is of pink cardboard on one side and lightblue at the other side, with black printing. Both sides the same.

Diam.: 0.029. Collection of Mr.Cahorn.

These tokens - certainly those of the bridges - have become quite rare nowadays. The material they were made of has sure hastened their destruction. Though they only represent an exclusively local numismatic interest we nevertheless thought it good to describe them, hoping this publication may be of use to some collectors.

Geneva, March 1900.

Notes of the translator.

- 1) Carouge was a village on the south bank of the river Arve. In the second half of the 19th century it was connected with Geneva by a tramway (see Smith 360Aa/360Ae);
- 2) Both quarters were situated in the south of Geneva; they are now in the midst of the city. The Promenade de St.Antoine is still a very fine Avenue. Florissant is a village to the south-east of Geneva;
- 3) Pâquis was a region to the north of Geneva and it now forms part of the city, situated on the north-bank of the river Rhône;
- 4) The Place de la Bel-Air is now in the midst of the city to the south of the river Rhône. La Coulouvreniere was at the other side of the fortifications to the west of the city.
- 5) The quarter of St.Jean was on the right bank of the river Rhône to the west of the northern part of Geneva. The gate of Cornavin was one of the main gates of Geneva in the north of the town. All the traffic to Lausanne and even to France (Lyons and Gex) had to pass through this gate.

December 24, 1973.

= JOHNSON HACK LINE OF NEODESHA, KS. =

In October, 1944, former AVA member Edgar Levy of Colorado Springs wrote the City Clerk of Neodesha seeking information about the Johnson Hack Line, which issued so many of those rare depotel tokens. From Mrs. Elvira Johnson McMurry came the following response about the line operated by her family:

"W. E. Johnson started the Bus Line in 1884, and with the exception of a few months continued later as Johnson & Son. Walter's death in August, 1933, was the end of the Bus Line. W. E. was also a mail carrier, and died June 1, 1935. From the huge wagonette came the auto-mobile bus. My brother was truly a pioneer in passenger transportation. The old town still misses the old bus line because they were also so dependable. Cannot say that for the present taxi system. Pioneers still recall the perfectly matched team of dapple grays driven so long by the Bus Line."

I suspect the tokens were used very early in the line's history, if it continued up to 1933. I'd like to know what they were using as tickets or tokens in the 1930's.

= WOODEN NICKELS GOOD FOR PART PAYMENT OF FARE =

By Kenneth E. Smith

The following is a listing of wooden nickels and their origins. Some are known to be restrikes, and this is indicated. Reverse designations refer to the listing on page 156 of the November 1975 issue of The Fare Box.

PRESENTATION PIECES [page 639][Reported by Duane H. Feisel]
AD Sv 38 Sd (Same as Mass 115 AH but made of sterling silver)

= NOTES BY RALPH FREIBERG =

A short supplement this month, but we're still waiting for some more new issues to list. But before I get going, I must correct an error in last month's listing. I should have used (Same obverse as 715 Z) in listing the two Sacramento, CA, tokens. The correct obverse reads: SACRAMENTO REGIONAL TRANSIT DISTRICT (LOGO)

This month we list a couple tour tokens from Arizona. These should have been listed seven years ago but the information was only given to me recently. If anyone is involved in distribution of a token it should be reported either to me or Mr. Coffee, directly. Otherwise by the time we get it third hand it sometimes is incorrectly described. I was told these were issued in limited quantity of fewer than 50, but now I find out they made over 200 sets. These tokens are made of block tin, for which we use the metal symbol T for the first time here.

I was looking for other information at Clearwater, FL, when I came up with a new token. It's a good thing I got it from the source as otherwise I'd never have figured out what CPTA stood for! In this instance we use the term (MONOGRAM) instead of (LOGO) because the official logo of this authority had not yet been adopted when they made the tokens. So the four letters form a monogram in this case, but not a logo.

The patterns from Kentucky were found by J. Andrew Sack at a flea market mixed in with some other interesting material. I figure they were made in the 1920's. It will be interesting if others can find more material like this which has been hidden for 50 years.

We know of at least five more tokens (new issues) which we're working on, and which may be listed in the June issue.

Last month under "New Finds" we reported that George Hosek had called to say he had found two Iowa 630 A's. I got some names mixed up. These were actually found by Milton G. Heitman of Marengo, Iowa. George wrote to say he wished it had been true, but it wasn't.

= MAY SUPPLEMENT TO THE CATALOGUE OF WORLD TRANSPORTATION TOKENS =
By Kenneth E. Smith

I have not received rubbings or photographs of the following items. I don't know, therefore, if these are precisely correct, so the listings are subject to revision when rubbings become available. They will be priced at that time, also.

AUSTRIA

Teschen 800 (see Cieszn, Poland, and Cesky-Tessin, Czechoslovakia)

STÄDTISCHE STRASSEN-BAHN TESCHEN

A o B Sq Sd Giltig Für 6 Heller (16mm)

B o A Sq Sd Giltig Für 12 Heller (20mm)

(This town is situated on both sides of the River Olsa. After World War I this portion of the Austrian-Hungarian Empire was divided between Poland and Czechoslovakia, with the River Olsa as the boundary line. The left bank part of town went to Czechoslovakia, and the right bank part of town to Poland.

CZECHOSLOVAKIA

Cesky-Tessin 200 (see Teschen, Austria)

POLAND

Cieszn 210 (see Teschen, Austria)

AUSTRALIA

Sydney 720

W.B. & S.S.S.F. CO. LTD. 4D.

XKo A Sq Sd Insure With Ocean Accident Corporation. 131 Pitt St. Sydney (25mm)

FINLAND

Tornio 740

5 / TORNION / JOKI (ALL INCUSE)

A o B 25 Pc (blank)(very thin)

(Used on a ferry service that operated between 1920 and 1939.)

MEXICO

Monclava 510

MONCLAVA, COAH CAPITAL DEL ACERO (STEEL MILL)

A o B 21 Sd Transportes Monclava S.A. de C.V. uso Unicamentes
Estudiantes Menores (old type bus)

ISRAEL

Zefat 860

(A COUNTERSTAMPED CIRCLE OF 9mm DIAMETER, BEARING DESIGN OF A RUNNING DEER. CURVED ALONG THE UPPER EDGE OF THE CIRCLE IN HEBREW THE WORD KENA'AN. CURVED ALONG THE LOWER EDGE OF THE CIRCLE IN HEBREW THE WORD ZEFAT)

A o B 20 Sd (same as obverse)

(Used in the 1930's on a bus service between Zefat and Mount Kena'an.)

Remember when you report new discoveries, in addition to giving the exact wording, spelling, and punctuation, to send rubbings or photographs. This is essential to insure accurate listings. Please keep the listings coming.

SET OF 6 aluminum and brass tokens of American Peanut Co., Norfolk, Va. Will trade for any bridge or ferry token that catalogues for \$2 or more. If no trade will sell for \$5 per set postpaid. These are work checks.
B.R. Rogers - 3651 Sewells Pt. Road - Norfolk, VA 23513

= MAY NEW ISSUES SERVICE REPORT =

By John G. Nicolosi

This month the Associate Members will receive TWO tokens, whereas the Regulars will get only one. Mr. Jordan was fortunate to have been able to obtain more of the Mass 430 A, which were lost in the mails last month. So Associates will receive this one plus Fla 105 B. Regulars will receive the Fla 105 B also, but since they already received the Mass 430 A, they will only be sent the Fla 105 B this month.

We do have more tokens pending, as we usually do, so there should be more going your way next month, in June.

This month I wish to welcome Associate Member Joe Pernicano to ranks of the Regular members. Welcome aboard!

JUNE, 1976

Our 348th Issue

May 27. We shall publish the July issue just two weeks from now. That is, we hope to put it into the mail on June 13. Therefore please send all ads and articles for the July issue (to be mailed June 13) in to the Editor immediately. I just about scraped the bottom of the barrel for this issue, so we'll just publish whatever we have in the July issue. I shall be leaving Boston less than a week after I mail out the July issue, and the August issue will be published from Tacoma about August 1. More about my trip plans in the next issue.

Joel Reznick called yesterday and asked me to stress the urgent importance of *advance registrations* for those who plan to attend the St. Louis Convention. In the past this has not been of such great importance. But this year with the banquet and boat tour on *Friday* night, they need more advance notice than they would get if you just walk in and register on Friday. So if you intend to be at the St. Louis Convention, please let Joel Reznick know. His address: 120 South LaSalle Street - Chicago, IL 60603. The convention itself will be held August 13-14-15 at the Bel Air Hilton Hotel, on the River in St. Louis, Missouri. I've already seen a drawing of this year's tour token, and it's a beauty, appropriate for what will be perhaps the most interesting tour ever held at an AVA convention.

We've just learned the good news that Seattle, not to be outdone by Yakima, is planning to operate two ancient streetcars--which are being purchased from Australia--along the waterfront this summer. The trolleys will operate over track owned by the Burlington Northern Railroad, and the fare will be only 25¢. The area traversed is adjacent to the main downtown area of Seattle. The cars will be operated by Seattle Metro and they've found several old bus drivers who once ran the trolleys in Seattle, to run the newly acquired cars. Now if someone could talk them into using a token.

A while back we reported a Bicentennial parking token from Des Plaines, IL, sent in by Don Punshon. He also sent one to COIN WORLD. They published a picture of it, and, Dor reports, within two weeks Des Plaines had received over 600 requests for the token. "Only about half had stamped return envelopes or money," Don adds. The City will honor requests from those who had the courtesy to include a return envelope.

Next issue I'll run another supplement to the Personal Token Catalogue, as I've received several more from collectors.

1976

= ROLAND C. ATWOOD CELEBRATES HIS EIGHTIETH BIRTHDAY =

Roland C. Atwood, A.V.A. #1, of Santa Monica, California, recently was feted by the California Association of Token Collectors on the occasion of his 80th birthday. Now full of years and honors, Roland--as he still insists we all call him--has been the chief figure in this hobby for about half a century!

He was born in Granite Falls, Washington, in 1896, and grew up in Somerville, Massachusetts. His interest in transportation tokens was sparked when he was still a boy, and his parents, returning from a trip to Jamaica, gave him a celluloid streetcar token used on that island. He became Chief Cataloguer of Transportation Tokens in 1932 when R.W. Dunn, who until then had maintained the listing, literally threw the list across the room at Roland and told him to take over. And thus he remained until the early 1950's when he asked Ralph Freiberg to carry on for him, a task accepted by Ralph and the others on our Catalogue Committee with the understanding that Roland would continue as consultant and adviser, which he has.

During his years as Cataloguer, Roland visited nearly every city and town in the United States in search of tokens and data. Long ago he completed visits to all 50 states, all Canadian provinces, and began to work on the rest of the world. In the course of his travels, especially in the 1930's and 40's Roland built the finest and largest collection of transportation tokens ever assembled. Those were the days when rare tokens were to be had for the asking, and two dollars was considered exorbitant for anything.

I first met Roland in 1948 in Washington, D.C., when he and Charlie Lamb came through town in his trailer, loaded down as always with tokens he had picked up in his travels. He had just been to Florida and he had hundreds of new discoveries and issues, all for sale for only a few cents each. I don't believe, in later years even, that Roland ever asked more than \$5 for any token he ever sold. Usually it was far less than that. His catalogue prices were low, and he lived by them. I remember that first visit with Roland in 1948. He had his collection with him and as a teenaged collector just starting out, my amazement was overwhelming as he produced piles and piles of celluloids, depotels, early streetcar and horsecar tokens. At first it was depressing to realize how many he had and how few I had, but Roland assured me that, if I kept in the hobby, I'd have most of them sooner or later. As it turned out, he was right.

In later years Roland and I visited often in Santa Monica, in Tacoma and Seattle, in Boston, and at various A.V.A. Conventions. He was always a delight to talk to and pump for information of the early years of token collecting. In 1961 he stayed with me in Boston, and by now he was interested in collecting matchbook covers, and I recall driving him all over town looking for them. I got one from the Harvard Faculty Club for him which, he assured me, was like finding a census token. It was while staying with me that spring of 1961 in Boston that Roland offered to sell his token collection to me, and I readily accepted. Harold Ford and I pooled our resources to pay the price and in June, 1961, Harold drove down to Santa Monica and picked up the Atwood collection and the two of us--Harold and I--split it up in Berkeley, Calif., that June with Ralph Freiberg looking on benignly. The price was considered really high for the time, but in retrospect we now know it was the greatest bargain in the history of transportation token collecting. The census tokens we picked up worked out to about \$5 apiece.

Roland, no longer with his fabulous collection, retained his fascination with tokens and continues to visit collectors and attend meetings. In addition to transportation tokens he also has collected all sorts of other things, including milk cartons, butter cartons, postcards, matchbook covers, and most recently, Sambo's wooden nickels, of which he probably has the finest collection in existence today.

Roland has a brilliant and sharp mind, knows the world like his backyard (having visited most of the countries in the world by now--all over Africa, around the world cruises, trips to remote Pacific islands, a ride on the trans-Australian railroad, etc.--and still knows more about tokens than most of the rest of us put together. To talk to him is a delight and an education.

His memory will endure in the name of the transportation token catalogue, and we look forward to more delightful chats with him for many more years to come.

A period has ended in the mass transportation history of Boulder, with the turn-over of the operation of the Boulder Bus system to the Regional Transportation District. I think it unfortunate that mass transit is more and more becoming a tax supported operation, although I agree that the regional approach is more realistic and the way to lure riders back to mass transit. This passing of the private enterprise phase of mass transit in Boulder required, I believe, that we give a brief look to the history of this operation.

Mass transit in Boulder began operation in 1891 with a 1½ mile streetcar line running along Broadway, the main street of Boulder. The streetcar was operated by the Boulder Street Railway Company. This company was purchased in 1902 by Boulder Electric Light & Power Company. The latter company, through a series of mergers, became part of the Public Service Company of Colorado (PSCo) in 1923. A part of the franchise granted by the City of Boulder to PSCo to supply gas and electricity to Boulder required that PSCo operate a mass transit facility.

Until 1973 the system did not grow very much. By then the system included six buses, which were used on two routes following 30-minute schedules, that functioned at the corner of Broadway & Walnut where I worked for a number of years in a tobacco and magazine shop, Eads News. Table Mesa and Martin Acres, two subdivisions in the south part of Boulder, were served alternately on an hourly basis. The system was operated by one supervisor and thirteen full time drivers.

On June 1, 1973, bowing to pressure from the City administration, ecology-minded students at the University of Colorado located in Boulder, and interested citizens, PSCo inaugurated three new lines to cover Boulder more fully, and provide service to areas which had grown rapidly in the post World War II development. Routes were designed to run on the 30-minute schedule, as before and, except for route number 6 which provided service to the eastern and southern parts of town, the buses continued to function at Broadway & Walnut. A special 15-minute service was added during rush hours, to provide more and better service and to encourage more people to ride. The information I have indicates that buses were never bought exclusively for the Boulder Bus system, but consisted of equipment purchased second-hand from places as far away as South Carolina and California. By 1973 the fleet had grown to seventeen buses, which were maintained by the same mechanics who had maintained the rolling equipment of PSCo. I believe that with the increase in service and, therefore, maintenance costs, a special arrangement was agreed to by PSCo and the City of Boulder that made them equally responsible for maintenance costs.

In 1974 a special question was put before the voters of the six-county Denver Metropolitan Area, asking them to approve formation of a Regional Transportation District (RTD) to operate all mass transit facilities, and to undertake construction of a surface light rail vehicle (LRV) system to serve Denver. The initiative was approved. During 1975 RTD took over operation of the privately operated Denver-Boulder Bus Company, a service that provided the only mass transit link to Denver, and the half of the operation of the Boulder Bus system that was the responsibility of the City of Boulder. Until late in 1975 long and sometimes unpleasant negotiations between the City, RTD, and PSCo were conducted to transfer that half of the Boulder Bus system, as well as most of the rolling stock of buses, which belonged to PSCo to RTD. The negotiations centered around the demand by the City that PSCo supply an alternative service, such as undergrounding overhead power lines, with the money that PSCo would not have to spend on the bus system after its transfer to RTD. After agreement was reached in late 1975, transfer to RTD was effected on January 1, 1976, and RTD is now responsible for all mass transit facilities in Boulder.

I wrote to PSCo early in April inquiring about the fate of the tokens Colo 60 A B C used by PSCo, and received a reply from Robert T. Person Jr., Boulder Division Manager, who informed me that on the advice of RTD and PSCo's auditors, the remaining supply of tokens had been destroyed. He sent me a plaque with a copy of the new logo introduced with the expanded service in 1973 and a brass-plated token. These plaques were originally awarded by PSCo to employees for their efforts in the expansion of the service. I am passing this memento to AVA, as a reminder of the change in owner-

ship, through Mr. Coffee, and I am sure that he will see that it is properly placed. I have not heard from my friends in Boulder about changes, if any, that have been made by RTD. As I receive information I shall forward it to The Fare Box, especially if a new token is to be used.

I would like to thank Mr. Fran Walsh, former Director of Public Relations for the Boulder Division of PS&Co for the historical information. Any errors in this narrative are, however, mine because I have relied upon my memory to fill in the story between the facts provided by Mr. Walsh. I would solicit any corrections from members in the Boulder area.

= BICENTENNIAL TOKENS GO ON SALE IN PHILADELPHIA =

The Southeastern Pennsylvania Transportation Authority (SEPTA), which operates all transit lines in Greater Philadelphia, has placed their new Bicentennial transportation token on sale. The tokens went on sale on Sunday, May 16, 1976, at 35¢ each, being convenience tokens only. It's a very handsome token, described thus:

ONE FARE ONE FARE SEPTA (LOGO) (BUS & TROLLEY CAR) (MAP OF FIVE COUNTIES SERVED BY SEPTA)

B 22 Sd Bicentennial Token 1776 1976 (logo) (Independence Hall and ten stars) [token is .882 inches in diameter]

A total of 1,042,000 tokens were struck by Osborne Coinage Company of Cincinnati, but they are selling like hotcakes, and some locations are limiting the number of the tokens that a person may buy at one time.

Nicolosi's New Issues Service had been promised in advance that 200 of the tokens would be available for its members, and word has just been received that the 200 tokens are already in the mail to Nick, so N.I.S. members will have the token.

The token is also available directly from Franklin Mint in sterling silver for \$7.50 (plus sales tax) and--for the vecturist who has everything--in 18 karat solid gold for only \$100.00 (plus sales tax). Those interested may order directly from Franklin Mint at Franklin Center, PA 19091. Allow 6 to 8 weeks for delivery, they say. As Franklin Mint did not strike the brass tokens, the dies for the silver and gold items will, of course, be different. The 18 karat gold token would have somewhat less than \$40 worth of gold in it, so if you order the token you are paying a lot of money for love. Of which, incidentally, 10% off the top goes to SEPTA. These silver and gold items would be listed as "Presentation Pieces" in our Catalogue.

= JUNE NEW ISSUES SERVICE REPORT =

By John G. Nicolosi

Tokens are slowing up again, so this will be another short supplement. This generally happens at this time of year. At this writing we do not have a single token to send out for June. But I have several checks out which means that tokens will eventually get here to me, and when they do I shall send them on to you.

You will have to wait for the July Fare Box for these listings, but will have a possibility of 4 or even 5 tokens coming your way in June some time: one from New Mexico, a couple from New York, one from Pennsylvania, and one from Canada, and one from Nova Scotia. So sit tight. Sooner or later you'll be receiving them.

It's getting near convention time again, and those of you planning to attend, if you do not want an extra convention tour token, please drop me a card and let me know. If I do not hear from you, you will automatically receive the tour token from me.

The top bid on the set of 3 Soviet Union subway tokens auctioned in THE FARE BOX two months ago was \$60.75. Second high bid was \$60.00 even.

= UNLISTED ENGLISH TOKENS =

By F. J. Bingen

At the end of the January Supplement to the Catalogue of World Transportation Tokens Mr. Smith invited readers to remind him of formerly reported tokens, that untill now have not been listed in any supplement.

As there are in my collection several English tokens (some already for more than 5 years) that all have been reported - mostly by Mr. Capper - but that, to my knowledge, never have been listed, I now take the liberty to enter into our cataloguers request and to give him again those listings.

Bournemouth 110

BOURNEMOUTH CORPORATION TRANSPORT SERVICES

o Co 31 Sd (blank)

This token is already known for years!

Bury 150.

BURY TRANSPORT CORPORATION (ARMS)

o C 22 Sd 1d. (dark blue)

pattern

o C 22 Sd 1d. (red)

pattern

According to Mr. Capper's "History of celluloid and plastic transportation tokens of the United Kingdom" (The Fare Box 1969, p.28) there were produced by Crystalate (Mouldings) Ltd., Tonbridge, during 1956 two sets of patterns. The first set being the Rochdale Corporation patterns, without the title ROCHDALE TRANSPORT on the reverse. The other set was produced for Bury Corporation and these tokens had an obverse die error, with the title reading BURY TRANSPORT CORPORATION instead of BURY CORPORATION TRANSPORT. Neither the Rochdale nor the Bury tokens entered circulation but a few came in collector's hands. The Rochdale patterns were listed as 625ZA and ZB, but the Bury patterns - as was already stated by Mr. Capper - have never been listed, though to insiders it is known that one set was in Mr. Hazevoet's collection and now is in my possession.

Derby 240.

DERBY CORPORATION OMNIBUSES 3^D PREPAID

o B Tr Sd (blank) (29x26mm)

DERBY CORPORATION OMNIBUSES 1¹/₂D. PREPAID

o C 25 Sd (same as obverse) (pink)

D. C. O. D 3 P EMPLOYEES

B Ob Sd (blank) (26x30mm)

Listed by Mr. Capper in the Journal of the Transport Ticket Society of February 1972.

Grimsby 350.

GRIMSBY-CLEETHORPES TRANSPORT

o C 21 Sd 2p (gold)

pattern

This token entered my collection in March 1974!

Ipswich 415.

IPSWICH CORPORATION TRANSPORT

C 22 Sd 1p (red)

C 22 Sd 2p (blue)

Listed by Mr. Capper in the above mentioned Journal. As it seems there came no stocks of these tokens available for N.I.S.

Plymouth 590.

PLYMOUTH CORPORATION • TRAMS OR BUSES • (ARMS) (NEW STYLE)

C 25 Sd 1d. (black)

C 25 Sd 1¹/₂d (blue)

C 25 Sd 2d. (yellow) (vars.)

These tokens entered my collection in October 1971. I am not sure whether they are still in use or not.

B. & F. H.M. (black letters)
C 26 Pc (blank) (white)
BOOTH & FISHER R P K
C 23 Sd (same as obverse)(yellow)

Both tokens entered my collection in October 1972. Listed by Mr. Capper in the Journal of the Transport Ticket Society of August 1973. Bulk stocks did not come available.

= NOTES BY RALPH FREIBERG -

We begin with another of Mr. Tomberlin's tokens. The New Issues Service will no longer handle these because of some complaints. However any collector who would like one may purchase it by writing L.M. Curd & Son Limousine Service Inc. - 1346 E. 26th St. - Oakland, CA 94606. Send 50¢ +SAE.

We kept having difficulty getting the St. John, NB, token listed properly. We first listed it in October 1968 with an error, then omitted in the 1970 Atwood, and when it was relisted in April 1970 we still pulled a boner! So we're relisting it here along with the 750 B, which the N.I.S. hopes to be able to send to its members.

The Fall River token has turned up "in the flesh." We knew a thousand of them had been ordered in 1941 (along with 1000 of 260 C at the same time) from the Meyer & Wenthe records. Now a friend of Kevin's has sent him a rubbing of the token. The friend is a non-AVA member who drove a bus and the token was dropped in his fare box.

The Stephens & Son depotel was listed among the Mavericks in the TAMS JOURNAL.

The Mfg's Sample is the same on obverse & reverse as all the others in Group 16, on page 630 of Atwood.

Yours truly is still waiting for a number of other new issues. For instance we have been told that 200 of the Philadelphia Bicentennial tokens are now on their way to us. We also know of several tokens which have not yet been issued, such as a 20mm one from New York, the entire supply of which is in a warehouse under bond. Also there are two tokens in Ventura, CA, for South Coast Area Transit which haven't been put into use yet. And a lot of others. We'll have them all eventually.

We have received a supply of Pa 263 B which will be listed next month and will be available to N.I.S. members. See photos in July 1975 Fare Box, page 95. It took some doing to get these!

We also have a couple new issues from Queens in New York City on their way, and a few others we hope to have for next month.

= JUNE SUPPLEMENT TO THE CATALOGUE OF WORLD TRANSPORTATION TOKENS =

By Kenneth E. Smith

B A H A M A S

Nassau 600

The following information on the Paradise Island Bridge tokens comes from several sources. These tokens were made by Meyer & Wenthe, and Ralph Freiberg found in the M&W records that they were reordered several times between December 1966 and 1972. I know that they were also further reordered after 1972, so the number ordered is greater than the records supplied by Freiberg indicate. For some reason people keep these tokens as souvenirs and the supplies keep getting depleted. We have not listed them earlier as we were waiting for supplies from the manager of the bridge company. We have sent checks which he does not cash, and he doesn't send tokens. I'm giving up trying to get a quantity for New Issues Service, and will now list the tokens anyway. The usage of the tokens indicated below is from information supplied by the manager of the bridge company. The tokens were first shipped to the company December 13, 1966, and placed in use early in 1967. The tokens are:

PARADISE ISLAND BRIDGE NASSAU, BAHAMAS (LARGE B IN CENTER)			
RA	B 25 Sd	(same as obverse)(31,000 tokens struck)	\$0.50
(RA is used by employees of the Paradise Island company, at the rate of one per crossing. They are purchased in quantity in advance at 25c each.)			
PARADISE ISLAND BRIDGE NASSAU, BAHAMAS (LARGE C IN CENTER)			
RB	WM 27 Sd	(same as obverse)(12,500 tokens struck)	.75
(RB is used by commercial vehicles making deliveries. They are purchased in advance in quantity at 50c each.)			
PARADISE ISLAND BRIDGE NASSAU, BAHAMAS (LARGE D IN CENTER)			
RC	B 28 Sd	(same as obverse)(10,500 tokens struck)	.75
(RC is used by residents of Paradise Island. They are purchased in advance in quantity at 50c each.)			
PARADISE ISLAND BRIDGE NASSAU, BAHAMAS (PALM TREE)			
RD	WM 29 Sd	(same as obverse)(light blue enameled center 13½mm)	2.00
(One of RD is deposited in the box by toll attendant each time a normal \$2.00 round trip toll is paid by the public. These are not sold to the public.)			

Most of the tokens made of each of the above types have been kept by the public and the company has few on hand. Therefore they probably will not be scarce items as they keep showing up quite often. At one time they ran out of RA and RC and had a firm in Florida make some brass tokens for them as follows:

(LARGE B IN CENTER)(NO LETTERING)	
B 25 Sd	(same as obverse)
(LARGE D IN CENTER)(NO LETTERING)	
B 28 Sd	(same as obverse)

The above two items are of such a general nature that they will not be listed in the transportation token catalogues.

Remember when you report new discoveries, in addition to giving the exact wording, spelling, and punctuation, to send rubbings or photographs. This is essential to insure accurate listings. Please keep the listings coming.

The list of car wash token orders from Meyer & Wenthe that Feisel supplied me had over 200 different "unknowns". Most were the sofspra type. Nearly half the leads have been checked out and about 40% have supplied specimens.

Probably most of the above listings are obsolete at this time, but I priced those I obtained directly at 50¢. Other listings are priced higher when I definitely knew specimens could not be obtained by writing.

Harold V Ford 6641 Saroni Dr. Oakland, Calif. 94611

THANK YOU for the fantastic response for my personal token. Have some still--free--SAE please. My AVA number is 1125. Would appreciate your vote during TAMS elections this summer. I need your support. See you in St. Louis (and in NYC) in August!

Until August 22 all mail intended for THE FARE BOX should be sent to:
JOHN M. COFFEE, JR. - 4104 SIXTH AVENUE - TACOMA, WASHINGTON 98406

LOUIS F. CRAWFORD

With great sadness the Editor must announce the death of Louis F. Crawford, AVA #873, of Long Beach, Mississippi. Lou was an active, outgoing, and vigorous collector and friend. I remember his first letter to me, when he joined, was a note to say he was sending me a box of any kind of candy I liked, with his compliments. He was a candy salesman, and traveled widely throughout the South. His interests were beyond transportation tokens, evidenced by the work he was doing on a book on Mississippi and Louisiana trade tokens. He died on June 1, on the road in Monroe, La. He was 63. His son Louie, a college student, will continue the token collections.

June 9. Everything on hand has gone into this issue. Any ads that arrive too late for this issue will be taken west with me and inserted in the August issue, due about August 1. Speaking of ads for the August issue, because we must employ an expensive printing firm to print that particular issue, we must ask you not to send in "wanted" ads for that issue, and limit auctions to \$1 and up tokens. Just for that one issue.

Just received is the 1976 membership roster, the work of Bob & Anna Butler. A really fine piece of work, as always, and a valuable part of your membership. Bob & Anna have done this work for us for many years, as their contribution to the A.V.A. Again, as so often in the past, we say "Thanks!" for a beautiful membership roster.

Parking tokens bring high prices! Hank Hiorth reports that a NM 3040 A in WM brought \$56.00 in his auction! Speaking of auctions, all auctions in this issue will close July 7. I ran out of room on the back page for that little item.

Yosef Sa'ar writes from Elat, Israel, that he just acquired a couple of Italy 860 RA, the Ponte de Ferro bridge tokens of Venice. The token, he says, has a neat reeded edge, and he adds a spelling correction (see page 230, Smith Catalogue). It should read PASSAGGIO 3 CENTESIMI.

I am heading west on June 19, via Clinton, Ct.; Washington, DC; Charleston, WVa; Evansville, Ind; Chillicothe, MO; Omaha & Lincoln; Denver; Reno; and San Francisco.

1776

1976

= THE INLAND LIME AND STONE CO. TOKENS OF MANISTIQUE, MICHIGAN =

We learned about 3 mysterious tokens bearing the name of this company, from the records of Meyer & Wenthe. They were listed on Page 56 of the April Fare Box. A.V.A. member Joseph Canfield of Dearfield, Ill., promptly wrote to the company, which is a division of Inland Steel Company, and received the following interesting reply from Mr. John W. Hendricks, the Company Superintendent:

Dear Mr. Canfield: You wrote me recently about bronze tokens that were used in a transportation service at Inland Lime & Stone and I'll try to give you some information. We have a limestone quarry where stone is removed from the ground. About 7 miles from this quarry is our stone processing and shipping facility. Both of these operations are approximately 20 miles east of Manistique, Mich., where, over the years, most of our employees have lived. For about 25 years, until 1956, we operated our own buses to transport employees from town to our two locations. I understand we sold brass tokens to our employees which they in turn used for one trip on the bus. One style was used for transportation to the quarry--the other style for transportation to the mill. I'm not aware of a third style you mentioned in your letter.

These tokens were subsequently replaced by tickets the men purchased and the tickets were punched for each ride. The tokens were replaced, probably for a number of reasons, but one interesting reason is that the men would gamble on the bus trips using the tokens as winnings. In an effort to eliminate the gambling, the tokens were replaced.

Our search of our offices didn't produce any of the tokens for you. At the request of a Mr. Bob Kloida we posted a notice around our operations giving his address and telephone number. Some employee may have contacted him directly.

= JULY NEW ISSUES SERVICE REPORT =
By John G. Nicolosi

The following 4 tokens will be sent to you, and this will constitute the JUNE new issues: Pa 263 B; Pa 750 AY (SEPTA Bicentennial); NY 631 V and W. Thanks to our New York members, Lester Betters for V, and Mel Fox for W. Much appreciated, gentlemen.

For July you on my Canadian list will receive New Brunswick 750 B and Nova Scotia 100 O. The 750 B was obtained for us by a non-AVA member, Byron Moffatt of St. John West, NB. Mr. Moffatt is a friend of our Canadian member J. Douglas Ferguson. That merits our gratitude to both Mr. Moffatt and Mr. Ferguson.

Also going to you will be the elusive Appleton, Wis 30 D token, as soon as we get them. This one took the longest time to get.

I also want to stress that if you're attending the St. Louis convention, and do not want the tour token from me, please advise me at once.

From July 1975 thru June 1976 we sent out a total of 56 tokens; 47 from the U.S., 2 Canada; 6 foreign. This is a drop from last year, but then last year we had a lot of those Miscellaneous 1000 series items. So all in all not a bad year at all. We hope to make the Bicentennial Year a good one for New Issues Service members, with a bit of help here and there from members & non-members alike.

= DELAWARE VALLEY VECTURISTS MEETING MAY 16 =

DVVA convened at Joe Pernicano's office Sunday, May 16, and it was one of our very best turnouts. Present were Pernicano, DiMichael, Biery, Jordan and Mrs. Jordan, Zaika, Braun, Hiorth, Bergey, Schopp, Peters, Hansen, Paul. Len Paul came in on first with the new SEPTA Bicentennial tokens just released that morning.

Next meeting July 11, same place: Pernicano's office, 1260 Va. Drive, Girard Bank Sign, Ft. Wash. Industrial Park, Pa. All welcome, and we gather about 1 p.m.

ST. LOUIS CONVENTION AUCTION
AUGUST 15, 1976

Submit all bids to Joel J. Reznick, 120 S. LaSalle, Chicago, IL 60603

Rules:

- 1) All mail bids must be postmarked no later than July 25, 1976
- 2) Winning bids below \$10 will be reduced to 10% above the next high bid - winning bids above \$10 will be reduced to 15% above the next high bid.
- 3) Winning bidders will be responsible for postage and insurance on all items won.
- 4) All funds covering items won must be received before shipment is made.
- 5) All tokens guaranteed as stated.

NOTE: Small letter alone denotes Atwood stated variety; small letter with a slash (/) in front of it denotes non-Atwood variety.

= NOTES BY RALPH FREIBERG =

First this month: the school token from Albuquerque. In January of this year, 10,000 tokens were ordered to supplement their supply of school tokens, and as is so often the case, the company is afraid of selling any to the New Issues Service. So everybody will be on his own for this one. N.I.S. won't be able to handle it. They were very friendly and polite--as most folks are down in New Mexico--and said if they order more tokens they will sell us a supply. This particular token was made by Roger Williams Mint, rather than Meyer & Wenthe. Fewer and fewer tokens seem to be coming out of M&W. We think they're pricing themselves out of the market, since the recent change in ownership. Anyway the token was discovered by Mr. Miller when he was writing to various companies for tokens, and he got this one which wasn't listed.

The Jamaica Buses racetrack token will go into use with the opening of Aqueduct Park race track.

The line that uses NY 631 W carries employees over to Goldwater and Bird & Colar Memorial Hospitals on Franklin D. Roosevelt Island (formerly called Welfare Island). Tokens are sold to employees at 15¢ less than the normal New York fare. When New York's regular fare went to 30¢ back in 1970, and Steinway's employee tokens were being sold at 15¢, they started showing up in NYC turnstiles. So Steinway switched

from the 23mm Queensboro Bridge Ry. tokens (which they had been using) to a 16mm token (NY 631 T), still inscribed Queensboro Bridge Railway, but now with a picture of a bus on it. They stayed with 631 T when New York City upped its fare to 35¢. But with the 50¢ fare in New York City, Steinway continued with the 16mm tokens, but you paid 15¢ along with a token to ride the Steinway bus. Now they have a new token which is good for payment of the full 50¢ fare. Employees only may still buy the Steinway tokens at a 15¢ discount. In your Atwood, mark NY 631 Q obsolete and add (Vars.). The Queensboro Bridge Railway was operated by Steinway, who now at last has a token with its own name on it.

We finally got straightened out on the Delaware River Bridge tokens. In 1970 Franklin Mint made 5 million of these tokens. When the Bridge Authority needed more tokens, Franklin Mint was no longer making tokens of this type, so they ordered them this time from Mount Everest Mint (3 million). The chief difference between 263 A and B is the mintmark, but the die work is also quite different. See photos of the two tokens on page 95 of the July 1975 Fare Box. We were afraid we wouldn't be able to get the Bridge to pick out the new tokens for us; they were happy to do it, however, so N.I.S. members will get this one. Incidentally, when we ran the photos we guessed the mintmark was for Roger Williams Mint. We were wrong.

Then the Bicentennial token of SEPTA. SEPTA very kindly saved us 200 of these for N.I.S., in spite of the brisk sale of the tokens in Philadelphia. They arrived in Oakland on June 1.

We also have been kicking around a token of Appleton, Wis. These were made over a year ago, but till now we were never able to get past the office, to get a supply. They kept saying it would be "taken up by the Board." Fortunately Bob Kloida went in and saw the manager, who cut through the red tape and promised to sell us a supply. We hope to have them for the July shipment to N.I.S. members. This system is run by Fox River Lines, and subsidized by the City of Appleton.

We are waiting receipt of the Dartmouth, N.S., tokens. They promised to send us a supply. The token was discovered by Alan Weighell among tokens in Toronto.

A couple months back Gordon Wold said he would sell the St. Cloud token. See page 49, March 1976 Fare Box. He advertised Minn 730 J. For those interested in varieties, there is a variety on this one and it can be obtained from Mr. Wold.

Mr. Coffee will be in California between July 1 and 12, and during this time there will be extensive discussions by members of the Catalogue Committee about various listings, some of which are dubious. If you have anything you don't agree with or suggestions about listings, please write me by July 1 and we'll take it up in our discussions out here. Also if anyone has any unlisted tokens, please report them to us by July 1, so that Mr. Coffee can include them in the new Supplement to Atwood which he will be working on this summer.

= THE STRANGE REVERSION TO THE TYPE 2 BUS =

By Ralph Freiberg

Over the past 23 years, tokens bearing pictures of a bus on them have employed the style of bus we call "Type 3 Bus." We have assumed that a token with a round ball in the center, and only 2 slots around the ball, always had the Type #3 bus on it. Probably the first token employing Type #3 bus was a 16mm one of Bozeman, Mont., reported in the February 1953 Fare Box. We assume the token came out late in 1952 or early in 1953. And so it continued into 1973, when such tokens as Ark 4.0 S T; Okla 860 R; Vt 180 C, appeared with Type #3 bus.

But in 1974, and ever since, something strange has happened. They've gone back to using the old Type #2 bus! So now we have to spell it out, whether it's #2 or #3 type bus. Some recent tokens with type #2 bus are ILL 535 B; Minn 510 E F; NY 631 V; Tenn 75 M; Wis 700 I. So we no longer can date a token by the type of bus on it.

Also, we used to be able to date a token by its diameter. For a long while all "16mm" tokens were 16.48mm. Now they are back to using 16.53mm, which they had stopped using back in the old streetcar days.

Why the change? Possibly there was a patent on the Type #3 bus. We just don't know, but we're going to find out if we can.

Our 350th Issue

BERNARD KEITH and JAMES MANNING JR.

It is with great sadness that I must report the death of two active members. Bernard Keith of Detroit, AVA #485, was a pioneer member. He was Manager of Collections for the Michigan National Bank, and President of Cooperative Services, Inc. He was not only an avid collector, he was a thorough student of tokens, medals, and advertising materials in general. He died June 21, age 66, after a long illness. We shall miss his frequent informative letters and his friendly influence. Jim Manning of Long Beach, CA, AVA #825, was an active member of the Southern California group and rarely missed a meeting. Confined to a wheelchair for the last 28 of his 50 years, Jim didn't let this cramp his style. He drove his own car, had an invariable cheery countenance, and was an inspiration to everyone who knew him. He died early in June, and we remember him with affection, respect, and gratitude that he was one of us.

July 25. Here is our usual little midsummer issue. The September issue, usually the largest of the year, will go out the last week in that month, so we have a long pause to catch our breath in the meantime. I am using the summer to prepare a large and comprehensive Supplement to the Atwood Catalogue, which will be ready by the end of the year, a much more elaborate book than the little 1973 job. More about this—and my fascinating trip across the country—in the next issue. Suffice it to say I have so far picked up 6 of the census tokens I predicted, and the summer's only half over! Incidentally I found a couple dozen 1973 Supplements here. \$1.50 if anyone wants one. Also have Atwoods (\$8 postpaid) and Car Wash books (\$4.50) here in Tacoma if anyone wants to order during the summer.

The big AVA Convention will be held August 13-14-15 at the Bel Air Hilton in St. Louis, and the Convention program is included as part of this issue. Your Editor can't make it this year—too busy on the Supplement—but it will be a great gathering, and I hope we can give Joel a big turnout. That Friday night riverboat banquet should be fabulous. Joel says to bring your big AVA horsecar badge if you have one, by the way. Be sure to let him know in advance if you're coming, so he can get you onto the boat Friday night.

Now back to the Supplement. It'll have most of the Meyer & Wenthe information in it, photographs, all listings since 1970, and lots more historical data. Cloth bound or unbound.

THE AMERICAN VECTURIST ASSOCIATION

**PRESENTS
ITS**

28th ANNUAL CONVENTION

AUGUST 13-14-15, 1976

**BEL AIR HILTON HOTEL
ST. LOUIS, MISSOURI**

Convention Chairman Joel J. Reznick

OFFICERS 1975-77

President Joel J. Reznick
Vice-President Robert R. Kelley
Secretary Donald N. Mazeau
Treasurer R. K. (Toby) Frisbee
Editor, Fare Box John M. Coffee, Jr.
Chairman, Catalog Committee Ralph Frieberg
Chairman, Tribute Fund Robert M. Ritterband
Curator. Sidney J. White
Immediate Past President Syd Joseph

SCHEDULE OF EVENTS

FRIDAY, AUGUST 13, 1976

REGISTRATION 9:00 A.M.

The Gallery Room (on the lower level) will be open all day until 6:00 P.M. for swapping and socializing.

Coffee and rolls will be served at approximately 10:00 A.M.

EXECUTIVE BOARD MEETING 2:00 P.M.

BANQUET & TOUR 7:00 P.M.

We will board The Samuel Clemens (at river front) beginning at 7:00 P.M.

The tour will leave the dock promptly at 7:30 P.M. and return at 10:30 P.M.

SATURDAY, AUGUST 14, 1976

BUSINESS MEETING 9:00 A.M.

(In the Gallery Room)

COMMITTEE REPORTS 1:00 P.M.

When committee reports are completed, the balance of the afternoon and evening are open for you to do as you wish — attend the Missouri Numismatic Association Convention at the Marriott, visit the Gateway Arch, the Railroad Museum, the famous St. Louis Zoo, the Riverfront, restaurants, Budweiser Brewery, Busch Stadium, swim in the hotel pool - anything you wish - or stay in the Gallery Room for swapping.

SUNDAY, AUGUST 15, 1976

ANNUAL AUCTION 10:00 A.M.

(In the Gallery Room)

We will break for lunch at noon and continue the Auction at 1:00 P.M. until completion.

PEERLESS STAGES OF THE EAST BAY

By Harold V. Ford

Peerless Stages was organized by five jitney drivers (Gaeta, Held, Dunbar, Perry, and Fish) in 1917. Jitney service between Oakland and the East Bay suburbs south to San Jose really began about 1914, with over a dozen independent operators by 1917. In that year the California State Railroad Commission extended its authority to cover the state's intercity jitney operations; hence the need to consolidate and incorporate. Passing note: other jitney drivers joined the new Greyhound system which did not compete with Peerless routes.

Oakland was, and still is, the base of the Peerless intercity operation. From 1917 to 1921 the service remained a jitney operation. In 1921 the first 8- and 12-passenger buses were purchased. In the 1920's service was extended south from San Jose to Santa Cruz, and in the 1930's service to Castro Valley and Palo Alto was added.

During the 1920's and 1930's the Oakland, San Leandro & Hayward routes competed with Eastbay Street Railways, Ltd., for local service, frequently on the same streets for patronage. Competition was cutthroat. Peerless buses would block out the other lines' streetcars for customers. Both lines advertised heavily in the Oakland Tribune.

By 1935 Eastbay Street Railways also operated buses in the three East Bay cities of Oakland, San Leandro, and Hayward. Peerless sought and received a State Railway Commission order to halt the competition. Eastbay Street Railways then obtained a federal injunction stopping the Commissioner's order. The resulting law suit soon reached the U.S. Supreme Court, where Peerless lost.

As a result of the bad blood between the two competitors, a rate was initiated by Peerless. It obtained permission from the State, on December 26, 1935, to reduce its zone fares from 10¢ to a token fare of 8 for 50¢. Its competitor was offering a token zone fare of 7 for 50¢ (Cal 575 E, first placed in use * 7/5/31). The zone lines were located at San Leandro and at Hayward. This would permit passengers on Peerless routes to ride to Oakland from San Leandro for 6¼¢ and from Hayward for 12½¢. Cal 575 F was issued at this time. The die work is different from other known issues of this era. It is probably the only known bus token struck by Patrick of San Francisco. Specimens have been found in their sample box, thus proving their origin.

The rate war did not last long. In the summer of 1936 Eastbay Street Railways Ltd. took over the local bus transportation services between Oakland, San Leandro, and Hayward, paying Peerless a "consideration" or \$200,000. Therefore Cal 575 F was used for approximately six months.

Two other Peerless tokens are known: Cal 575 G and H. Meyer & Wenthe records show that 10,000 of the 575 G were struck on December 28, 1935. I believe that this issue was never placed in use since this issue was unknown to collectors until 1964 when George Fould obtained a specimen by writing Peerless. I then visited Peerless and was able to secure a quantity for Nicolosi's New Issues Service. About 100 examples were needed at that time.

The 20mm token, Cal 575 H, was first listed in Morganthau's 1944 Check List. The die work is probably Meyer & Wenthe, though their record's don't show this token. It is my opinion that this near nickel-size is a pattern issue that was rejected by Peerless due to its size and probably the type of fare box then in use. The census somewhat supports this theory since only eleven or twelve specimens are known by me to be in collectors' hands. Also I visited Peerless in 1964 and showed the oldtimers the specimens of all three of the known Peerless issues and none remembered the 20mm Cal 575 H.

Since the Second World War, San Jose was one of the fastest growing metropolitan areas in California. The population is close to that of San Francisco. Starting in the mid-

1950's Peerless offered service into the newer suburbs. All local service was discontinued in 1973 when the local San Jose transit authority was expanded to include the new areas.

When I first contacted Peerless in 1964 they only had one roll of Cal 575 F left, plus a bag of 575 G. I was told that 575 G would be used if they went to a token rate in San Jose. This never happened.

In the late 1960's a freeway was built near the Peerless headquarters building, and they had to reduce the size of their office building by at least 50%. I have visited their remodeled office several times in recent years and have been unable to obtain any of their token issues, which leads me to believe that they disposed of their excess baggage when they remodeled due to the freeway.

Peerless Stages is still in business in 1976, operating interurban bus services between Oakland south through Fremont to San Jose, and on to Santa Cruz on the coast; plus a second route, Palo Alto across the Dumbarton Bridge east to the East Bay cities of Newark and Fremont, connecting up with the southern end of the Bay Area Rapid Transit.

= AUGUST NEW ISSUES SERVICE REPORT =

By John G. Nicolosi

First, I regret the delay in obtaining the Appleton, WI, tokens. These still have not arrived, although they are promised to us and now we have been told they definitely are on their way. Non-NIS members who sent money for one, your money has been returned. I'll put the token aside for you if it ever arrives, and you can re-order with your next order.

The July foreigners are in the mail to you who are on my foreign list. I've also received the September foreigners and these also have been sent you. As usual, our thanks to Kenneth Smith for getting these for us. We are short on one of the September foreigners, so these go out "according to seniority." The little bonus that was sent you with the July sendings, the little ticket, was with the compliments of our good friend from Holland, Mr. F.J. Bingen. The ticket was used as emergency money. It pictures the first railway in the Berlin Industrial Exposition of 1869. There are several in the set; we could only get one.

The Convention token, a real beauty, will be sent you right after the Convention is held. Meanwhile I wish to compliment the Butlers again for a beautiful job on the 1976 AVA membership roster.

I'm working on more new issues. Please keep your NIS account in the black!

= THE GEORGE A. BROOKE BUS & TRANSFER OF OSCEOLA, NEBRASKA =

By Charles Littlefield

George Brooke was born in Illinois, and married Mabel Pratt on October 19, 1898. He had come from McCool, Neb., to Osceola to work in a drugstore owned by Mr. David Kunkel located in the Pratt Hotel.

The Pratt Hotel was owned by Mr. Brooke's in-laws, Mr. & Mrs. L.M. Pratt. Mr. Brooke worked in the drugstore, had a garden near the Hotel, and worked around the Hotel doing odd jobs. He started the Geo. A. Brooke Bus & Transfer about the year 1900. The bus operated from the Hotel Pratt to the depot, and also carried mail to the postoffice. It was a horse-drawn hack.

The line went out of business about 1915. The automobile had replaced the horse. Later, George Brooke became the town druggist. He died some 40 years ago. Hotel Pratt is still standing, but the name has changed.

Will trade any of following tokens. Make up your trades from this list of available items in exchange for any of my wanted Pennsylvania tokens which appear at end of listing. Underscored nos. are census tokens.

SEPTEMBER, 1976

Our 351st Issue

September 22. This issue includes a complete report on the splendid St. Louis A.V.A. Convention, as well as full minutes of its business sessions. We understand it was exciting, well attended, and the banquet aboard the boat on the Mississippi was outstanding.

It has been a long and busy summer for many of us. Your Editor drove by auto across America again, my first motor trip to the West Coast since 1969 when I hauled our IBM Executive typewriter to Tacoma to type the Atwood Catalogue. This time again I hauled our typewriter with me, this time to type the 1977 SUPPLEMENT to the Atwood Catalogue. This book has been finished, and it will come to approximately 240 pages cloth-bound with lots of hitherto unpublished photographs. It will include not only all listings since the 3rd edition of the Atwood Catalogue was published, but also lots of additional historical data on the new listings as well as on previous listings. The big feature of the book, however, is that a large portion of the data digested from the Meyer & Wenthe records has been included. We have included exact mintage figures, exact dates of striking, on hundreds and hundreds of tokens. When you see the book you will agree that our cost in acquiring these was well worth it, and the general knowledge of our hobby has been enormously enhanced. The only thing I am waiting for is the photograph prescreens to be returned to me. As soon as I have them, probably in ten days, I shall affix the pictures to the copy for the book and ship it off to the printer. In the next issue (October) I hope to have cost figures, and at that time will call for advance orders from members. The advance order price will be virtually at cost. The book will also be available, on advance orders, in loose-leaf form and possibly also in a lie-flat spiral binding.

I left Boston on Saturday, June 19, and spent my first night out with AVA Secretary Don Mazeau in Clinton, CT, and enjoyed studying his magnificent collection of Latin American transportation tokens. Don specializes in Latin America now, and must have the finest collection of these tokens in existence.

Next day, Sunday, I drove down to Indian Head, Maryland (just south of Washington, DC) and spent a couple of days with David Schenkman, who is a specialist in all types of tokens. His transportation token interest is mainly in celluloids and vulcanites, and the State of Virginia. In the latter state he only lacks about three to be complete. I always pick up some information when I visit David, and was not disappointed this time. First of all, he had learned that the token we list as KY 885 A was used on a stern-wheel ferry named "K. & I." which ran between Hawesville, Ky., and Cannelton, Ind. This being the case, the listing should be moved from Uniontown.

1776

1976

-September 1976-

We have information that a token-using ferry did operate at Uniontown, but apparently it was not the K. & I. Ferry. Incidentally we definitely know a token-using ferry ran at Calhoun, Ky., also. I searched Calhoun back in 1969 for the token, but no luck. David also had a couple of interesting unlisted mavericks:

MACON STREET RAIL ROAD [all letters incuse on both sides]
WM 26 Sd I Buy My Groceries From Greer Lake & Co. And Pay For Them
GOOD FOR -1- TRIP ALMY EXPRESS
B 25 Sd Chas. Pick & Co. Dealers in (goblet & utensils) Chicago

While staying with David I also learned that he had acquired a few rare listed tokens, including two Va 660 B. We had suspected this was really from Portsmouth, OH, but since David found them in Norfolk, the Virginia listing must be correct. He also picked up the beautiful Ind 680 E, the New Albany picturing a streetcar.

On Monday, June 21, I drove into Washington with David, left him where he works, and took the bus downtown, to ride the new D.C. subway. It is a magnificent subway, and will eventually be quite extensive. At present only one four-mile line is open, but the equipment is beautiful, similar to that used on BART in California. I rode four round-trips, I enjoyed it so. Fare was, if my memory serves, only 35¢ in the middle of the day, but 55¢ during rush hour. They have no turnstiles. You simply drop the fare in coins in an old fare box in the subway station, watched by an employee, and walk in. They do not make change in any subway station; you must get correct change elsewhere and bring it with you into the station. They have a huge parking lot at the Rhode Island Avenue station, and one may park all day for a dollar. To exit from the lot, however, one must use a parking token which may only be obtained in machines in the subway station. They had two machines when I was there, which would take a multiple of coins, or a dollar bill, and out came the token, which is described thus:

PARKING TOKEN M
WM 27 Sd (same as obverse)

The "M" on the token is the logo for the transportation authority in Washington which operates the subway system and this particular parking lot. Eventually many other lots will open.

From Washington I drove across northern Virginia, and West Virginia, thence across Kentucky and southern Indiana, staying at Mt. Vernon, Illinois, after visiting Grayville, Ill., and examining the old ferry slip where the Grayville Webb Ferry operated. Of course it is now defunct. From Mt. Vernon I drove north of St. Louis, across Missouri with a visit to Fulton, thence to Lincoln, Neb., and stayed with Roger Bolz. Roger had several unlisted depotels, and I prevailed on him to let me photograph them, and list them in the 1977 Atwood Supplement. Roger's apartment is fabulous: there are tokens of every description on every level surface in sight! I examined his nearly complete collection of Nebraska transportation tokens, of course.

From Lincoln I drove across Nebraska, stopping off at Atlanta, Neb., to see where that little "Exchange Bus" token was used. The site of the old prisoner-of-war camp is about a mile outside little Atlanta, and I drove off the highway and walked over it. Nothing remains except cement slabs, the whole dominated by a monstrous TV tower which must be over 1,600 feet high. The wind blew gently across the prairie and it was a fascinating and thoughtful experience, standing alone there in the beautiful Great Plains of southern Nebraska, glad that we don't have prisoner-of-war camps any longer. Of course I found no tokens and didn't expect to, although I did kind of look around in the grass there, hopefully. A nice visit with the post-mistress at Atlanta got me the name of someone who owns a token, but no luck yet.

Then on into Colorado, arriving at the home of AVA Treasurer Toby Frisbee about 7:00 p.m., Friday, June 25. Syd Joseph came over and we talked tokens for hours on into the night. Next day we had a wonderful gathering of the faithful at the beautiful home of Flo and Tom McDonald, with 20 people present plus two children. Present were Mr. & Mrs. H.E. Jobes; Mr. & Mrs. Ed Young; Mr. & Mrs. Charlie Max; Mr. & Mrs. Bob Seger; Mr. & Mrs. Clay Welty; Mr. & Mrs. Chuck Matson and children; Syd Joseph; Bob Gaarder; Gene Schaetzel; Hazel Miner & Toby Frisbee; Flo & Tom McDonald, and Your

Editor. What a wonderful bunch of people we have in Denver! The conversation was great and the food was lavish. All in all a splendid gathering.

After spending two nights in Denver with Toby, I left early Sunday morning and headed up over the mountain wall, straight up over the Rockies and through the imposing Eisenhower Tunnel at the 11,300-foot elevation mark. The scenery was glorious and the weather crisp, cool and sunny. Then down into the valley at Grand Junction, across the hot emptiness of the desert to Provo, Utah, where I spent the night. Then to Salt Lake City and across the desert to Reno, Nevada, where Ralph Freiberg met me and we "did" the casinos that evening. Neither of us lost a nickel, but we did cash in the coupons we got from the motel for a few dollars worth of nickels, which we pocketed. Next day we visited fabulous Virginia City and Carson City, site of next year's AVA convention, and were impressed by the Convention Hotel. Then around the southern shore of beautiful Lake Tahoe, over the Sierra Nevada Mountains, across the hot Sacramento Valley to Sacramento itself. There we visited the offices of the transit authority to get the Cal 715 Z, AA, and AB. At first they denied any knowledge of the AA and AB, but I finally found a friendly man in authority who let us purchase 20 of the AB. But no one knew anything about the AA--the one with two obverses. So we drove downtown and bought more tokens at a booth on the mall. Tokens are only for the use of children and the elderly, but apparently anyone can buy them. They only cost \$2.50 for a roll of 20, but as a fare increase was pending they limited the number of rolls you could buy to one roll. Ralph and I each bought a roll, hoping to find the elusive 715 AA token. Ralph found none. One by one I went through my roll. It was a collection of every common 23mm token ever used in Sacramento: I found 715 L, R, S, W, Y, Z, and AB. Then, hurray! I found one--just one--of the rare 715 AA with two obverses and no reverse. So the ride from Sacramento to Oakland was a pleasant one.

Arriving at Hal & Louise Ford's home in the Oakland Hills is one of the things I look forward to every year. The couple weeks I stay with them are probably the best weeks of the whole year for me. Of course when I showed Harold my Cal 715 AA, he promptly insisted we drive back to Sacramento next day so he could get an AA, too. We did, and he did. We bought four rolls of tokens between us, and Harold found two of the 715 AA token among his forty odds and ends. So he, too, was happy. I advertised the extra Z's and AB's which I had to buy to get my one AA, in the August issue. Though I had about 40 of the AB and 15 of the Z, they were snapped up even at 40¢, I discovered! Even at that price I didn't get enough back to pay for the trip to Sacramento, but then that is only part of it and the main thing is just going there regardless of the cost.

On July 4, the Fords and Ralph and I rode the Castro Point Railway at Richmond, which only operates three times a year. No fares collected at all. They did have one of the tokens glued to a fare box which they passed around for donations.

On July 11 there was the annual get-together at Duane Feisel's home in Los Altos, and we had a good crowd: Feisel, Coffee, Ford, Freiberg, Nicolosi, Lerch, Noll, John Reynolds, Album, Schimmel, Nichols, Cooney, Kile, Dunn, and Spofford, with many wives and children. A delightful afternoon, and the food was sumptuous, as always.

Monday, July 12, I headed north, staying over at Eugene, Oregon. Then a morning visit to Corvallis as we had heard they were using tokens. Well, they are. But the "tokens" as they call them are actually cardboard tickets. They have a single bus that goes round and round.

Arriving in Tacoma on the 13th, I learned that both Lake Drive Transit tokens are still in use. A pleasant visit with Clarence Heppner in Seattle, and the rest of the time at the typewriter preparing the 1977 Atwood Supplement book, which turned out to be much larger than anyone had anticipated. I also discovered I had forgotten to bring any headsheets for the August Fare Box. Fortunately found one old one, and used that, off-set, for the front page of the August issue, and that's why it had a black masthead.

I left Tacoma for Boston on August 22, and got here on the 27th, not stopping to see anything or anybody. Just wanted to get back. It was a good summer. I picked up about 8 census tokens for the collection, visited with a lot of wonderful people, and saw a lot of a wonderful country. Probably the thing which impressed me the most was that everyone I saw, strangers, other motorists, everyone, was friendly and helpful. A new spirit seems to have come over America in our Bicentennial Year.

Some Convention Highlights

The 26th Annual A.V.A. Convention is now history and the thing that will stick in my mind for years to come is the amazing Gateway Arch. For those of you who missed the convention an opportunity has slipped by - an opportunity you should plan not to miss in 1977!

The proceedings opened with the now traditional pre-convention gatherings. Collectors began arriving at the lovely Bel Air Hilton days ahead of time! Early birds Reznick, Joseph, Bolz, Kloida, Cunningham and others did some heavy swapping even before Friday rolled around!

Nearly everyone hosted a room meeting at one time or another. Bob Kloida and the Missus had a room full of cheese and crackers and smoked goodies from Wisconsin. Needless to say, their room proved to be rather popular.

While attendance was down overall from Los Angeles, the conventioners more than made up by very active bidding, buying, swapping and selling. Many census tokens changed hands, more often by private treaty rather than by swap. Are the days of the swapping collector nearing an end? We hope not.

Tables were again made available for "dealing." Having a table to lean on and to throw tokens across seems to be an attractive feature. While no "dealers" were present, probable 12-15 collectors displayed their wares in this manner at one time or another.

Besides the convention business of meetings and auction described elsewhere in this issue, there was the inevitable sightseeing. My favorite spot was the Arch. As a student of science and engineering, I marvelled at the construction of this spectacle. It stands 635 feet high and was built section by section, the two legs meeting "way up there" just as planned. A film was shown before hand, the film adding a deeper appreciation to one of our newer national monuments. Incidentally, the people there do not issue a token for the four minute "train ride" to the top!

Most collectors would nominate the boat ride as the best attraction. Beginning at 7:00 P.M. we all piled onto the Mark Twain, a somewhat contemporary riverboat operating fulltime out of St. Louis. During the 3½ hour ride, we saw the riverfront of upper and lower St. Louis and East St. Louis. The pleasant excursion was punctuated by a banquet, featuring sirloin steaks. This was accompanied by the music of a two-man Dixieland band! While some collectors capped the evening by a cool ride out in the open air, others were inside having a good sing-along.

On other evenings nightclubs were visited, along with other local attractions, such as the Museum and the Zoo. Trader Vic's, at the hotel was popular, but in our opinion the service was much better than the food!

For the wives and children there was a lovely covered pool, a rooftop playground and the usual shopping.

Next year - Carson City, Nevada. Plan on it! You won't regret it!

= THE 1976 CONVENTION OF THE AMERICAN VECTURIST ASSOCIATION =
= Minutes of the meeting =

The twenty-sixth annual convention of the American Vecturist Association was called to order at 9:15 A.M. by president Joel Reznick in the Gallery of the Bel Air Hilton in St. Louis, Missouri on Saturday, August fourteenth.

The convention was attended by forty-two members of the Association. These were: F. Barnett, Bassett, Bolz, Burzinski, A. Butler, R. Butler, Cassidy, Coney, Cordes, Cunningham, Dawson, Dewey, Faubert, Feldpausch, Frisbee, Garrison, Harris, Heitman, Killstrom, Hope, Irwin, Joseph, R. Kelley, Kloida, Laflin, Lipscomb, Littlefield, Lubetkin, McDonald, Mehnert, Murray, Olesser, Pancratz, Reznick, Robillard, Roselinsky, Schmalgemeier, Jack Smith, Sutton, Swann, L. Thompson and Vacketta.

There were twenty-nine visitors as follows: Mmse. Coney and Mother-in-Law, Cunningham, Dawson, Faubert, Garrison and son Grant, Harris, Heitman, three daughters and Mother-in-Law, Kelley, Kloida, Kolb, Lipscomb, Littlefield, Lubetkin, McDonald, Mehnert, Murray, Pancratz, Roselinsky, Smith, Sutton, Thompson and Vacketta. Members and guests represented the eighteen States as follows: Arkansas, California, Colorado, Connecticut, Illinois, Indiana, Iowa, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, Tennessee, Texas, Utah, Virginia and Wisconsin.

A welcome to all was given by Joel Reznick, president and convention chairman of the Association. He also explained to those present that the reason the convention was set up a new way (with the banquet and tour together) was to cut down on expenses and to give people more time to see the city.

Two committees were appointed: (1) a Resolutions Committee to consist of Messrs. Murray (chairman), Schmalgemeier and Hope and (2) an Audit Committee to consist of Messrs. Joseph (chairman), Garrison and Butler. These committees to report during the second portion of the meeting.

Reports on the expenditures of the Organization were given. The first was that of Donald Mazeau, Secretary, who sent a hello to all and regrets of not being able to attend. The total secretary expenses for the last convention year were \$99.11. It was moved and seconded to approve these expenses and to reimburse the secretary. Motion carried. Reports from John Coffee, Editor of the Fare Box, Toby Frisbee, treasurer and Robert Ritterband, Tribute Fund chairman were also given. These will appear in the Fare Box at a future date. All reports were unanimously accepted.

An explanation of the Tribute Fund was given by Reznick. It is a fund used to honor any occasion. Only the donor, Ritterband and Frisbee know what amount was given. The person honored is notified that a donation was made to the fund. The fund is to be used for a publication or something of lasting value to the entire membership in the future..

John Nicolosi of the New Issue Service sent his best wishes to all and hopes for the best convention ever along with regrets of being unable to attend.

Due to the rise in expenses, especially postage, the Executive Board requested an increase in dues from \$6.00 to \$7.50. Postage has increased 33% in the last year alone. Life membership as of January 1, 1977 would be \$150.00 instead of \$120.00. The fact was brought up that there are still life members who joined for \$60.00 receiving the Fare Box. It was suggested that the dues be raised to \$8.00 instead of \$7.50. Mention was made that some members would be unhappy about this much of an increase. The increase is strictly to cover postage costs. It is necessary to send

-Page 116-

the Fare Box first class so that all members receive their copies at approximately the same time. It also states in the by-laws that first class mail must be used. New membership fee is still \$1.00. A motion was made by Ben Odesser to raise the annual dues to \$7.50 and life membership to \$150.00. It was supported by Robert Dewey. The motion was unanimously accepted by all members present.

A subject that was discussed last year was brought up again. When a member sends something to another member, insure it and keep the slip. Also, buyers, have the courtesy to send a postcard letting the sender know you have received the merchandise. The sender can also request a return receipt from the post office for 25¢ on anything over the minimum insurance rate. If for some reason the return receipt does not come back, you can request a tracer to be put on the receipt. It was also mentioned that it is not a good idea to reinforce with scotch tape because the post office stamp will not stick to it. Jiffy air bags are good to use in packaging because they are light and protect well. They cost about 5¢ each when you buy 500 or more. If anyone has any problems with the membership (off-color letters, tokens not up to par, etc.) please let the president know so that the problem can be solved quickly.

It was also brought up by Reznick that most philatelic and numismatic organizations have their own group for the authentication of material. A picture of the item is taken and sent back with it to the owner. This is not an immediate possibility but perhaps in Carson City next year we can make a definite decision on the service. Expertisement could possibly be done once a year at the convention to cut down on costs involved.

A report on Syd Joseph's variety work was given by Reznick. Joseph, an expert in the field of token and stamp photography, has begun photo work on type collecting. It is a way to continue a collection at a reasonable cost. Much photographic work is being done for the A.V.A. itself. It was recommended that Joseph be able to submit bills for work done for the organization. All varieties of Colorado tokens have basically been completed and work is now being done on other states. Some other members actively involved in type collecting are Ralph Hined, Greg Prgommet, Bill Garrison, Gene Godsoe and Gene Harris. If you have varieties, send them to Joseph insured and he will photograph them for the Association and return them insured with a complimentary photo.

President Reznick noted that it was good to see people at the convention for the first time such as Paul Pancratz and wife from North Dakota, Terry Cassidy, Lee Hope and the Swanns from Tennessee. He also expressed pleasure and gratification from working with this organization.

There being no old business, the first item discussed as new business was the question of whether or not there were any provisions for the widow of a member to dispose of his collection. There are no specific provisions made but it was pointed out that normally the president and editor of the Association are notified upon the death of a member and they in turn notify the membership. There are many dealers in the organization who are willing to buy a collection and will deal fairly.

Frank Roselinsky relayed greetings of the California members who could not attend the convention to all those present.

Since it takes as much planning for a convention of our size as a larger one and some exonomic organization conventions are poorly attended, it was suggested by the executive board that we should invite other groups to hold their conventions in conjunction with ours. Our membership collects things other than transportation tokens and if we invite other groups in, the organization would be able to broaden it's horizons. There is a possibility of a new group being organized like the United Exonomists of America. It was mentioned that some groups hold

meetings at the A.N.A. convention because they need something to hold on to. It was also mentioned that the A.N.A. provides free meeting rooms to all groups and that most collectors were coin collectors first and may still be and would not be interested in having a convention unless it was in conjunction with the A.N.A. convention. Some groups do meet apart from the A.N.A. and possibly we could invite them to come. The discussion gives the membership something to think about until the 1977 convention in Carson City.

The president mentioned that we were happy to have Mr. Robillard with us and we miss Bill Carr. A special first time welcome was given to William Cordes who has just applied for membership.

A report on the membership roster was given by Bob Butler. He pointed out that each year they get one or two complaints from members that their names were omitted. The roster lists only those members in good standing who have paid their membership dues by March first. If dues are not paid on time, your name will be omitted. Also, the Butlers do not feel that the roster is complete in regards to the type of tokens members collect. Members should please let them know what you collect and what you would like listed. Space limits what can be included in the roster and since this is a transportation collectors organization, that is all that is currently listed. The Butlers need the cooperation of all our members so please let them know what you collect and if there are any changes.

It was mentioned that members should please send a SASE if you are requesting something from another member. It will help you get a response.

Quincy Laflin asked if anything had been mentioned about Duane Feisel on new issues. Last year and this year by executive board, it was decided that all the dies now held by Joseph not transportation related should be disposed of. It is felt they should be made available to the T.A.M.S. at a reasonable price. The money from the sale of the dies will be put back into the Life Membership fund. All dies will be defaced by putting a line across the face before they are sold. This is to protect new collectors years from now. There is now the possibility that they could be restruck. The transit dies will be kept in the vault for future A.V.A. use. There are about 100 dies, 23 of which are transportation. After discussion, it was decided that the dies will be offered to the A.V.A. members first. A list will be published by Joseph and put to auction in the Fare Box with a minimum bid of \$10.00 each.

Reznick welcomed another visitor, Mike Pfefferkorn.

The morning session was adjourned for lunch and committee meetings at 11:20 A.M. until 1:00 P.M.

When the meeting resumed at 1:05 P.M., Reznick asked that the first item be considered as part of the first session. His proposal was an amendment to the by-laws to take effect in 1979. The article in question was article number 6, section 1 dealing with the executive board. As the section now reads, there are seven members on the executive board. The proposal would increase this number to nine. Three reasons were given for the change: (1) to provide greater possibility of quorumship to be able to hold executive board meetings at the conventions, (2) to have a greater number of people involved in the organization and (3) to charge various committee heads with other responsibilities. The two added members would be (1) the chairman of the Tribute Fund and (2) the convention chairman. The proposal could not take place until 1979 because the president is now the convention chairman and will be the past president for the next two years. The same person cannot hold two positions on the executive board at the same time. The amendment must be approved by two-thirds of the convention and then it must go to a general election of the membership. It was suggested that the idea be

left as a proposal for the next convention to consider. Since there was no motion on the floor, it will be reconsidered next year in Carson City.

At this time, the first session was readjourned and the second session officially begun.

Joseph stated that all finances were in order and the Audit Committee suggests that the treasurer's report be accepted as read. The report was accepted unanimously.

The Resolutions Committee proposed the following resolutions:
(1) Resolved that the A.V.A. recognize the continuing efforts of Bob and Anna Butler for their painstaking work in preparation of the A.V.A. Membership Roster, (2) Resolved that the Fare Box editor, John M. Coffee, Jr., should be offered the accolades of the A.V.A. not only for his production of a fine hobby publication, but also for the enthusiasm, elan and dedication to vecturism both in his editorial and personal activities, (3) Resolved that John Nicolosi be commended by the A.V.A. membership for his dedication to vecturism and persevering labors in providing the valuable new issues service, (4) Resolved that the A.V.A. membership express the admiration and esteem with all regard to Toby Frisbee, the organization treasurer and a friend to all, (5) Resolved that the A.V.A. express its appreciation to Syd Joseph, photographer par excellence, for the highly professional token photography furnished the organization as a whole, and members as individuals, which has furthered the knowledge of the membership, (6) Resolved that Paul and Sue Cunningham be offered the commendation and gratefulness of the A.V.A. for their yeoman voluntary efforts in providing the A.V.A. membership the Personal Token List and the Index to the Fare Box, (7) Resolved that the A.V.A., in convention assembled, express appreciation to Sue Cunningham who has acted as convention secretary during annual A.V.A. meetings of the membership at the 1975 and 1976 A.V.A. conventions, (8) Resolved that the A.V.A., in convention assembled, pronounce its gratitude and admiration to Joel Reznick for the planning, preparation and execution of a most successful 1976 convention and an outstanding banquet and tour on the Mississippi River, (9) Resolved that the A.V.A. express its appreciation to Ore Vacketta for his donation of the Farebox manufactured by the Johnson Farebox Company which was auctioned at the annual A.V.A. Convention auction the proceeds of which are to be dedicated to the tribute fund. It was moved and seconded to approve the Resolutions Committee report as read. Motion carried.

Mention was made of the fact that there were no displays at the convention this year. The reason for this was that all the cases in St. Louis were being used at the coin show on the other side of town. There will be displays at future conventions.

President Reznick extended his appreciation to Grant Schmalgemeier for all his hard work in planning the conventions. Reznick also thanked the Resolutions and Audit committees.

Plans for future conventions were given as follows: 1977-Carson City, Nevada (no definite date yet); 1978-most likely Louisville, Kentucky; 1979-Lincoln, Nebraska or Omaha, Nebraska; 1980-Nashville, Tennessee or New Orleans, Louisiana; 1981-Kansas City, Missouri. If anyone would like to propose a site for a future convention, contact the convention chairman.

With no further business to transact, the meeting was adjourned by a unanimous vote at 1:30 P.M.

Respectfully submitted,
Susan Cunningham, acting secretary

The specially inscribed fare box donated by Ore Vacketta was won by Joel Reznick for \$50.

= THE WHITE BUS LINE OF RED DEER, ALBERTA =

Occasionally, in searching for information about old transit operations, we come across an old transit official whose spirit really comes through in the flavor of his letters. These letters would lose something if they were edited, so I print them exactly as they were written. The following letter, from Mr. Gordon Sorensen, last owner of the White Bus Line, was written a few years ago to AVA member W.G. Garrison who thought members would find it interesting. I agree with him. The tokens in question are Alberta 800 A,B,C. The letter follows:

White Bus line operated between Red Deer & Rocky Mt House in 1931-32 making their last run in Fall of 32 & finance co. repossessing the old "White" Bus which was painted white too. It was about an 18 pass on White chassis and gave a lot of trouble as I remember.

I started Sorenson Bus Lines June 15/33 and operated for 33 years & 15 days selling out to what is now Greyhound Lines.

I cannot ever recall seeing a token of White Bus Lines and very much doubt if there were any actually. May have been some samples made up to try to sell but think if former customers had held any in the Dirty Thirty's they would have tried to ride with me and as I was driver-ticket seller-mechanic baggage boy etc.--a one man show entirely, I cannot remember ever even hearing of tokens until a few years back and now get an occasional letter of inquiry such as yours and am unable to help.

The former owner Mr. Slim Melton was a bachelor and has been dead for many years, but again in the early Thirties you didn't spend money without being sure item was needed badly. Sorry.

Mr. Sorensen's statement that he knew of no White Bus Line tokens is interesting, the more so because a printed list of new issues & discoveries, circulated among collectors by the late Ray B. Cooper and dated October, 1935, lists two of the White Bus Line tokens and calls them patterns. He also lists a 16mm aluminum and a copper 16mm White Bus Line token, calling the whole bunch "pattern tokens." In the same listing, also as "pattern tokens," are the four Angels Flight tokens. Curious.

The Pa 750 Y was listed in error. This should have been Pa 750 Z.

AVA member William A. Del Palacio of Daly City, CA, recently arranged for a display of transportation tokens at the Excelsior Branch of the San Francisco Public Library. The display, arranged around a copy of THE FARE BOX, and copies of the Atwood and Feisel catalogues, was according to the Senior Librarian at the branch, the most noticed exhibit they have had yet. Comments were favorable and complimentary, and one patron stated that it was "the most educational exhibit they have had."

= THE 1977 A.V.A. CONVENTION AT CARSON CITY, NEVADA =

The 1977 A.V.A. Convention will be held August 12, 13, and 14, at the Ormsby House in Carson City, Nevada. Plan now to attend what promises to be a great convention. Visit Carson City, a western capital that still retains much of the charm of the Old West and home of the former United States branch mint. Details on the banquet, tour and other interesting events will be announced later.

There will be a combination bourse-exhibit-collector social room. Those wishing to have a table in the bourse section are requested to notify the 1977 Convention Chairman as soon as possible. The cost of the table will be established at a very nominal rate, just enough to cover the cost of 24-hour security. The more tables sold, the less the cost per individual table, because the cost of security will be the same regardless of the number of tables. A table reservation form will be sent to you later.

Members desiring to exhibit may do so on a noncompetitive basis. All exhibitors will receive an attractive participation award. Those intending to exhibit should notify the 1977 Convention Chairman as soon as possible so appropriate space and display cases can be reserved for you.

Auction material will be accepted after January 1, 1977. Although some common tokens will be accepted, please try to limit this material. Better material is the life of any auction and common material produces little interest in the sale. All material should be sent by registered or insured mail. More on this and other convention matters later.

Address all inquiries to the 1977 Convention Chairman: Hal V. Dunn - P.O. Box 114 - Carson City, Nevada 89701.

= RARE CANADIAN TOKENS BRING RECORD AUCTION PRICES =

Last May, AVA member John L. McKay-Clements of Haileybury, Ontario, auctioned off his magnificent collection of Canadian coins and tokens. Of interest to us are the prices realized for some of the Canadian transportation tokens. Yosef Sa'ar sent me a list of the prices realized for certain of the tokens (in Canadian dollars) as follows: [all Quebec][the one non-Quebec token, NS 450 A, a pair, brought \$25]

= THE NEW TOKENS OF ANCHORAGE, ALASKA =
By David G. Fronius

The "People Mover" bus system changed to the new token system of May 14, 1976. The figure on the obverse of the token is the logo for the "Anchorage Public Transit Company" (correct title for the People Mover). The design on reverse is the logo for the "Municipality of Anchorage," which until recently was the City of Anchorage and the Greater Anchorage Area Borough--two separate entities now conjoined.

A total of 150,000 of the brass tokens [Alas 50 E] were struck, and they were ordered from Superior Seal & Stamp Company - 1401 Vermont Avenue - Detroit, Michigan. The tokens are sold for 40¢ each at two locations in Anchorage. Regular bus fare is 50¢.

In addition to the brass tokens, 50,000 white metal tokens, size 16mm, were also struck, and they were to be used for two of the farthest points served by the People Mover (at an increased fare). However the fare increase was disapproved by the Anchorage Municipal Council recently, so the white metal tokens are being held in storage pending a decision as to what to do with them. None are available to collectors or anybody else at this writing. Their design is the same as the 23mm brass tokens, but on a smaller scale, of course.

= THE LEHIGH VALLEY TRANSIT COMPANY =
By Douglas E. Peters

The Lehigh Valley Transit Co. was the successor to the bankrupt Lehigh Valley Traction Co. on June 20, 1905. LVT operated electric street railway routes in the Pennsylvania cities of Allentown, Bethlehem, and Easton, as well as the surrounding areas. An interurban line was operated between Allentown and Philadelphia and became known as the "Liberty Bell Route" since much of the route paralleled the Bethlehem Pike over which the famous Bell was hauled to safety in Allentown in the year 1777.

The local fare changed over the years, as follows:

<u>Effective date</u>	<u>Local Fare:</u>	<u>Cash</u>	<u>Tokens</u>
June 20, 1905		5¢	(none)
Sept. 1, 1918		6¢	?
May 31, 1920		7¢	?
Oct. 9, 1927		8¢	2/15
Feb. 15, 1948		10¢	4/35
Sept. 17, 1950		10¢	(none)
May 15, 1952		13¢	4/45
July 27, 1952		13¢	(none)
April 16, 1954		15¢	(none)
Dec. 15, 1955		18¢	2/35
Nov. 10, 1957		20¢	4/75
Feb. 22, 1959		20¢	(none)
Nov. 9, 1959		23¢	2/45
July 1, 1962		25¢	3/70
June 14, 1964		30¢	5/\$1.25
Mar. 24, 1968		35¢	3/90
Aug. 24, 1969		35¢	(none)
Dec. 30, 1970		40¢	(none)
Dec. 2, 1971		45¢	(none)

The tokens used over the years were Pa 15 G H I J K. The first tokens may have been used after September 1, 1918, but the first date of a token fare I have found is that of October, 1927.

On March 6, 1925, the first motor bus operation was begun by LVT. During the 1930's the electric railway system was reduced and more motor bus routes begun. In the late 1930's the property was modernized by obtaining new motor buses and relatively new second-hand streetcars. The Liberty Bell Route was abandoned September 7, 1951, and the remaining city trolley routes were abandoned June 8, 1953.

The tokens were last used on August 23, 1969. On October 30, 1972, the newly formed Lehigh & Northampton Transportation Authority (LANTA) took over the remaining city bus lines of the once extensive LVT system, as well as the LVT tokens. As of now LANTA has the tokens in storage with no immediate plans to use them.

I have been trying to locate further information on the tokens such as how many of each type were made, by whom, and when. To date I have not been able to locate this information. If anyone has further data on these tokens I would appreciate hearing from him (or her).

New York City has eight brand new double-decker buses, which were made in England. Unfortunately the buses, 14'5" high, are two feet too high for the light, wires, and trees on most streets. They will be used only on Fifth Avenue, Broadway, and Riverside Drive. These are the first doubledeckers since the old ones were retired in 1953.

The Connecticut Company, which issued all those tokens listed from New Haven, is no more. The system is now owned by the State of Connecticut Dept. of Transportation, and the lines will be operated by Connecticut Transit Management, Inc.

= THE ALLENTOWN & LEHIGH VALLEY TRACTION CO. TOKEN: PA 15 F =

By Douglas E. Peters

I have always wondered about the use of Pa 15 F, because on the reverse is stated "Complimentary Ticket". Recently I found a letter from Mr. C.M. Walter (Secretary of Lehigh Valley Transit Co.) to Mr. J.S. Wise, Jr. (President of LVT) dated October 19, 1943, which describes the use of the token. The letter reads as follows:

Referring to the attached coin pass, Allentown and Lehigh Valley Traction Company was the corporation that operated the trolley lines and the Allentown Electric Light and Power Company between 1894 and the latter part of the year 1899 when Lehigh Valley Traction Company was formed.

Under certain of the municipal franchises, the operating company was required to give free transportation to certain municipal employees. These employees were originally provided with books of tickets which entailed a continued printing expense. In order to eliminate this expense, coin passes [i.e., tokens] like the attached were secured and put in use. The advantage obtained by their use was that they could be reissued from time to time as application was made therefor by municipal employees entitled to free transportation. They were complimentary and were never sold.

Never having been sold, I question very much if the company is under any obligation to accept them now for transportation.

= SEPTEMBER NEW ISSUES SERVICE REPORT =

By John G. Nicolosi

Convention 76 has come and gone, and I have heard that it was a great conclave, and am sorry I had to miss it, especially as St. Louis is the place of my birth and I did so want to be there. But circumstances prevented me from attending.

New issues are again on the upswing this month. All members will be receiving the following 4 tokens: first a "People Mover" token of Anchorage, Alas 50 E, thanks to Doug Williams of that city who graciously consented to get the supply for us.

Second and third, two from New York City, NY 630 AU and AV, which are steel tokens, the first listed since World War II except for a couple of oddballs. Certainly the first steels of a large operation. Our friend Mel Fox again consented to get these two for us, and many thanks to him for his trouble. As there was extra expense in obtaining these I shall have to add a small surcharge to the regular cost for these two to NIS members. As for NY 630 AW, the one-dollar token, it will not be handled by NIS because, quite frankly, there's a shortage in our checking account. Seems every year we're deluged with tokens. But more than this, there are too many NIS members whose accounts cannot cover the tokens I am getting and I have to use my own money to pay for large quantities of these high-face-value tokens. So I just can't handle the dollar token of New York. But they made plenty of them and collectors should be able to obtain it readily enough.

Fourth and finally, we finally at long last got the Appleton, WI, tokens, after months and many letters and even phone calls. I have the tokens here now and they will go to all members. The delay, I was told, was because of the irresponsibility of one of the office girls at the office in Appleton. Now, non-members of NIS who ordered the Appleton token from me had their money refunded when I had given up hope on it. But now you can reorder it if you wish as I shall have one set aside for each who ordered it before. Price 50¢ + postage.

Remember, for heaven's sake, keep your balance well up because the new tokens have high face values these days and the check to buy a quantity of them is a pretty big amount not. Quite a few NIS members are even on the DEBIT side of the ledger, and a word to the wise is sufficient. We still have the waiting list. So, please, if your account is low or in the red, let me have another deposit.

= UNIDENTIFIED #90: THE TALE OF THE HODAG =
By Gerald Johnson - L-275

Back in the early 1970's when the green plastic Hodag Transit Line token was listed in the unidentified section of THE FARE BOX, it seems that every Wisconsin AVA member knew at once that the home of this token could be nowhere but Rhinelander, Wis. Several members including myself made inquiries in that city and indeed found traces of the Hodag bus operation, but after repeated attempts to procure examples of the plastic token without success, the story of the little transit line lay undisturbed until one rainy June afternoon in 1974. On that rainy afternoon a trip to the Rhinelander telephone company proved fruitless, but led to bound copies of all Rhinelander telephone directories at the local public library nearby. Having estimated the age of plastic tokens to post World War II, a search of Rhinelander phone books from 1944 to date hit pay dirt in the September, 1955, issue with a "Hodag Transit Line - 15 West King Street" listing! However the initial elation was short lived. The very next issue of the phone book had no mention of the Hodag Transit line; it was gone in six months! A search of the phone directories thru 1964 revealed no further bus listing of any kind. A cautious check of the phone books from 1930 to 1944 revealed that Rhinelander have previously had another attempt at bus service that ran into the early war years before folding. So the Hodag Transit Line was not the pioneer venture of that city.

A search of the 1954-55 and 1956 bound copies of newspapers of the city, representing more than five hours of scrutiny provided not one scrap of Hodag Transit Line information. Shut out in nearly every phase of three days' investigation, the search turned to local political process, where inquiries within City Hall were met with enthusiasm but little concrete information.

Finally a check of City Council minutes for the year 1955 was requested and the dusty books were dutifully hauled from the vault. With a flick of the wrist the pages parted to the February 14, 1955, meeting, and the Hodag Transit Lines! On this day in 1955, one Frank Delashmit (who had operated the Checker Cab Company in Rhinelander for many years) expressed a desire to begin operation of a city bus line. The mills of city government ground slowly and, on June 13, 1955, the proposed bus routes were sent to the police and fire committee for recommendation. Then on a July 11 entry of that year it was recorded that the Rhinelander City Council gave final approval for the transit lines operation.

A search for the bus owner and operator revealed that the owner resided in Florida, and as so often found in token searches, my letters and inquiries were ignored. The old building that had housed the Checker Cab Company, and during its brief life the Hodag Transit Lines, had long since been razed, so a decent history of the little bus lines operation will probably never be revealed.

But why did the Wisconsin vecturists know that the Hodag Transit Line tokens were from Rhinelander? Rhinelander, Wis., is the only place in the world where you can see a true "hodag." The Hodag was a product of the lumbering legend of the upper Great Lakes, along with the snow snake, side hill gouger, and babe the blue ox. The Hodag was a lumberjack "put on" in story and song. In the case of the Hodag, the legend went one step further when in 1896 a timber cruiser named Gene Shepard snapped a picture of the frightening monster near Rhinelander. The hairy animal, seven feet long and nearly three feet tall, glared ferociously from the photograph, (your author has a postcard copy) its backbone bristling with a dozen gleaming white horns, and needle-sharp claws curled menacingly. The animal was, of course, a hoax, made of ox hides over a wood frame, with cattle horns and claws of bent steel rods. The national publicity that attended the hoax was all received in those gay 90's and Rhinelander became the "home of the Hodag." Unfortunately the original Shepard Hodag was lost in a fire, and only a replica remains today at the city logging museum. The Hodag name remains, though, with a local park, numerous places of business and the high school athletic teams all bearing the mark of the legendary lumbermyth.

The plastic tokens of Hodag Transit Lines exist in two colors: green, as listed in Atwood, and red; but both have identical wording. The correct reverse legend should read: "Good For One Ride". The red token is unique, with six of the green ones known. The "Hodag" city color is green, and it's safe to assume the green token was the adult fare; perhaps the red was a child fare. The tokens' owner didn't remember. The short life of the Hodag Transit Lines and its maverick plastic tokens create an artificial rarity, a late issue token of census dimension.

= THE ORONO STAGE LINE TOKEN: ONTARIO 660 A =

By Helen Schmid

The following story of this token was taken from an article in the publication Canadian Token, official organ of the Canadian Association of Token Collectors. We are grateful for the use of this material, which was submitted by member John K. Curtis. Mrs. Schmid lives in Orono and persons interested in her book may write her there.

James M. Jackson and his son-in-law, a Mr. Davis, purchased an Orono livery and stage business in 1888. Mr. Jackson's son, Thomas William Jackson, known as "General" or "Bill," was born in Kirby, Clarke Township, in 1859. T.W. left home at an early age and moved around for several years winding up in the show racket. On a visit home in 1889 he found his father dying and there the story begins, with T.W. as a stage line owner. He purchased his father's interest in the business. Soon afterwards, his sister died and Mr. Davis returned to his farm, presumably giving up his interest in the business. For 23 years the line operated under T.W. Jackson [who issued the token].

In 1902 T.W. purchased a rival "livery and buss business" operating out of Newcastle, owned by brothers Thomas and John Douglas. T.W. seems to have had partners, for we find in 1906 a mention of Jackson & Tebble in one of our early telephone listings. About 1907 the names Jackson and Jamieson (Geo.) are linked together.

The demise of the Orono Stage Line occurred in 1912 as the service was no longer needed. A new railway, the Canadian Northern Ontario Ry., had been built through Orono. People were beginning to buy automobiles, too.

The token itself is interesting in that it has an error in the initials of the proprietor on it. The initials should be T.W. JACKSON on the obverse, and not "J.W. Jackson" as it appears on the token.

In conclusion may the writer add that she has been researching the area for more than ten years. Her first co-authored book, *Out of the Mists*, a history of Clarke Township, is now available, \$13.50 postpaid (Canadian funds). For those interested in the Orono Stage Line there will be additional material in the book plus three photos, one of jolly "Bill" Jackson, one of him in 1907 sitting on a stage coach, and one of the token itself.

= A REPORT ON CAR WASH TOKENS =

We do not have room in this issue for a supplement to the car wash token catalogue. I have over 120 different issues to list at this time, however. As cataloguer I want to express my thanks to R. Schopp, D. Stewart, M. Super, B. White, L. Crawford Jr., O. St. Aubin, L. Hawthorne, A. Weighell, and W. Clapper, for recently reported listings, possible unidentified locations and availability of listed specimens. I have posted all data and appreciate collector interest in keeping me up to date.

In the February 1976 Fare Box I listed unidentified issues. The Sopsra issue GREENBROOK TOWNSHIP NEXT TO TINY TOTS is probably from the Greenbrook suburb of Dunellen, NJ. Would a local collector please check this out, since I have no address to write? = Harold V. Ford - 6641 Saroni Drive - Oakland, California 94611.

= THE "CITYBUS" TOKEN OF HAMBURG, GERMANY =

By F.J. Bingen

On page 174 of the December, 1975, issue of THE FARE BOX is mentioned as a new find a WM 17mm token with CITYBUS on obverse and H H A and gate on the other side. This, of course, is a Hamburg token from the Hamburger Hochbahn Aktiengesellschaft, now obsolete and listed by Smith as 390 R.

= SEPTEMBER SUPPLEMENT TO THE CATALOGUE OF WORLD TRANSPORTATION TOKENS =

By Kenneth E. Smith

ENGLAND (Reported at various times by Don Capper)

Some reported English items we have trouble getting from the company, and we hold up listings until we can get a supply for Nicolosi's New Issues Service. Once I list in my supplement I have to deliver within a week what supplies in duplicate I have to Nicolosi so he can distribute. Otherwise others start writing the company and then decline the tokens distributed by Nick. In the June Fare Box on pages 83 and 84, Mr. Bingen did list some items we were working on from Derby, Ipswich and Sheffield, and the companies cut off supplies when collectors wrote. You will have to get the below Ipswich and Sheffield tokens on your own, as New Issues won't handle them. Fortunately we did get some Derby items recently for New Issues before the clamped down again.

DERBY 240

		DERBY CORPORATION TRAMWAYS 1½d- PREPAID	
J o B	26 Sd	(blank)	.30
AA o B	24 Sd	" (different die from 240 J)	1.20
		DERBY CORPORATION OMNIBUSES 1½d- PREPAID	
O o B	26 Sd	(blank)	.15
P o A	26 Sd	"	.15
Y o B	24 Sd	" (different dies from 240 O)(Vars.)	.30
Z o A	24 Sd	" " " " " P	1.20
		DERBY CORPORATION OMNIBUSES 1½d. PREPAID	
T o C	25 Sd	(same as obverse)(pink)(shades)(used during WWII)	.75
		DERBY CORPORATION OMNIBUSES 3d- PREPAID	
X o B	Tr Sd	(blank)(rounded corners)(29x26mm)	.30
		DERBY CORPORATION OMNIBUS 2P 2P EMPLOYEE	
AJ B	Ov Tr-sc	(blank)(33x23mm)	.30
		D.C.O.D 3P EMPLOYEES	
AK B	Ob Sd	(blank)(26x30mm)	.30

New Issues Service will be distributing some 240 Y, T, X, and AK, but not enough for everyone. AA and Z are apparently scarce and the company has none. Probably they will be census.

M 100 TBTA
AW S 28 Sd (same as obverse) (reeded edge) (WM-plated) (* 6/29/76) 1.00

= NOTES BY RALPH FREIBERG =

The Anchorage token was first reported to John Coffee by Mr. Fronius. We didn't know the address of this new bus line, which is called the People Mover Bus System, so we asked J. Douglas Williams to see if he could get a supply of the new tokens for New Issues Service, which he did. The logo on the obverse is that of the bus system, which is owned by the City of Anchorage.

Five hundred of the convention tokens were struck by the Lincoln Mint of Chicago, formerly called Greenduck Company. More about this unique and delightful tour elsewhere in this issue.

The Wahoo, NE, token is exactly like 940 A and B in design and style, so now we have a set of three. When John Coffee visited Roger Bolz in Lincoln this summer, he was shown this token by Roger, and photographed it, and took down the vital statistics for this listing and for our Atwood Supplement book, which will be ready later on.

The New York City tokens were described in COIN WORLD, with an address where to send for them. Those who mailed the \$2.25 to that address did receive the tokens in due time. The "M" on the tokens is the logo for the New York Metropolitan Transit Authority, and TBTA is for Triborough Bridge and Tunnel Authority, which is a subsidiary of MTA. In the Supplement book all the subsidiaries are explained and listed. TBTA was created in 1933, and became part of MTA in 1968. It operates seven toll bridges and two toll tunnels. Tolls were raised September 1, 1975, but tokens didn't appear until June 29, 1976. The 50¢ token is valid on the Henry Hudson, Marine Parkway, and Cross Bay Veterans Memorial bridges. The 75¢ on the Triborough, Whitestone, and Throgs Neck Bridges, and the Queens Midtown and Brooklyn Battery tunnels. The \$1 token is used only on the great Verrazano Narrows Bridge.

We limit our notes this month as Mr. Coffee has a lot of other material for this issue. Next month we shall include a lot of listings which Mr. Coffee picked up on his trip this summer. NIS will send out the Anchorage and the 50¢ and 75¢ TBTA tokens. The Appleton, WI, token finally arrived and that also will be sent out. But the \$1 TBTA token won't be handled by NIS.

= AUCTION OF TOKENS FROM THE ESTATE OF GEORGE H. WYATT =

RULES:

1. All bids must be postmarked no later than October 23, 1976.
2. Bid by lot number.
3. Successful bidders will be responsible for postage and insurance.
4. Successful bidders will be notified and all funds must be received before shipment is made.
5. All tokens are in nice condition unless so stated - 10 day return privilege if not fully satisfied.

All proceeds will go to Mrs. Wyatt. Mail bids to: Steven E. Saari,
Main Street, Ashby, Mass. 01431.

= 1973 RED SUPPLEMENTS STILL AVAILABLE =

Paul Cunningham writes that he still have a few copies of the 1973 Red Supplement to Atwood's Catalogue. New members who don't want to wait till Christmas, when the 1977 Supplement should be ready, may buy a copy of the 1973 booklet from Paul for \$1.50 postpaid. Write him at P.O. Box 1 - Tecumseh, MI 49286.

The Editor has received his sterling silver example of the Philadelphia Bicentennial token (which cost \$7.50 from Franklin Mint). It is a beautiful token, in Proof, and in due time we shall list it among Presentation Pieces (when we learn how many they made). The gold ones must look even more beautiful, but had I ordered one all I would have seen every time I looked at it was the \$100 it would have cost me.

The three new steel tokens of the Triborough Bridge & Tunnel Authority of New York City are sold only in rolls of 20 tokens. When you buy a roll you do get a 5% discount. It works this way: you drive over the bridge (or through the tunnel) and instead of paying your toll you simply buy a roll of the appropriate token. They give you the roll and don't charge you any toll that one time. So you get one free ride if you buy a roll of tokens.

OCTOBER, 1976

Our 352nd Issue

October 27. This issue contains a new feature, Variety Fare, by Bob Seger. This will appear frequently, consisting of Syd Joseph's beautiful photography and Bob's comments, making it easy to differentiate between minor varieties. Syd, Greg Prgomet, and Ralph Hinde, are at work on a large new variety listing for the whole country, with photos. The first part, for Colorado, has already been circulated among a few of us for tentative inspection. The first tokens featured are IL 720 F; OK 640 A; and CA 775 J. Bob would like to hear comments from any members indicating their interests and suggestions, with respect to format or tokens they'd like to see featured.

Just today I received cost estimates for the 1977 SUPPLEMENT to Atwood's Catalogue, which I prepared this past summer, and which will go to the printer as soon as the prescreened photographs are returned to me to affix to the typed copy. This will be a 240-page book (possibly 252 pages), cloth-bound, or loose-leaf, with lots of pictures and all listings since the Atwood was published in 1970, plus most of what we gleaned from the Meyer & Wenthe records as to dates of striking and numbers struck. I believe I shall be able to offer the book, on paid-in-advance orders, for \$3.75 or \$4 to AVA members only. Probably it will be about \$5.50 to AVA members after that, on a retail price of \$7.50. However, what I have received from the printer are estimates, so I am not calling for orders yet. Wait till I send them the copy and have a firm price. We expect to print 2,000 copies. This won't be anything like my little 1973 Red Supplement. This will be a necessary companion volume to the Atwood 1970 and, if I do say so myself, a really nice little encyclopedia of information in addition to all the listings. So hold off until I have firm pricing information before sending me your advance orders.

Incidental information: Jack Wilcox reports that NJ 975 C is still in use on the Boardwalk. The fare on the Sightseer is 35¢ cash. Tokens are sold at a booth at 3 for \$1.00. Bill Eisenberg, former AVA President, reports that of the first 200 members of the AVA, only 50 are still members. Of the first 150, 41 are left. Of the first 100, 24 are left. And of the original 33 charter members, 16 are still in the Society.

Recently a non-collecting friend of mine sent me a clipping from Bridgeport, CT, which said that a new senior citizen token was in use on several of the bus companies in that city. John Nicolosi quickly wrote for a few, and what he received was only RI 700 F. And my friend also sent me the RI 700 F. Apparently RIPTA of Providence unloaded a few thousand of their obsolete United Transit tokens on Bridgeport.

1976

= ANODIZED R.I.P.T.A. TOKENS =
By Scott Molloy

-October 1976-

One thousand tokens (RI 700 F & G) were anodized green this past summer by Rhode Island Public Transit Authority. These tokens were to be used on a "tourist loop" bus in Newport. Two buses were painted psychedelic especially for the route. The Authority had hoped to discount the green tokens to hotels, merchants, and other business interests who would have distributed them to their customers. Unfortunately the plan to use the tokens fell through. The tokens are now in the Authority's vault along with the inventory of RI 520 M which RIPTA inherited when they assimilated the defunct Newport Bus Company.

The tokens with star stencil-cut are all being phased out now in favor of 700 J.

For purists, you might like to know that there are two varieties of 700 G. The early issues had a raised roadrunner bird which didn't stack evenly in coin rolls. In later issues the bird is flush with the token surface. These two varieties also exist in the tokens which have been anodized red and green.

= DELAWARE VALLEY VECTURISTS =
By Leonard H. Paul

The Delaware Valley Vecturist Association met Sunday, September 25, at Joe Pernicano's office in Fort Washington Industrial Park, Pennsylvania. Thirteen members attended, and one visitor. These last few meetings, we think, have been very successful and we are hoping for more like these. Three new members are Sam James, who works in the SEPTA Comptroller's office; Karl Gabsch, a D.C. bus driver, and Dave Biles from Allentown. Dave not only collects tokens, but (hold on to your hat) he also collects buses. You read that correctly. He has two ACF-Brill C-31 buses, obtained from Lehigh Valley Transit. Dave is in the process of restoring one of them, cannibalizing the other one for parts.

Attending were Joe Pernicano, Dan DiMichael, Hank Hiorth, Dave Biles, Doug Peters, Bob Schopp, John Ciecka, Henry DeGregorio, Hank Bergey, Sam James, Al Zaika, Karl Gabsch with wife Carol, and Len Paul.

Our Next Meeting will be held Saturday, November 13, as guests of the North Eastern Vecturist Association in YMCA at Penn Station, New York City. We'll be taking the 8:05 a.m. New York-bound train from 30th Street Station in Philadelphia.

= TOKEN MEET ANYONE? =

To all AVA members and any others interested in tokens, the DVVA is considering hosting a Token Meet East in late Spring of 1977, probably in April or May. This meet will consist of a one or two-day affair with tables available for dealers at a nominal fee. Exact details have not been worked out, but we need your input as to time, location, and interest. We expect to arrange a meeting place near Philadelphia or in Allentown in conjunction with the railroad fans, all of which will be convenient to rail, air, bus, and auto. If enough interest is shown we shall proceed to firm up details, which will be published in THE FARE BOX. All interested parties should write either Joe Pernicano (58 Sonia Lane, Broomall, PA 19008), or Len Paul (113 Rutledge Ave., Folsom, PA 19033. It's up to you all...

Jack Wilcox reports a new parking token for Ridgewood, NJ:

CHAMBER OF COMMERCE / COMPLIMENTS / RIDGEWOOD, N.J.

A 23 Sd Free Customer / Parking (anodized red)

Given by merchants with \$3 purchase; good for 30 minutes in town parking meters.

= THE FARE BOX LITERARY AWARD GIVEN TO HAROLD V. FORD =

The 1976 Fare Box Literary Award went to Harold Ford for his excellent article on "The Peerless Stages of the East Bay" which appeared in the August issue. The award consists, as always, of a unique sterling silver example of this year's AVA tour token. It is thicker than the regular white metal strikes, and has a prooflike surface. The token is placed in a custom Capital Plastics holder inscribed to the recipient.

Until now the decision as to the recipient has been made by the Editor, inasmuch as I have been the one person ineligible to win the award, by my own rule. The award was originated in 1965, at the suggestion of Yosef Sa'ar of Elat, Israel, who said it should be named the "John Coffee Literary Award." Modesty caused me to alter the title of the award, but otherwise it has followed Joe's suggestion.

Previous recipients have been Sam Rabinowitz (1965), Gerald Johnson (1966), F.J. Bingen (1967), Arthur D. Jordan (1968), Donald Capper (1969), Duane H. Feisel (1970), Harold H. Young (1971), Donald Punshon (1972), no award in 1973, Les Hawthorne (1974), David E. Schenkman (1975), and Hal Ford (1976). In each case the recipient received a sterling silver example of that year's tour token, with the exception of 1970, when no silver token could be made of the Dallas tour token because of an unusual manufacturing process. Accordingly the following year, 1971, we had a single 10 carat gold example made of the 1971 tour token for Duane, as well as the sterling silver one for Mr. Young. In 1972, as all the tour tokens were made of silver, the Literary Award was 24 carat gold-plated by Franklin Mint. In that year, three such plated tokens were made. Grant Schmalgemeier and Joel Reznick received these for their work on the Convention. This was the only year when the Literary Award was not unique. In 1973 no award was made because about a dozen silver tokens were struck for presentation as Distinguished Service Awards to a number of members. Off the top of my head, I know that the following members received the silver 1973 tour token: Freiberg, Nicolosi, Schwartz, Hinde, Winant, Rider, Mazeau, the Butlers, Frisbee, Feisel, and Coffee. I believe a couple of others were also awarded. In 1974, because of an error in striking the tour tokens, there were two different silver ones, both of which went to Les Hawthorne.

Now that we have ten current members who have been recipients of the award (one is no longer an AVA member), the time has come to alter the procedure somewhat. From now on the recipients of the award shall also be members of The Fare Box Literary Society, membership in which shall be open only to recipients of the award. The members of this society shall decide among themselves, without consulting the Editor, who the recipient shall be each year and, hence, who shall be added to their ranks. The Moderator of the Society will always be the most recent recipient, so it is assumed the Moderator will change each year, although if one person receives the award twice in a row this would not be the case.

Until now I have observed a rule that no one would receive the award more than once. But under the new arrangement, the Literary Society will make their own rules, and so if they wish they may give the award to a previous recipient.

In addition to the unique sterling silver token, I hope in the near future also to prepare appropriate plaques for the members of the Society, and perhaps some other tokens of recognition. My desire is to give as much recognition as possible to those of our members who have gone out of their way to write superior articles for us. We all benefit from their labors.

= PRICE OF ATWOOD CATALOGUE INCREASED BY 75¢ =

Beginning with orders received November 15, 1976, the price of the Atwood Catalogue will be \$8.75 to AVA members. The one-time-only price for new members purchasing their first copy will be increased from \$7.50 to \$8.25. This is simply to cover the cost of postage to mail the book (55¢) and a jiffy mailing bag (20¢). We simply can't continue giving them away as we have been. Regular retail price remains \$12 postpaid. That's still a bargain for the greatest numismatic book in print!

VARIETY ARE

"DO YOU KNOW THE WAY TO 775?"

SAN JOSE IS A BEAUTIFUL NORTHERN CALIFORNIA CITY WITH A LOT OF FINE PEOPLE. AS THE FIRST CAPITOL OF THE STATE IT OWES ITS ORIGIN AND ORIGINAL IMPORTANCE TO THE MISSION BUILT BY THE JESUITS ALONG THE "ROYAL ROAD". THIS MISSION IS THE SUBJECT OF TODAY'S VARIETY. SHOWN ARE PHOTOGRAPHS OF FOUR OF THE FIVE VARIETIES. I DIDN'T HAVE THE FIFTH VARIETY IN MY COLLECTION FOR GOOD OLD SYD JOSEPH TO PHOTOGRAPH FOR US.

DESCRIPTION:

J_a OBV & REV: NO BARS IN ANY WINDOW.

J_b OBV: NO BARS IN ANY WINDOW.
REV: BARS IN ROUND WINDOW ONLY.

J_c OBV & REV: BARS IN ROUND WINDOW ONLY.

J_d OBV: BARS IN ROUND WINDOW ONLY
REV: BARS IN THREE WINDOWS

J_e OBV & REV: BARS IN THREE WINDOWS

IT IS PLAIN TO SEE THAT, IN ADDITION, CROSSES APPEAR AND DISAPPEAR, THE FOLLAGE CHANGES SHAPE AND FULLNESS, AND THE TEXTURE OF THE WALLS CHANGES CONSIDERABLY.

VARIETY FARE

THIS MONTH IS A GREAT
EXAMPLE OF THE ADVANTAGE
OF THE CONCENTRATED EFFORT
OF SYD JOSEPH. FEW OF
US HAVE EVEN SEEN ONE OF
THESE LITTLE DUDES, LET
ALONE TRYING TO DETERMINE
ANY VARIETIES. THE VARIETY
ITSELF IS QUITE SIMPLE ON
THIS PLAIN ONE-SIDED TOKEN.
OBSERVE, IF YOU WILL, THE
SPACING BETWEEN "GOOD"
AND "FOR" AND THE SPACING
BETWEEN "ONE" AND "FARE".

IF YOU ARE AWARE OF OTHER
VARIETIES IN THIS TOKEN,
PLEASE LET ME KNOW.

WHAT IS YOUR FAVORITE
VARIETY? SHARE IT WITH
US !!!

Nassau 600 RD: Add that 12,500 tokens were struck. There has been apparent buying of thousands of 600 RA thru RD by some collectors and dealers, and these are being offered at from \$35 to \$75 per set, all quoting that the set went for \$55 in the Ray Byrne auction. These tokens are very common, and in current use, and this is a warning to avoid paying these high prices.

CP C 22 Sd 10P (green)

.60

Both Scotland tokens will be distributed by Nicolosi's New Issues Service.

Remember when you report new discoveries, in addition to giving the exact wording, spelling, and punctuation, to send rubbings or photographs. This is essential to insure accurate listings. Please keep the listings coming.

Collectors who have ordered Duane Feisel's personal tokens, and paid for them, are asked to write him immediately and specify which ones you have ordered and paid for. He will send them to you by return mail. But please write him and explain which ones he owes you and how much you have sent him.

= OCTOBER NEW ISSUES SERVICE REPORT =
By John G. Nicolosi

First of all let me say Thanks to those of you who responded to my plea last month to replenish your NIS account. But there are still a few more of you whose balances are too low (and you know who you are). Please send along a check to keep your New Issues standing secure and to keep tokens coming your way--assuming you want to stay on as members of N.I.S.

Four tokens going out for October. Regular members will get all four; associates only three, as there aren't enough of one to go around. These are ILL 999 B L M, and OH 385 C. Bill Garrison came through for us again, spending many hours of foot work and on the phone and driving around to get these Illinois passes for us. Thanks again, Bill, for your untiring efforts for us.

Regulars will get ILL 999 B L M, at reduced rates, and OH 385 C. Associates will not get ILL 999 L. For the Hamilton token, our thanks, again, to Gay Lipscomb who came through for NIS. His work for us is appreciated much.

For the first time in a long time we don't have any pending tokens, so this is a good time for members to check their respective cities, for school and student tokens. New ones generally come out in the Fall with the opening of new school terms, and it's just possible there's one in your city that you don't know about.

I hope that by next month we'll have something to send out. We usually do.

The 1976 A.V.A. tour token of St. Louis was not struck by Lincoln Mint, as indicated last month. It was struck by Greenduck Co. of Hernando, MS. The beautiful art work was done by former AVA President Robert M. Ritterband of Los Angeles.

				BUS (LETTER PREFIX) (NUMERAL) 1975-76	
M o A	Sq	Pc		(blank) (38mm) (incuse black letters)	1.00

These passes were used on buses operated by Scholastic Transit, which provides bus service for schools of Glenview School District 34. Brass passes in 1972-73, 1973-74, and 1974-75, were replacement passes. A \$1 charge was made for replacement. There was no brass pass for 1975-76. We have omitted using letter F in case a 1971-72 pass shows up.

HODAG TRANSIT LINES

A o Pg	23	Sd	Good For One Ride	1.00
B o Pr	23	Sd	"	1.00

= NOTES BY RALPH FREIBERG =

Bill Garrison discovered all those school passes from Illinois. They are yearly passes, and used by students who attend school in the Glenview District 34. Each year a pass is given to each pupil, and the passes all have a prefix letter so the driver can be certain the kids are getting on the right bus. The passes are also numbered, and if a student loses his pass he can get a new one for a \$1 charge. During three school years they issued brass ones for replacement only, but didn't do this in 1975-76. We also have a new shape here, a bell. So far we haven't decided how to measure a bell, but if one were to measure from top to bottom it would be 31mm in the case of these items.

The Wahoo token was shown to John Coffee this summer when he visited Roger Bolz in Lincoln, Neb. This makes four depotels from Wahoo, three of which are extremely rare, and all of which are desirable if only because of the quaint name of the place.

Mr. Lipscomb obtained a supply of the Hamilton, OH, token for our New Issues Service. The exact size is 25.55mm, so we call it a 26mm.

An article appeared in last month's issue about the Hodag Transit tokens. We knew about one of these tokens for years, but the first one to show up had been cut down by somebody with scissors, so we didn't know the actual size or shape, to say nothing of a correct origin. So we are delighted now to have the full story, which arrived just in time to get the listings in the 1977 Supplement.

Last month we mentioned about the usage of the \$1 TBTA token from New York City. At the time these 3 tokens appeared, we had a lot of others to obtain also for N.I.S., and John Nicolosi was able to get the 50 and 75, but decided to pass on the \$1 token. We didn't have any offers from NYC to get them, and we didn't know anybody who regularly commutes over the Verrazano Bridge. But anyone who wishes may get one by writing directly to Mr. Joseph T. DeLigion, Controller - Triborough Bridge & Tunnel Authority - Triborough Station, Box 35 - New York, NY 10035. Send \$1 for the token, plus a stamped return envelope. They have so far been very cooperative with collectors.

Another token we haven't been able to get is the school token from Albuquerque. This token was listed in the July 1976 issue, and if you want to try writing directly, try Albuquerque Transit System - 619 Yale Blvd. S.E. - Albuquerque, NM 87106.

We have been working on the Meyer & Wenthe records for over a year now, and just when I thought I had it all down, I have acquired a lot more of it! I rushed some of it to John Coffee for the 1977 Supplement, but some of it we just didn't have time to get it in. So some states will be much more comprehensive than others in our new Supplement.

A new field of study are those tokens which were struck by different manufacturers. That is, we have a number of tokens listed where one minor variety was made by Meyer & Wenthe, and another minor variety was made by a different manufacturer. I have Syd Joseph photographing a lot of these for us, and in due time the pictures will be published. If any collector would like a list of such tokens that we already know about, please let me know. As a matter of fact my files are bulging with miscellaneous trivia about tokens, and if you have any pet token you'd like to know more about, just ask. For instance, everyone yells about varieties, but on the zinc token Hawaii 240 D, 5,200,000 were struck in toto in various orders between January 1943 and February 1946, but no one says he has seen any die varieties. The service men stationed in Hawaii then must have taken them home by the bucketfull, for souvenirs. Most zinc tokens were made beginning about September, 1942, and then in 1943 most companies switched to what we call steel. But Honolulu didn't have any steel made, and kept grinding out the zincs till after the war. (We are deleting Haw 998 A, as it is not a true steel.)

= THE CITY TRANSFER COMPANY OF OILTON, OKLAHOMA =

Recently Del Ford reported a token which we thought sure was a hack line token, from a quaint-sounding town in Oklahoma. The token is as follows:

CITY TRANSFER CO. / OILTON

A 29 Sd 12½ (Sc)

The value on reverse was consistent with the customary 25¢ round-trip fare charged by hotel-to-depot hacks, and I thought we had a live one. But to be on the safe side I asked AVA President Joel Reznick to make some calls for us. He spoke to a very elderly gentleman in Oilton who was the owner of the City Transfer Company back in the old days. Well, it seems the City Transfer Co. of Oilton never carried passengers. It was strictly a freight operation. So what we have here is a drayage check. Still a rare and interesting item, but of course not a transportation token.

This information is for the benefit of any member who might, in the future, be tempted to pay a high price for a token which looks like a rare old hack token, but which definitely is not.

TOKEN AUCTION

Submit all bids to Joel J. Reznick, 120 S. LaSalle, Chicago, IL 60603

- 1) All bids must be postmarked by November 20, 1976
- 2) All winning bids will be reduced to 10% above second high bid.
- 3) Bidders are responsible for postage and insurance on items won.
- 4) All winning bids payable prior to shipment of tokens.
- 5) 10-day return privilege if not fully satisfied.

NOVEMBER, 1976

Our 353rd Issue

ANTHONY A. GIBBONS, GEORGE H. SANDERS, and HARRY L. STROUGH

We have been diminished this month by the loss of three of our most loyal members who also were three of my favorite people. Tony Gibbons of Scranton, PA, AVA #181, was a pioneer vecturist and a frequent fixture at NEVA meetings in New York. Always impeccably attired, he was a soft-spoken gentleman of the old school. He was 86 at the time of his death.

George Sanders of Denver, AVA #357, was another of our pioneer collectors. An active and beloved member of the Denver group of vecturists, George's death leaves a void it will be difficult to fill.

Harry Strough of Houston, AVA #722, was active right to the end. In the same mail that brought the sad news of his death, at age 64, there was a change-of-address notice, and an ad, from Harry! His collecting interest was one of the delights of his life. He was a good collector and a great organizer, and lots of fun to be with. I shall miss him and his Texas accent...and I shall miss all the other wonderful things which now, in a moment of loss, I recall, and associate with three old friends.

Together with this issue, which will be mailed December 5, we are sending you a dues envelope for your 1977 A.V.A. dues. Dues are \$7.50 for next year, and nobody is happy about it except, possibly, the Post Office, which by its inordinate rate hikes is responsible for our having to raise our dues. We actually were losing money at the old rate, and inasmuch as we don't have any endowment to fall back on, we have to pay as we go. I will say I believe it's still a bargain at \$7.50. So please mail your \$7.50 dues to the Treasurer, R.K. Frisbee (211 King St. - Denver, CO 80219). Use the envelope with Toby's address printed on it, and make him happy by using a commemorative stamp if you can. Remember please, send dues to Toby, and not to the Editor, and remember, too, that if you are late with it, there's that extra \$1 we have to add. Life members, of course, are exempt from payment of annual dues.

On the next page I have an article about advance orders for the 1977 Supplement to Atwood's Catalogue, and hope to get lots of orders at the \$4 pre-publication price.

Also in this issue are Prices Realized from the auction of the George Wyatt collection, printed in the September issue. I received these handwritten in pen & ink, and not about to type them myself I simply stuck it in the machine. I believe it is OK just as it is. The second Wyatt auction is inside this issue.

= THE UTAH LA-VECTURIST AND TOKEN COLLECTORS ORGANIZATION =

The UATCO of Salt Lake City held their second meeting of November 11 in the shop of member Harry Campbell. We started at 7:30 pm with a short informal business meeting and chose our long and unique name. Our emblem will be the obverse of Utah 750 C thru L streetcar token, incorporating the letters U L A T C O (hence the name), beehive, and Salt Lake City.

Membership numbers were drawn by lot; for the five AVA members present they are: 1 Bob Harris. 2 Roy Nulph. 3 Harry Campbell. 4 Phil Lavorgna. 5 David Freed. 6 Harold George. 7 Richard Smith. 8 Mrs. Richard Smith.

Phil told of his recent trip to Hawaii and gave those present the Haw 240 E token. David showed his collection of Utah trade tokens.

The first meeting of the group had been held in Bob Harris' home in September. Our next meeting will be January 13, 1977, in Phil Lavorgna's home. Interested persons are invited to attend.

- Roy D. Nulph

= ADVANCE ORDERS FOR THE 1977 SUPPLEMENT TO ATWOOD'S CATALOGUE =

The Editor is within a week of completing work on the 1977 Supplement to the Atwood Catalogue. This has been a heavy undertaking. I began work on it in July, and typed most of the copy in Tacoma, using our IBM Executive typewriter (the same machine used to type the original 3rd edition of Atwood). This past week I updated the book, adding in every known token discovered or reported to me right up to this moment. This involved retyping two whole pages, usually, for each new listing!

The book will list every token discovered, issued, or reported to us since the original 3rd edition of Atwood was published early in 1970. It includes everything in my 1973 red supplement, in addition to everything listed since in Fare Box supplements, plus a lot more stuff the owners didn't want reported in The Fare Box, but which I prevailed on them to permit me to list in the book.

In addition to all new listings, the book includes all the corrections to the 1970 Atwood that we could think of, price corrections, and most importantly it includes a large amount of the information we acquired from the Meyer & Wenthe records, as to number of tokens struck, when struck or shipped, when used, etc. This material takes up, I would say, at least 25% to 30% of the book. The book is arranged by states, as usual, but each state is in two sections. The first section is for new supplemental listings. The second section is for corrections & comments on older listings and the information taken from Meyer & Wenthe records. This information is listed by city and token number, with date and number struck of each token for which we got that information. When there were more than one striking, we list dates and number for each striking or, if there were a large number of striking we would simply put something like "Total 2,500,000 struck between June 1920 and Sept 1939."

Also historical data on the new listings, and additional historical data on the older listings, is included.

Photographs are used throughout the book: pictures of new issues and discoveries, and also photos of older listed tokens which are not pictured in the 1970 Atwood. The book is fully indexed, of course, and priced. It is intended to make each state a separate unit so, if you take the loose-leaf version, you can take out each state and insert it with each state in your 1970 loose-leaf book. Or do whatever else you wish.

The book will have approximately 248 pages, possibly more, and it will be available cloth-bound; loose-leaf (punched for 3-ring binder [which isn't included of course]); and spiral-bound to lie flat (if we get enough orders).

The one-time only advance order price to AVA members who order now and send payment with order will be \$4.00 per copy, postpaid. The book will retail for \$7.50, and the price to members after publication will be \$5.00. The \$4 price is for the cloth-bound, the loose-leaf, or the spiral-bound.

Please send your order now, directly to the Editor, whose address is on the masthead of the front page of this issue. Make check payable to "American Vecturist Association," and order as many copies as you want at \$4. The more the merrier!

= NOTES BY RALPH FREIBERG =

The exact usage of the taxi token from Bellflower, CA, is not known, but Hal Ford learned that the token was used there.

The plastic tokens for Noblesville, IN, will not be handled by the New Issues Service, but collectors can obtain them directly by writing to David W. Peat, Pres., IMOTAC, 1225 Carroll White, Indianapolis, IN 46219. Send 50¢ + SAE for each token (don't know if whole set will go for 13¢; better put 24¢ on envelope for the set). The Noblesville taxi token was reported by Virginia King, but we still do not have much information about it.

The ferry token of New Orleans was discovered by Louis Crawford, who was able to obtain a few, but the Authority refused to give him a quantity, saying they might be used again. Meyer & Wenthe struck these tokens, and they must have gone into use shortly after they were shipped in 1962. The tokens were used by employees in lieu of a dime, in a turnstile. When the ferry became free in 1964, the use of tokens was discontinued. They say ignorance is bliss. I was in New Orleans in December, 1963, and I always ride ferries, and rode this one, putting a dime in the turnstile. Of course I knew nothing about the tokens.

The Flint, Mich., tokens were reported by Paul Cunningham, who has an ad for them in this issue for \$1 each. The New Issues Service will not handle them. The aluminum tokens were given by the Mental Health Service to mentally handicapped people, two at a time, in order to teach them how to ride the buses and, of course, also to provide their transportation to the Mental Health Center as well. The smaller tokens, which are still being used, are given to persons who are mentally, physically, and otherwise handicapped, to provide transportation on buses operated by the Mass Transportation Authority of Flint. Joel Reznick, after phoning the MHS in Flint, learned that 7,500 of the brass, and only 700 of the bronze, tokens were made.

Roger Bolz found the Hebron, Neb., token and gave John Coffee the description last summer in Lincoln. The Central Bus Line, which used the token, was a horse-drawn hack line which operated from 1885 to 1910. It provided service between the Central House (later called the Hebron Hotel; it burned down in 1974) and the CB&Q RR and CRI&P RR depots. The Central House was owned by John Hughes, and the bus line was operated by J.E. Shearer.

Ray Byrne acquired a number of Pennsylvania tokens this past year, and sent them all to John Coffee for photographing. Included were the three listed this month. Bert Frank, whose name is on the "B" token of Bunola, operated a bus line whose chief business was to carry miners from their homes to the various coal mine pits along the Monongahela River. The token was given to those who purchased a round trip. The token was used in the 1920's and early 1930's. This was the first token used. Then later Mr. Frank issued the token we have listed as "A" so they are actually listed in reverse chronological order.

Joe Pernicano found the Lourdes token in a Philadelphia coin shop, but so far we don't know where the school is situated. On the other tokens listed as Unidentified, we just don't know. There is an Almy in Wyoming (#164) but Almy is more likely

Now some words about bus types. We list three main types of buses pictured on tokens, in the Catalogue. We did list Ky 430 R as a Type #2, but learn that this was not made by Meyer & Wenthe, whereas all the other tokens with types 1,2,3 were made by M&W. Meyer & Wenthe did make the Ky 480 S, with type #3, in 1954. So at present we don't know who struck the Ky 480 R with its odd type of bus on it. Maybe it was Osborne Coinage Co. Possibly in the future we shall have a special numbering system to refer to buses pictured on tokens struck by firms other than Meyer & Wenthe. Such as using "Type #21" for the Ky 480 R, and "Type #22" for the bus pictured on the Albuquerque, NM, token listed in July 1976. I would hold open the series from 10 to 20 for types of trolley buses.

When arranging material for the 1977 Catalogue Supplement there was some information I didn't have when Mr. Coffee was here to discuss things with me, but which I have since acquired. For instance I don't have any record that Meyer & Wenthe made such tokens as Ohio 165 Y AA AC AD, but they did make the 165 AE and AI. The bus on that token is a slightly different type from our usual "Type #3" and I'd recommend that we call this Type #4 bus. Syd Joseph has been making photographs of tokens with the various types of buses on them, and in due time we shall have these pictured in an issue of THE FARE BOX.

Something strange is happening in token manufacture. I don't know of any new tokens being struck by Meyer & Wenthe! All the new tokens recently have come from other manufacturers, which leads some of us to believe that Meyer & Wenthe, under its new ownership, is pricing itself out of the market.

= NOVEMBER NEW ISSUES SERVICE REPORT =
By John G. Nicolosi

A plea from the New Issues Service: I believe this will be only the second or third time in our 21 years of N.I.S. that we don't have a token to send out, and at the moment December also looks bleak, unless some of our members will get out and check around their respective cities, and try to dig up a new issue or three, because there aren't any prospects in the near future for tokens. I've sent many a dollar bill to transit companies to try for tokens, and don't always get replies (or the dollar back either). So we don't know if tokens exist in some places. We need the co-operation of our members so help us avoid more empty months such as this one, please.

Another plea: you members with low or debit accounts. Most of you have been with me for a long time, some since the very beginning of NIS in 1955 and I don't like to drop you unless you want to be dropped. Will you please drop me a note stating how you stand: if you don't want to continue please show me the courtesy of dropping me a card and saying so, because there are many on our waiting list who would love to take your place. I do believe most of you want to continue. If you are ill, or short of cash, just let me know and I'll be glad to carry you on the books. No problem there. But there's nothing worse than dead silence. Without your deposits we can't buy the tokens we send out, and sometimes when we have a lot of expensive tokens, as last September, we just don't have the money in our fund to buy a quantity of a high face value token (such as the \$1 New York bridge token). So please let me hear from you and don't continue to ignore my requests, if your deposit is low.

The two Scottish tokens listed in the October Fare Box will be mailed to you this month, incidentally, to clear the decks.

The Newport, R.I., Bridge recently refused to sell quantities of its tokens in bulk to Viking Hotel owner Earle Cohen, who was giving them out to attract tourists, for \$1 apiece, thus making it unnecessary for hotel guests to buy rolls of tokens to get the half-fare toll rate on the bridge. So Cohen simply announced he would trade a \$2 bill for a \$1 bill + a bridge toll receipt to hotel guests. Looks like Cohen wins.

B O L I V I A

The following two items are sometimes listed in catalogues for sale as transportation tokens, and sometimes not as transportation tokens. I have these in my collection and would like more information about them, should any reader have this information.

EMPRESA NACIONAL DE BOLIVIA (9 STARS)

- o B 24 Sd Ficha Por 10 Centavos 1885
- o B 19 Sd " " 5 " "

B R A Z I L (zone checks worth about 50 cents each)

Rio de Janeiro 600 (Reported by Steven Alburn)

VERDUN S.A. VIACAO

- WBo P 30 Sd Deposite Na Caixa (blue)
- WCo P 30 Sd " (yellow)

TRANSP. VILA IZABEL S.A.

- WDo P 30 Sd Deposite Na Caixa (green)
- WEo P 30 Sd " (pink)

I acquired the following Brazil token in an envelope marked transportation token: Does anyone have any information about it?

EMPRESA PUERTO SAUCE Y FELIZ FRESONE LDA.

- o B 28 Sd (large 10)

C H I L E

In conjunction with another collector I recently purchased a collection of Chile tokens, among which were a dozen transportation items. One token, which I had listed as unknown in the January 1975 Supplement, was listed as Lota, Chile, in this collection. I am assuming that his listing was correct, so the previous 998 A listing is now changed to a horsecar token listing from Lota.

Lota 500

- | | | |
|-------------|--|--------|
| | F.C.U. de L. (1A. in center) | |
| AAo V 26 Sd | Vale por un Pasaje (1A. in center)(red) | \$5.00 |
| | F.C.U. de L. (2A. in center)(black)(numbers) | |
| ABo V 26 Sd | Vale por un Pasaje (2A. in center) | 5.00 |

This brings to 54 the number of known tokens used aboard horsecars from South America, of which I only have 51 different, including several presently unique items. The present Establecimiento de Lota tokens are not transportation, but were used to pay railroad and dock workers for work performed, and will be so noted in future catalogues. The same lot contained the following unusual token:

OFICINA RICA AVENTURA (41mm)

- o V Oc Sd Vale Una Carretada de Caliche (green-black-green sandwich)

When translated the reverse says "good for one load of nitrate ore." Our Chile expert Elwin Leslie says that while most of the nitrate ore mining companies hired their own workers and paid them in tokens only redeemable at their stores, some companies hired private contractors who were given tokens like the above for each cartload of ore they mined. These tokens were redeemable at the company offices for cash. Other reverses commonly found on these tokens for each cartload of ore are: Vale Carretada Caliche; Una Carretada Caliche; Una Carretada. These cartload tokens in general are far scarcer than the other nitrate tokens.

HAVE LIMITED NUMBER of Illinois passes listed in Oct. 1976 Fare Box. ILL 999 A B G H J K M for sale at \$2.00 each; Ill 999 L at \$3.00, or set of 8 passes for \$15.00. Quincy A. Laflin - 1476 Iglehart - St. Paul, MN 55104

I WILL TRADE A CA 625 B for one of the following Calif. tokens I can use in my collection: 50 B, 100 C, 205 C, 395 A B, 650 A, 880 A. 3 trades available.

Bill Williges - P.O. Box 655 - Davis, CA 95616

TRADE LIST OF TRANSP., MERCHANT & MISC. tokens. Also personal token available. Send your trade list. = Jim Hemphill - P.O. Box 1321 - Lake Oswego, OR 97034

TRANSPORTATION ODDS & ENDS FOR TRADE FOR TOKENS. 1933 reprint "The New Eighth Ave. Subway" route map; 1934 Nostrand's Map of Bronx with "El," subway ferry lines; 1948 Philadelphia street guide with trolley, bus, subway lines; PRT meal ticket; Third Ave. RR coat button. Any token offer considered.

Stanley Heist - 1422 Manley Road - West Chester, PA 19380

MERRY CHRISTMAS AND HAPPY NEW YEAR! I hope to meet all of you at the Annual AVA meeting which will meet during the summer of 1977 in Carson City, Nevada.

Bill Williges, Sr. - Box 445 - Wheatland, CA 95692

WILL TRADE MY 1976 CHRISTMAS PERSONAL TOKEN for any other personal, or SASE.

Bob Coney - 2627 Myrtle - Sioux City, IA 51103

NY 630 U for sale. I have several of them and would need only \$2.00 for one. The same token sold for \$3 in the recent AVA auction. Please write to:

Morton H. Dawson - 182 Whiting Lane - West Hartford, CT 06119

WANTED: Food Stamp change tokens and paper scrip. Will trade TT's or pay cash for wanted items. Please do not send requests for my 601-D personal token. My supply is depleted. = Al Zaika - P.O. Box 65 - Bellmawr, NJ 08030

WILL TRADE UTAH 750 C's for TT's from Maine, Mississippi and Vermont. I will furnish postage. All, my personal 1630-A for yours.

Roy D. Nulph - P.O. Box 20392 - Salt Lake City, UT 84120

FOR TRADE: parking token Ind 3660 A for any 5 car wash I can use: also car wash Ind 310 A for any 4 car wash I can use. Will consider Ind. merchants that I can use.

Jack Smith - P.O. Box 26423 - Lawrence, IN 46226

JUST THREE LEFT: "The American Railway" by T. Clarke and others. Over 200 illustrations, 456 pages. Arno Press 1976. List price \$25. Yours for only \$12.50 + \$1 for postage & handling. = Paul Targonsky - 23 Harrison St. - Meriden, CT 06450

LOOK CAREFULLY: I will trade my \$10 catalog ILL 135 D for any one of the following:

NJ 20 C, 290 D or any two of the following: NJ 145 A, 605 A, 997 M, 998 A B, or one of the last plus cash. = Bob Slawsky - P.O. Box 423 - Rockaway, NJ 07866

ISLE OF MAN's new crown pictures a horse-drawn tram and can be yours for \$3 postpaid or I'll trade for 30 diff. TT's. = Dan Rusnak - Box 327 - Sparks, NV 89431

WANTED: IL 25 A,B & 270 A. Your price.

Steve Hyett - 16 Butternut Drive - Naperville, IL 60540

FOR SALE: ILL 795 D. \$5.00.
Joseph R. Mileham - 3123 So. Dirksen Parkway - Springfield, IL 62703
TRADE: transp. tokens, wooden nickels, dog tax tags. Send trading list to:
Forrest R. Miller 1617 Amelia Avenue - Lexington, MO 64067
WANTED: OHIO tokens of all types. Have TT-s & PT-s to trade. Send list & want-list.
G. Lipscomb - 5010 Winton Road - Fairfield, OH 45014
FOR TRADE ONLY: My Hawaii 330 A for any one of the following: Alas 450 G; Ida 380 A;
Tex 5 B, 135 B, 340 P, 590 B, 710 C.
Edrick J. Miller - 3257 Idaho Lane - Costa Mesa, CA 92626
PARKING TOKENS WANTED: Please write price desired for the following Penna. PT's:

Our 354th Issue

JOHN McKAY-CLEMENTS and THOMAS B. SPRAGUE

As we grow older the months and years seem to tumble after each other with ever greater speed, and more and more the news brings us sad tidings of new loss. John L. McKay-Clements, AVA #555, of Haileybury, Ontario, was not only one of the most celebrated numismatists of Canada, he was also one of that nation's leading industrialists and most prominent citizens. A graduate of London University, he owned the Wabi Iron Works of New Liskeard, and the Cobalt Foundry. He was elected Mayor of his home town of Haileybury in 1971, and donated \$30,000 towards a new public library in that city, and \$200,000 toward the construction of a medical centre in Haileybury, which now is to be named in his honor. In his coin collection was one of only two known examples of the 1911 Canadian silver dollar, which recently sold for \$110,000. He was a member of A.V.A. for many years and his numismatic interest always included tokens as well as coins. He was a strong supporter of our society, and we shall miss his friendly informality and wise counsel.

Thomas Sprague died last June 12. One of the most venerable of our members in terms of years of membership, he held number 79. I remember visiting him back about 1955 in his store in Baltimore, and how he dropped everything he was doing to chat with me, to take me around the corner for lunch, and to weigh me down with gifts when I departed. A delightful person, a wonderful friend, a loyal and devoted collector. T.B. will be remembered as the kind of gentleman of whom this world can never have an oversupply.

January 7 at 2:08 a.m. A bit late this month but can't be helped. All last week when I usually would be preparing this issue, I was finishing up work on the 1977 Atwood Catalogue Supplement. It took more than the one week I thought it would take in the November issue! As a matter of fact, every time I thought I had a free evening to devote to finishing things up, something else came up. It was finally mailed off to the printer on December 31, and I have been assured that the books will be ready by the first week in March, possibly even sooner. It will have 244 numbered pages. The cloth binding will be red, and it will match in appearance the 1970 3rd edition of Atwood except, of course, that it will be only about one-third as thick. There definitely will be 100 copies bound in spiral type binding, 200 loose-

1776

1976

leaf, and 1,700 cloth-bound. There is a full index to the tokens listed in the book, and photographs are plentiful. In fact it was affixing the photos, typing captions and pasting them beneath photos, that delayed things for so long. A feature of the Supplement will be that each state will be a separate unit. This means that those with loose leaf copies will be able to take out each state's listings and place them in their loose-leaf copies of the 1970 Catalogue at the end of each state in that book.

I am gratified at the large number of AVA members who have already sent in payment for advance orders. So far 328 copies have been reserved by AVA members, in just a month since we made the announcement. I expect to sell large quantities to dealers, as I have in the past with our other books. So the project probably will have paid for itself about the time we get them from the printer.

The special advance price for members will continue in effect until March 1. But this is a one-time only price: \$4.00 postpaid per copy, available cloth-bound, or loose-leaf (loose pages with 3-hole punch), or spiral-bound to lie flat. After March 1 the price will be \$5.50 to members postpaid, and \$7.50 to others. Most of you know the price of books these days, and \$4 for a book of this size, cloth-bound, is almost an anachronism. So if you haven't yet ordered, send your \$4 check to the Editor (but make it payable to "American Vecturist Association" and save me the trouble of signing my name). If you've already ordered but want a second (or third or fourth) copy, by all means take advantage of the \$4 price while it's still in effect.

Speaking of March 1, that is the date when your AVA membership will expire if you haven't mailed in your 1977 dues to the Treasurer, R.K. Frisbee - 211 King Street - Denver, CO 80219. Send your \$7.50 to Toby right away, if you haven't yet, and share a great year with us. The February issue of THE FARE BOX is the first one you will not receive if you don't send in your dues. Remember, too, if you're late, we have to ask for \$8.50 after March 1.

A nice aerogramme arrived from Yosef Sa'ar in Elat, Israel: "Leah and Yosef Sa'ar are happy to announce the arrival of their new issue, Efrat, a 3.650 kilogram girl." Enough said, and congratulations are in order. Joe added: "Are you familiar with the narrow gauge railway tokens of St. Etienne, France? I just obtained an example of the 20 centimes piece, brass but it looks closer to copper. The specimen is in bad condition with many small pimples on both sides. The important fact that I wanted to call to your attention was the name of the diesinker in tiny letters on the obverse: BARLET GRAVEUR CHAMBON. Reference Smith, France 800 K. Note, no (arms) on obverse of France 800 K."

Speaking of Kenneth E. Smith, our foreign token cataloguer, members of TAMS have this past week received an excellent book by our own Ken Smith (they got his middle initial wrong on the cover!), *Amusement Tokens of the Minneapolis St. Paul Area*. An excellent book, comprehensive with lots of photos. In it we find the listing of a token which had bedeviled a lot of us (and which I own), a 21mm WM solid token inscribed NICKOS BROTHERS COACHES RICE & WHEELLOCK PKWY. This looked like a bus token. Ken lists it and give the address, 1638 Rice Street. Strictly an amusement item. Few people are better qualified than Kenny to write about the Twin Cities. He lived there, and attended the University of Minnesota, working his way through college by serving as a streetcar conductor. As a matter of fact, he was the conductor on the trolley of which past AVA president Quincy Laflin was motorman. Small world.

And this reminds me of something. Ken Smith's World Transportation Token Catalogue is kind of unsung and a lot of AVA members never bought a copy. It has its faults (who, and what, does not?) but it is an amazing piece of cataloguing and the only thing of its kind in the world. Everyone handles a foreign TT now and then, even if he doesn't collect them. At only \$5 postpaid that book is a real bargain. See his ad which runs in every issue.

Now I'm going to let a cat out of the bag. The great Canso Causeway in Nova Scotia is using 3 different high-denomination tokens, but no one can get any of them loose. They only struck something like 200 of each, in denominations of \$1.50, \$2.20, and \$4. They aren't sold to the public. When you pay your toll, the toll taker drops a token into the fare box. The only vecturist who's ever even seen one was Len Paul, to the best of my knowledge, when he recently drove over. But they won't part with even a single one. So these three will be a challenge to our creative types. We learned about them from the Meyer & Wenthe records.

= THE ORANGE STREET BUS LINE OF NEW HAVEN, CONNECTICUT =

By John M. Coffee, Jr.

New Haven was a fascinating city when I arrived there for the first time, as a freshman student entering Yale University, in September, 1947. I had never even been in New England before, and found the entire region an adventure. I had been collecting transportation tokens for five years already by then, but had been a streetcar fan long before my interest in tokens. New Haven was paradise, in 1947, for a trolley enthusiast. It was like a huge operating trolley museum running all over a city! Not a PCC car in the whole city! The streetcars could only be described as old, very old, and ancient. Some had sliding doors and all side seats. They had the most wonderful collection of antique streetcars in service of any city in America at the time. Not only that, they still used open streetcars--being the last city in the nation to use them--to Yale football games. It was heaven, no doubt about that. And while my fellow Yale students would venture no further from the university than the movie theatres, I rode every streetcar line on the system, day after day.

And on other days I dropped in to visit Frank J. Katen's coin shop where he very often had some good transportation tokens for sale, nearly always at the prices in Atwood's 1948 Check List. For instance one day I dropped in and he showed me about 25 rarities, most of which are still census in 1977, all priced at 1948 Check List prices. To buy them all it would've taken more money than I had, and I quickly borrowed the extra I needed and bought everything Frank had except Ohio 230 A and B, for which Frank wanted \$25 for the pair, an outrageous sum at the time. About once a month he had auctions at night, usually containing a handful of rare transportation tokens. I remember buying one lot of 200 odds and ends of exomunia "junk" to get one rare TT, and then selling the rest of the stuff for two dollars to a guy who arrived late.

All of which is a long introduction to something else New Haven had which made it a nice city: the Orange Street Bus Line. Only in New England would you find an Orange Street Bus Line. A tiny bus line of half a dozen little buses, some with only a 15-passenger capacity, which operated in competition to the big Connecticut Company trolleys. Fare on the Connecticut Company was 10¢ or 3 tokens for 25¢. Fare on the Orange Street buses was 5¢ or 6 tokens for 25¢. The line was only about four miles long, up and down one street. But it started at the railroad station, and its service was more frequent than that provided by the Connecticut Company. So whenever I came back to town, instead of paying 50¢ for a taxi to the dormitory, or a dime on the Connecticut Company trolley, I took the Orange Street bus for a nickel and walked a couple extra blocks to the dormitory on College Street. There was also a personal satisfaction in patronizing a little independent bus line instead of the big corporation.

Being a vecturist, it was not long, of course, before I visited the main (and only) office of the Orange Street line, situated at 14 South Orange Street. I was permitted to go through their "foreign" tokens (nearly all 23mm and hence containing more interesting stuff than you usually would find in foreign token boxes) and buy any I wanted at the rate of 6 for 25¢. I remember the president of the firm, Harry Kabakoff, discussed the history of the line with me. He explained how he and Meyer Belous and Jacob Rosenthal and got together in 1921 with three buses to begin the company. Each of the three partners drove a bus "and," he added, "we had little aluminum tokens with numbers on them. Each of us had his own tokens. Mine had a "1" on them, Jake had "2" on his, and Meyer had "3" on his.

At that point, needless to say, I asked if he still had any of said tokens on hand, inasmuch as they had been unknown and unlisted until then. He produced one token with a "3" on it, but refused to part with it. It was, of course, Conn 305 C. I returned a couple of months later determined to be daring, and offered him \$2 for the aluminum token with a "3" on it. He was unable to resist. And not only that, one of the other partners--I don't remember who it was--said he would sell me his aluminum token with a "1" on it for \$2 if I was that crazy. I was. That was all they had. On subsequent trips to the office I asked if they had found any more aluminum tokens, but they never did find any more. I was hoping for a "2" (Conn 305 B) but no one has ever found the "2" to this day. We list it in Atwood only because we know it was made, and also the AVA owns the dies for all three tokens, which were obtained from Quint of Philadelphia, who struck them in 1921.

Orange Street Bus Line was prolific in issuing tokens. They switched from aluminum to white metal in the early 1920's (Conn 305 D) and, interestingly, years later when they reordered white metal tokens in 1960 they still were using a type #1 bus (305 H, which differs from D only in that it has no period after "LINE,").

In the Fall of 1948, Connecticut Company abandoned all those beautiful old trolley cars for "modern buses," and the city lost some of its charm. Orange Street Bus Line kept on going, upgrading its rolling stock with newer and larger buses, but always until very recently the fare was a trifle lower than the Connecticut Company.

In time, all three of the founding partners died, and the daughter of Meyer Belous, Mrs. Sophie Maretz became President & General Manager in 1959. After she died in 1967 her husband Moe Maretz became president, until he died in 1969 aboard the "Queen Elizabeth" while on an ocean voyage. Their daughter-in-law, Jane Maretz, then took over management of the little bus line, and Jane's husband Henry became General Counsel. Orange Street was one of the very few transportation firms in America with a woman in charge.

But all good things come to an end. In September, 1976, the state-owned Connecticut Department of Transportation--which had already taken over the New Haven lines of the Connecticut Company--decided the time had come to swallow up the little Orange Street firm. The State offered to buy the line and equipment for \$88,350, a sum the owners said was "totally inadequate." Nevertheless, the State has taken over, and the purchase price is in the courts. Except for absorption by the big publicly-owned monopoly, things will be about the same. The somewhat dilapidated buses of the Orange Street firm will not be used, and more modern buses--four of them--will be placed in service on Orange Street, but they will follow the same route, and they will be driven by the same drivers who served the Orange Street firm--part of the purchase agreement being that the employees of Orange Street Bus Line would be hired by the State. The fare, which was 35¢ cash on both systems at the time of the takeover, will apparently remain the same, but with one benefit to Orange Street patrons: now they will be entitled to a free transfer to other New Haven bus lines.

So another of the charming small things which have lent something distinctive to our country passes from the scene. And not just that. I have visited New Haven in recent years, and the City is so different I hardly know my way around any longer. But the old New Haven of my bright college years was a wonderful and adventurous town and I never tired of exploring it.

And not only New Haven. Those college years I explored every city in Connecticut visiting bus lines and buying tokens and discussing transit history with the delightful proprietors of the dozens of lines which flourished back in the late 40's and early 50's. But all of that is another story, which I shall reserve for a later issue.

= NEW FINDS =

We haven't run this department in some months, although certainly collectors have been finding tokens. I did learn a while back that George Hosek picked up Viroqua, Wis 910 A, being the third one known of the beautiful token with the hack on it.

Alan Weighell acquired an interesting token whose origin is unknown:

REGIONAL TRANSIT SYSTEM ONE FARE

Pb 42 Sd (happy face) (black lettering on blue plastic)

And Jack Wilcox found a nice old timetable type token:

**SHIP AND TRAVEL OVER THE NEW JERSEY CENTRAL FAMOUS FOR THE BLUE
COMET AND "THE BULLET"**

Bz 32 Sd Good Service Good Trains Good Meals Good Luck C.R.R. of N.J.
(swastika, 7, 11, etc.)

Finally, Mort Dawson reminds us that Unidentified #9 is listed as an amusement token in Ken Smith's new book on Twin Cities Amusement Tokens. Ken even gives a street address for the "Depot" so it should come out of Atwood.

= TOKEN, MEDAL AND EXONUMIA MEET ON APRIL 16 AND 17, 1977 =

Plans have been completed for a token, medal, and exonumia meet, which was discussed in the October 1976 issue of THE FARE BOX. The dates will be April 16 and 17, and the place will be the Hall of Flags, in the concourse area of the Sheraton Hotel, 18th and Market Streets, Philadelphia. Everybody is welcome and there will be NO admission charge.

Tables will be available for dealers at reasonable rates. Tables are limited and they will be let on a first come, first served, basis. Dealers will be permitted to set up Friday evening, April 15. Security will be provided for the event.

Inquiries for dealer participation should be directed to Al Zaika - P.O. Box 65 - Bellmawr, NJ 08030. Those dealers who had previously written me will have their names forwarded to Al for processing. Any other information from all other parties such as room reservations, etc., should be directed to either Joe Pernicano (58 Sonia Lane, Broomall, PA 19008), or Len Paul (113 Rutledge Ave., Folsom, PA 19003). We look forward to seeing you all there.

= MORE ON THE OILTON, OKLAHOMA, TRANSFER TOKEN =

On page 144 of the October Fare Box we published a piece about a token discovered by Del Ford inscribed CITY TRANSFER CO. / OILTON (obverse) and 12½ (on reverse). It was stated that our information indicated it was a drayage, or freight, token. Del did some more investigating, which suggests we hold up our final decision. Here is his letter to me:

"The suggestion that the 'very elderly gentleman,' or as described in your letter of 17 Oct 76 = 'a 90-year-old man' was the owner or operator of City Transfer Co. is apparently not valid in either instance. This one seems to have gotten fouled up in transmission somehow. I have talked to this same gentleman (he said a man called him from Chicago or someplace in Illinois) and asked about the City Transfer Co., etc. So I must assume it's the same man. His name is Everett Taylor. Mr. Taylor is 75 years old. He was a teenager when City Transfer operated in Oilton. He remembers this firm mostly because of what he describes as the beautiful team used on the wagons, which he describes as a beautiful white stallion and a spotted mare. He worked as a roughneck in the oil fields. He saw people riding from depot to town with the driver but doesn't know personally if they were paying passengers or not. Nor does he remember the tokens. I talked also to the postmistress, Viola Endicott; to Tom Spradlin who was Taylor's boss in the oil fields; to Ty Combs, an oldtimer there, to Mayor Vance Sylvester; and others. But no additional information was forthcoming, although there was verification of Taylor's story about the handsome team, and others riding with the driver. Have not been able to find City Transfer Co. in any telephone books available to me, although this is not necessarily negative proof as many small businesses in those days did not use phones. AVA member Lloyd Walker of Lawton, Okla., has a 1928 Oilton phone book and found 'Oilton Team & Truck Co.' listed. I have talked to Joel Reznick about this and he insists that his message to you apparently was not exactly understood and that the man he talked to was Everett Taylor, and that he did not claim to be the owner or operator of City Transfer Co. I am going to pursue this until I am satisfied one way or the other."

Mr. Ford is a methodical investigator, and I hope he does discover proof that the token was used for payment of transportation. Meanwhile, we shall hold our decision in abeyance until further notice.

W.G. Fyler writes that he is all out of his personal tokens, and also all out of the Branford, CT 30 A, tokens.

= REMEMBER THE 1977 AVA CONVENTION AT CARSON CITY: AUGUST 12-14, 1977 =

PARKING TOKENS IN NAPERVILLE, ILLINOIS

By Steve Hyett

City records are not very clear about when the "first" parking meter was installed in Naperville, Illinois. However, the records do show that Officer Fred Kleinhenn's salary was paid out of the Motor Vehicle Parking System Fund beginning in August, 1953. The MVPS received its revenue from parking meters. So, Naperville had meters as far back as 1953 and probably earlier.

As a youngster growing up in Naperville, I can well remember Officer Fred stopping traffic to let us cross the street after school. Friends who had "ditched" school said they saw Fred taking money out of the parking meters during the day.

It wasn't until 1967 that Naperville saw its first parking token. The tokens came after a "free parking" program failed when some merchants contributed and others did not. The Chamber of Commerce organized and pushed the program. The City purchased 25,000 tokens from Meyer & Wenthe; 255 meters were converted and 80 new meters were installed to accommodate the tokens. Those first tokens were distributed and used beginning the day after Thanksgiving, November 27, 1967.

Under the program, the City sold the tokens to the Chamber for 4½¢ each and the Chamber, in turn, sold them to the merchants for 5¢ each. The merchants had tokens in their cash registers and would hand a token to a customer with a purchase. A token would provide a free hour of parking in the downtown business district.

The parking token program continued with little change until the spring of 1975 when the City raised the parking fee to a dime per hour because of costs incurred in expanding off-street parking. At that time, the City gave the parking program a boost by sending a parking token to all the residents with their utility bills. The City designed a new token for the mailing. One side has the new Chamber of Commerce "N" with the words "PARKING TOKEN". The reverse has the newly designed City of Naperville logo and the word "Naperville". The order went to Meyer & Wenthe again. The 20,000 new tokens were delivered on March 5, 1975, and immediately went into circulation.

In the fall of the same year, a new mayor pushed through a program to eliminate the meters by raising City vehicle sticker prices. That, combined with another merchant donation plan, and the meters were bagged November 28, 1975. Parking has been "free" in the downtown ever since and a special taxing district is being formed to finance the parking program. When the taxing district is formed, the meters will come out permanently.

Meanwhile, what happens to all the extra tokens? You may have one of each by sending a note and a SASE to:

Administrative Secretary
Finance Department
City of Naperville
175 W. Jackson Ave
Naperville, IL 60540

Remember to include a self-addressed, stamped envelope.

[Todd & McDermott ran a livery stable in New Richmond, where the railroad depot was situated, and carried passengers in their hacks to and from a place called John Tills, just outside the city limits of Somerset.]

= NOTES BY RALPH FREIBERG =

This month we list several tokens marked ***. This denotes tokens which are rare in the sense that only a few are in the hands of collectors, but of which quantities may exist in company vaults. Hence rather than assign a census valuation, we indicate the future possibility of their becoming common with the ***.

In addition to the 23mm SCAT token of Ventura, there is a 16mm token, but I've never seen it or a rubbing, so don't know the exact wording. So if you wish you may indicate 955 B as a 16mm token possibly like 955 A, but possibly also with slightly different wording.

A large quantity of the Key West tokens were struck, but there is a legal battle going on between the token manufacturer and the City of Key West because of a misunderstanding over how many tokens to strike and who should pay for the extra ones. This is one we may get eventually because there are lots of them in existence, but not in collectors' hands yet.

I don't know why the 23mm Gary, IN, token was never used, and have marked the token obsolete because the present operator of the system is Gary Public Transportation Corp. Whether they got these tokens when they took over the system I don't know. Possibly they did and have them all in the vault.

Lance Thompson got information for me on the Las Animas, CO, token. Since the token was used the line had changed hands, and the present owner knows nothing of any tokens ever having been used. But the token was found in southern Colorado so we believe this is the correct attribution for the token, formerly listed as Unidentified.

Island Taxi is no longer listed in the Honolulu phone book so I don't know how long ago this token was used in Hawaii. This is not one of Mr. Tomberlin's tokens.

The Webster City, IA, depotel is another of the rare token listings John Coffee obtained when he visited Roger Bolz in Lincoln last June.

The zinc-plated tokens of Syracuse were reported by several other collectors, but I could never find any information on them. But when Joel Reznick obtained one through various phone calls he was able also to locate the former owner of the line, who said the tokens were plated in the late 1940's for a fare increase. The first person who reported this token to me called it a zinc pattern! This was duly, and incorrectly, listed as NY 998 P. So delete that one. At the time I didn't have a file handy to check into the token, and also didn't have permission to file the edge.

The Haskell, TX, token was just mentioned in the September, 1976, Fare Box. But Harold Ford showed me a photo of it from Coin World and took their description.

The two Fond du Lac tokens were ordered to supplement the tokens already in use. One of our members was supposed to get a supply for N.I.S. but we didn't hear from him for some time and don't know if he was ever able to get them for us. If anyone wants to gamble, go ahead and write the company, but there's no guarantee you'll get the token you ask for. This is a difficulty in writing a company for a new token issued to supplement a slightly different type. Often they mix them all together and people in the company have trouble differentiating between the old and the new ones.

Todd and McDermott operated a hack line from a railroad depot in New Richmond, WI and carried folks from there to John Tills, a health resort where people went to cure various ailments. The token was listed from Somerset as that was the town near-

est to John Tills. Perhaps it should have been listed from New Richmond. But we'll just leave it be for a spell along with the other John Tills token already listed.

All tokens listed in this Supplement will appear in John Coffee's 1977 Supplement to Atwood's Catalogue, and the same will be true of the January Supplement. So the book will include tokens listed in Fare Box supplements from January 1970 thru January 1977. Next month we'll clear the decks and list everything we have left which will be in the book. Beginning with the February issue, we'll be listing new tokens that will not be in the book. We do know of a few new issues now, which we didn't put in the book because none of us has seen them. Perhaps by February we'll have obtained a supply and be able to examine them.

Alan Weighell reports a token about which I know nothing. It may or may not be a transportation token:

THE CRESSET AUTO CO LTD

K 16 St-sc (blank) (7-pointed star)

There are a few odd tokens reported to me from Wheeling, WV, those big "Through West" (or "East") tokens. No one has ever explained exactly how, or on what, these tokens were used. Not too long ago I've had some tokens reported with numerals struck over numerals in these tokens, or a smaller letter added. We don't list these because we believe anyone with a set of number stamps could be having fun with them. So this series will remain as it is for now, in the Catalogue.

= DECEMBER NEW ISSUES SERVICE REPORT =

By John G. Nicolosi

I hope you all had a Merry Christmas and that 1977 will be good to all of us vecturists, and the rest of the world, too.

We do not send out tokens in December, to avoid the Christmas rush. But I do have some for January. You will be receiving some of the Illinois passes listed in the October Fare Box, namely IL 999 A G H J. Mr. Bill Garrison, through his persistence, has obtained these for us, and they will again go to you at a reduced rate. I trust he will also be able to obtain some of the others in this set for us. Thanks very much, Bill. Unfortunately we didn't get enough of all four to go around, so our Associate Members will receive only 999 A and J. Regulars will get all four.

We have a few more tokens already in the works, and one on hand, to begin 1977 on a good note.

When you send checks for your N.I.S. balance, will you please make them out in my name, personally? I don't have an account in the name of the New Issues Service, and checks so made out just cause a lot of arguments at the bank.

= ANOTHER GATHERING IN THE DELAWARE VALLEY =

By Leonard H. Paul

The Delaware Valley Vecturists Association met Saturday, November 13, in Penn Station YMCA in New York City as guests of the North Eastern Vecturist Assn. Five of our members attended: DiMichael, Pernicano, Zaika, Paul, and Gabsch (with son). We were warmly welcomed as old friends by our old friends, Ralph Hinze and the rest of the NEVA gang. A good time was had by all.

Our next meeting will be Saturday, Jan. 16 about 1:30 pm at the usual spot, Joe Pernicano's office, 1200 Virginia Drive at the Girard Bank Sign In Fort Washington Industrial Park, Pa. Visitors welcome!

A new trolley line in Detroit--ten blocks long--is now operating under the name "Detroit Citizens Railway." They have 6 beautiful old cars, vintage 1900. Fare 25¢.

On November 19 I attended the California State Numismatic Association meeting at the Disneyland Hotel in Anaheim to deliver some books. While there I looked to see what was offered in tokens. In addition to writing on transportation tokens, I also write books and articles on amusement tokens. One dealer had some foreign common transportation tokens for which he wanted several times catalogue, which I passed up, and also some foreign amusement tokens. He had one labeled P. CALL which I looked at and recognized as a P. GALL token of Hamburg, Germany. I call his attention to the fact that it read P. GALL and not P. CALL and his quick response was that as far as he was concerned it was P. CALL and his asking price of \$2 was firm and it was a call house token. So I bought it. It was the P. GALL variety listed as 390 AQ, which listing was obtained from the Hamburg Museum. I now apparently have the only one known outside the museum. The reverse is unusual in that it reads 5 P.F. with a dot between the P and the F. The P. Gall tokens were early ferry tokens used in Hamburg Harbour.

Remember, please, when you report new discoveries, in addition to giving the exact wording and spelling and punctuation on each side, to send rubbings or photographs. This is essential to insure accurate listings. But please keep the listings coming.

= FEISEL MAIL BID SALE 771 =

Because my collecting interests have changed, I have decided to break up my collection of transportation tokens. Over the past two years, I have sold or traded some of my collection, and now I plan to hold monthly mail bid sales to dispose of additional material. For those of you who wish to submit want lists, I will do what I can to help; prices will be a minimum of 10X the listed catalogue value. The tokens to be offered in these mail bid sales will all be better tokens, usually cataloguing \$1.00 or higher. The following rules apply:

1. Mail bids to Duane H. Feisel, P.O. Box 1302, Los Altos, CA 94022; bids must be postmarked no later than January 31, 1977.
2. Bid by lot number.
3. Successful bidders will be notified. Payment in full must be received before shipment is made, no exceptions.
4. Successful bidders will be responsible for postage and insurance or registration costs. Please specify how you wish shipment to be made.
5. All tokens are in nice condition unless specified. If not fully satisfied, lots may be returned within five days for a full refund.
6. Tokens are expected to bring at least 10X catalogue on the average. Minimum bid for any lot is 5X catalogue.
7. Winning bids will be reduced to 10% above second high bid whenever possible.
